

Contents

I *Ammi majus* L. (Bishop's Weed): In Vitro Culture and the Production of Coumarin Compounds

H. EKIERT (With 11 Figures)

1 Introduction	1
2 In Vitro Approaches	4
3 Conclusions and Prospects	13
4 Protocol	14
References	14

II *Bergenia crassifolia* (L.) Fritsch (Bergenia): Micropropagation and Arbutin Contents

M. FURMANOWA and L. RAPCZEWSKA (With 7 Figures)

1 Introduction	18
2 In Vitro Approaches	23
3 Conclusions and Prospectives	30
References	32

III *Canavalia enisformis* L. DC (Jackbean): In Vitro Culture and the Production of Canavanine

C. OROPEZA, G. GODOY, J. QUIROZ, and V. M. LOYOLA-VARGAS (With 11 Figures)

1 Introduction	34
2 Toxic Components of the Seed	37
3 Inactivation of Antimetabolites	40
4 Conventional Practices for Its Propagation	41
5 In Vitro Approaches	41
6 Conclusions and Prospects	47
References	47

IV *Capsicum spp.* (Peppers): In Vitro Production of Capsaicin

P. D. WILLIAMS (With 11 Figures)

1 General Account	51
2 In Vitro Approaches	53
3 Conclusions and Prospects	61
4 Protocol	62
References	62

V *Cassia didymobotrya* (Wild Senna):

In Vitro Culture, Biotransformation and the Production of Secondary Metabolites

B. BOTTA and G. DELLE MONACHE (With 15 Figures)

1 Introduction	64
2 In Vitro Approaches	65
3 Summary and Conclusion	84
4 Protocol	84
References	85

VI *Cephaelis ipecacuanha* A. Richard (Brazilian Ipecac):

Micropropagation and the Production of Emetine and Cephaeline

K. YOSHIMATSU and K. SHIMOMURA (With 16 Figures)

1 Introduction	87
2 In Vitro Approaches	90
3 Conclusions and Prospects	100
4 Protocols for Micropropagation and Production of Alkaloids	100
References	102

VII *Cornus officinalis*: In Vitro Culture and the Production of Gallotannins

K. YAZAKI and T. OKUDA (With 9 Figures)

1 Introduction	104
2 In Vitro Approaches	106
3 Conclusions and Prospects	113
References	113

VIII *Cucurbita pepo* (Pumpkin): In Vitro Production of Ascorbate Oxidase

M. ESAKA (With 12 Figures)

1 Introduction	115
2 In Vitro Culture	115
3 Conclusions and Prospects	128
4 Protocol for Ascorbate Oxidase Production by Cultured Pumpkin Cells	129
References	129

IX *Elettaria cardamomum* Maton (Cardomom): Aromatic Compounds, in Vitro Culture Studies, and Clonal Propagation

Y.P.S. BAJAJ, B.R. REGHUNATH, and P.K. GOPALAKRISHNAN (With 8 Figures)

1 General Account	132
-------------------------	-----

2 Medicinal Importance and Secondary Metabolites	134
3 In Vitro Culture Studies	137
4 Conclusions	145
5 Protocol for Callusing and Caulogenesis	146
References	146

X *Eupatorium cannabinum* L. (Hemp Agrimony):
In Vitro Culture and the Production of Benzofurans
P. PROKSCH and R. SIEBERTZ (With 6 Figures)

1 Introduction	148
2 In Vitro Approaches	149
3 Conclusions	160
4 Protocol	160
References	161

XI *Genipa americana* L. (Marmalade Box):
In Vitro Production of Iridoid Glucosides
S. UEDA (With 4 Figures)

1 General Account	162
2 In Vitro Approaches	166
3 Conclusions and Prospects for Commercial Use	169
4 Protocol	170
References	170

XII *Gentiana* Species: In Vitro Culture, Regeneration,
and Production of Secoiridoid Glucosides
L. SKRZYPCZAK, M. WESOŁOWSKA, and E. SKRZYPCZAK
(With 6 Figures)

1 Introduction	172
2 In Vitro Approaches	175
3 Protocol	181
4 Conclusion and Prospects	182
References	183

XIII *Gypsophila paniculata* L. (Baby's Breath):
In Vitro Culture and the Production of Gypsogenin Saponins
M. HENRY (With 10 Figures)

1 General Account	187
2 In Vitro Culture of <i>G. paniculata</i>	193
3 Conclusions and Prospects	203
4 Protocol	204
References	205

XIV *Hygrophila erecta*: In Vitro Culture and the Production of Verbascoside

M. HENRY, J.-L. ROUSSEL, and C. ANDARY (With 4 Figures)

1 Introduction	207
2 Distribution and Importance of the Plant	208
3 In Vitro Approaches	209
4 Conclusion	214
5 Protocol	214
References	214

XV *Leontopodium alpinum* Cass. (Edelweiss):
In Vitro Culture, Micropropagation, and the Production of Secondary Metabolites

I. L. I. HOOK (With 13 Figures)

1 Introduction	217
2 In Vitro Approaches	219
3 Conclusions and Prospects	230
4 Protocol	230
References	231

XVI *Nerium* spp.: In Vitro Culture and the Production of Secondary Metabolites

D. H. PAPER and G. FRANZ (With 12 Figures)

1 Introduction	233
2 Main Components of <i>Nerium</i> spp.	233
3 Cell Cultures of <i>Nerium</i> spp.	243
4 Summary	244
5 Protocol	247
References	247

XVII *Picrasma quassioides* Bennet (Japanese Quassia Tree):
In Vitro Culture and Production of Quassin

A. H. SCRAGG and E. J. ALLAN (With 20 Figures)

1 Introduction	249
2 In Vitro Approaches	250
3 Summary and Conclusions	267
References	268

XVIII *Polygonum hydropiper* L. (Water Pepper):
In Vitro Culture and the Production of the Aphid-Antifeedant Polygodial

D. V. BANTHORPE (With 4 Figures)

1 General Account	269
2 Biotechnological Approaches	273

3 Conclusions	276
4 Protocol	277
References	277

XIX *Ptelea trifoliata* (Quinine Tree, Hop Tree):

In Vitro Culture and the Production of Alkaloids
and Medicinal Compounds

G. PETIT-PALY, M. MONTAGU, J. TRÉMOUILLAUX-GUILLER,
J. C. CHÉNIEUX, and M. RIDEAU (With 3 Figures)

1 Introduction	280
2 In Vitro Culture Approaches	286
3 Conclusions and Prospects	291
4 Protocol	292
References	292

XX *Rheum* Species (Rhubarb): In Vitro Culture
and the Production of Sennosides

S. SHIBATA (With 12 Figures)

1 Introduction	296
2 The Quantitative Analysis of Sennosides in Rhubarb by High Performance Liquid Chromatography (HPLC)	300
3 Tissue Culture of Rhubarb for the Production of Sennosides	303
4 Summary and Conclusion	312
References	312

XXI *Scopolia* spp.: In Vitro Culture and the Production
of Scopolamine and Hyoscyamine

H. J. SCHOLTEN, S. BATTERMAN, and J. F. VISSER
(With 5 Figures)

1 Introduction	314
2 In Vitro Culture Studies	315
3 Protocol	324
4 Conclusions and Prospects	324
References	325

XXII *Silene alba* (White Campion): In Vitro Culture
and Benzyloquinoline Alkaloids Biotransformation

C. VIEL, F. BISTER-MIEL, and J. L. GUIGNARD (With 9 Figures)

1 Botany and Phytochemistry of <i>Silene alba</i>	326
2 In Vitro Approaches	327
3 Summary and Conclusions	334
References	337

XXIII *Solanum dulcamara* L. (Bittersweet):
Accumulation of Steroidal Alkaloids in the Plant
and in Different in Vitro Systems
A. EHMKE and U. EILERT (With 4 Figures)

1 Introduction	339
2 In Vitro Culture	344
3 Conclusion	348
4 Protocol	349
References	350

XXIV *Solanum glaucophyllum* Desf. (Duraznillo Blanco):
In Vitro Culture and the Production of Steroidal Secondary
Metabolites
M. WEISSENBERG, A. LEVY, and R. H. WASSERMAN
(With 4 Figures)

1 Introduction	353
2 In Vitro Approaches	362
3 Conclusions and Prospects	367
4 Protocol	367
References	368

XXV *Strophanthus* Species (Members of the Dogbane Family):
In Vitro Culture and the Production of Cardenolides
K. KAWAGUCHI, M. HIROTANI, and T. FURUYA
(With 10 Figures)

1 Introduction	371
2 In Vitro Approaches	374
3 Conclusions and Prospects	382
4 Protocol	384
References	384

XXVI *Tagetes* spp. (Marigolds): In Vitro Culture
and the Production of Thiophenes
H. BRETELER and D. H. KETEL (With 11 Figures)

1 Introduction	387
2 Characteristics of <i>Tagetes</i> Plants	388
3 Thiophenes	389
4 In Vitro Culture of <i>Tagetes</i>	392
5 Conclusions and Prospects	408
References	409

XXVII *Thymus vulgaris* L. (Thyme): In Vitro Culture
and the Production of Secondary Metabolites

H. TAMURA, T. TAKEBAYASHI, and H. SUGISAWA

(With 5 Figures)

1 Introduction	413
2 Production of Secondary Metabolites in <i>T. vulgaris</i> L.	414
3 Conclusions and Prospects	424
References	425

XXVIII *Uncaria elliptica*: In Vitro Culture
and the Production of Epicatechin and Rutin

N. P. DAS and K. H. LAW (With 8 Figures)

1 Introduction	427
2 Plant Propagation	429
3 Production of Rutin and (—)-Epicatechin	432
4 Establishment of Callus Culture and the Production of Rutin and Epicatechin	432
5 Summary and Conclusion	439
References	439

Subject Index	441
