Preface	xi
Symbols and Abbreviations	xiii

1 CELLS AND DIFFUSION 1

Cell Structure	1
Generalized Plant Cell / Leaf Cells / Cells of Vascular Tissue / Root Cells	
Diffusion	10
Fick's First Law / Continuity Equation and Fick's Second Law / Time-Distance Relation for Diffusion	
Membrane Structure	20
Membrane Models / Organelle Membranes	
Membrane Permeability	26
Concentration Difference across a Membrane / Permeability Coefficient / Diffusion and Cellular Concentration	
Cell Walls	33
Chemistry and Morphology / Diffusion across Cell Walls / Stress-Strain Relations of Cell Wall	
Problems	43
References	44

2 WATER 47

Physical Properties	48
Hydrogen Bonding—Thermal Relations / Surface Tension / Capillary Rise / Capillary Rise in the Xylem / Tensile Strength, Viscosity / Electrical Properties	
Chemical Potential	59
Free Energy and Chemical Potential / Analysis of Chemical Potential / Standard State / Hydrostatic Pressure / Water Activity and Osmotic Pressure / The Van't Hoff Relation / Matric Pressure / Water Potential	
Central Vacuole and Chloroplasts	77
Water Relations of the Central Vacuole / Boyle-Van't Hoff Relation / Osmotic Responses of Chloroplasts	

Water Potential and Plant Cells 85

Incipient Plasmolysis / Höfler Diagrams and Pressure–Volume Curves / Chemical Potential and Water Potential of Water Vapor / Plant–Air Interface / Pressure in the Cell Wall Water / Water Flux / Cell Growth / Kinetics of Volume Changes

Problems 104

References 105

3 SOLUTES 109**Chemical Potential of Ions 110**

Electrical Potential / Electroneutrality and Membrane Capacitance / Activity Coefficients of Ions / Nernst Potential / Example of E_{N_K}

Fluxes and Diffusion Potentials 120

Flux and Mobility / Diffusion Potential in a Solution / Membrane Fluxes / Membrane Diffusion Potential—Goldman Equation / Application of the Goldman Equation / Donnan Potential

Characteristics of Crossing Membranes 139

Electrogenicity / Boltzmann Energy Distribution and Q_{10} , a Temperature Coefficient / Activation Energy and Arrhenius Plots / Ussing–Teorell Equation / Example of Active Transport / Energy for Active Transport / Speculation on Active Transport

Mechanisms for Crossing Membranes 156

Carriers, Porters, Channels, and Pumps / Michaelis–Menten Formalism / Facilitated Diffusion

Principles of Irreversible Thermodynamics 165

Fluxes, Forces, and Onsager Coefficients / Water and Solute Flow / Flux Densities, L_p , and σ / Values of Reflection Coefficients

Solute Movement across Membranes 176

The Influence of Reflection Coefficients on Incipient Plasmolysis / Extension of the Boyle–Van't Hoff Relation / Reflection Coefficients of Chloroplasts / Solute Flux Density

Problems 184

References 186

4 LIGHT 191**Wavelength and Energy 192**

Light Waves / Energy of Light / Illumination, Photon Flux Density, and Irradiance / Sunlight / Planck's and Wien's Formulae

Absorption of Light by Molecules 204

Role of Electrons in Absorption Event / Electron Spin and State Multiplicity / Molecular Orbitals / Photoisomerization / Light Absorption by Chlorophyll

De-excitation 215

Fluorescence, Phosphorescence, and Radiationless Transitions / Competing Pathways for De-excitation / Lifetimes / Quantum Yields

Absorption Spectra and Action Spectra 222

Vibrational Sublevels in an Energy Level Diagram / The Franck–Condon Principle / Absorption Bands and Absorption Coefficients / Conjugation / Action Spectra / Absorption and Action Spectra of Phytochrome

Problems 240

References 242

5 PHOTOCHEMISTRY OF PHOTOSYNTHESIS 245

Chlorophyll—Chemistry and Spectra 248

Types and Structures / Absorption and Fluorescence Emission Spectra /
Absorption *in Vivo*—Polarized Light

Other Photosynthetic Pigments 255

Carotenoids / Phycobilins

Excitation Transfers among Photosynthetic Pigments 263

Pigments and the Photochemical Reaction / Resonance Transfer
of Excitation / Transfers of Excitation between Photosynthetic
Pigments / Excitation Trapping

Groupings of Photosynthetic Pigments 271

Photosynthetic Units / Excitation Processing / Photosynthetic Action Spectra
and Enhancement Effects / Two Photosystems plus Light-Harvesting Antennae

Electron Flow 279

Electron Flow Model / Components of the Electron Transfer Pathway / Types of
Electron Flow / Photophosphorylation / Vectorial Aspects of Electron Flow

Problems 292

References 294

6 BIOENERGETICS 297

Gibbs Free Energy 298

Chemical Reactions and Equilibrium Constants / Interconversion of Chemical
and Electrical Energy / Redox Potentials

Biological Energy Currencies 308

ATP—Structure and Reactions / Gibbs Free Energy Change for ATP Formation /
NADP⁺—NADPH Redox Couple

Chloroplast Bioenergetics 317

Redox Couples / H⁺ Chemical Potential Differences Caused by Electron Flow /
Evidence for Chemiosmotic Hypothesis / Coupling of Flows

Mitochondrial Bioenergetics 327

Electron Flow Components—Redox Potentials / Oxidative Phosphorylation

Energy Flow in the Biosphere 335

Incident Light—Stefan-Boltzmann Law / Absorbed Light and Photosynthetic
Efficiency / Food Chains and Material Cycles

Problems 340

References 341

7 TEMPERATURE—ENERGY BUDGETS 345

Energy Budget—Radiation 346

Solar Irradiation / Absorbed Infrared Irradiation / Emitted Infrared Radiation /
Values for a , a_{IR} , and e_{IR} / Net Radiation / Examples for Radiation Terms

Wind—Heat Conduction and Convection 361

Wind—General Comments / Air Boundary Layers / Boundary Layers for Bluff
Bodies / Heat Conduction/Convection Equations / Dimensionless Numbers /
Examples of Heat Conduction/Convection

Latent Heat—Transpiration 374

Heat Flux Density Accompanying Transpiration / Heat Flux Density for Dew
or Frost Formation / Examples of Frost and Dew Formation

Soil 378

Thermal Properties / Soil Energy Balance / Variations in Soil Temperature

Further Examples of Energy Budgets	382
Leaf Shape and Orientation / Shaded Leaves within Plant Communities /	
Heat Storage / Time Constants	
Problems	389
References	390

8 LEAVES AND FLUXES 393

Resistances and Conductances—Transpiration	395
Boundary Layer Adjacent to Leaf / Stomata / Stomatal Conductance and	
Resistance / Cuticle / Intercellular Air Spaces / Fick's First Law and Conductances	
Water Vapor Fluxes Accompanying Transpiration	411
Conductance and Resistance Network / Values of Conductances / Effective Lengths	
and Resistance / Leaf Water Vapor Concentrations and Mole Fractions / Examples	
of Water Vapor Levels in a Leaf / Water Vapor Fluxes / Control of Transpiration	
CO₂ Conductances and Resistances	425
Resistance and Conductance Network / Mesophyll Area / Resistance Formulation for	
Cell Components / Partition Coefficient for CO ₂ / Cell Wall Resistance /	
Plasmalemma Resistance / Cytosol Resistance / Mesophyll Resistance /	
Chloroplast Resistance	
CO₂ Fluxes Accompanying Photosynthesis	437
Photosynthesis / Respiration and Photorespiration / Comprehensive CO ₂ Resistance	
Network / Compensation Points / Fluxes of CO ₂ / CO ₂ Conductances / Range in	
Photosynthetic Rates / Environmental Productivity Indices	
Water-Use Efficiency	455
Values of WUE / Elevational Effects on WUE / Stomatal Control of WUE /	
C ₃ versus C ₄ Plants	
Problems	465
References	467

9 PLANTS AND FLUXES 473

Gas Fluxes above the Leaf Canopy	474
Wind Speed Profiles / Flux Densities / Eddy Diffusion Coefficients / Resistance	
of Air above the Canopy / Transpiration and Photosynthesis / Values for Fluxes	
and Concentrations / Condensation	
Gas Fluxes within Plant Communities	484
Eddy Diffusion Coefficient and Resistance / Water Vapor / Attenuation of PPFD /	
Values of Foliar Absorption Coefficients / Light Compensation Point /	
CO ₂ Concentrations and Fluxes / CO ₂ at Night	
Soil	495
Soil Water Potential / Darcy's Law / Soil Hydraulic Conductivity Coefficient /	
Fluxes for Cylindrical Symmetry / Fluxes for Spherical Symmetry	
Water Movement in the Xylem and the Phloem	505
Root Tissues / The Xylem / Poiseuille's Law / Applications of Poiseuille's Law /	
The Phloem / Phloem Contents and Speed of Movement / Mechanism	
of Phloem Flow / Values for Components of the Phloem Water Potential	
The Soil-Plant-Atmosphere Continuum	520
Values of Water Potential Components / Resistances and Areas / Capacitance	
and Time Constants / Daily Changes	

Problems	534
References	536

APPENDICES 541

I Numerical Values of Constants and Coefficients	543
II Conversion Factors and Definitions	551
III Mathematical Relations	557
Prefixes / Logarithms / Quadratic Equation / Trigonometric Functions / Differential Equations	
IV Gibbs Free Energy and Chemical Potential	563
Entropy and Equilibrium / Gibbs Free Energy / Chemical Potential / Pressure Dependence of μ_j / Concentration Dependence of μ_j / General References	

SOLUTIONS TO PROBLEMS 575**INDEX 617**
