## I Genetic Engineering and In Vitro Manipulation of Plant Cells – Technical Advances

Y.P.S. BAJAJ

1 Introduction .....	1
2 Somatic Hybrids and Cybrids .....	1
3 Recombinant DNA Technology and Transformation .....	4
4 Uptake and Incorporation of Organelles, Viruses, Bacteria, and Fungi by Protoplasts .....	9
5 Newer Techniques for Genetic Engineering .....	13
6 Conclusions .....	16
References .....	17

## II Genetic Manipulation: Generative Versus Somatic

J. SYBENGA

1 Introduction .....	26
2 The Structure of a Plant Breeding Program .....	27
3 Construction and Isolation of a Desired Genotype .....	28
4 Reproductive Systems .....	41
5 Conclusions and Prospects .....	48
References .....	48

## III Uptake and Integration of Exogenous DNA in Plants

P.F. LURQUIN (With 5 Figures)

1 Introduction .....	54
2 A Brief History of Plant Genetic Transformation .....	55
3 Uptake of Purified DNA by Seeds, Seedlings, and Plant Cells .....	56
4 Uptake of Purified DNA by Gametes .....	57
5 Uptake of Purified DNA by Protoplasts .....	59
6 Nature of Expression Vectors Used in Direct Gene Transfer ..	64
7 Integration of Foreign DNA Taken up by Protoplasts .....	66
8 Present Status and Conclusions .....	68
References .....	70

#### IV DNA Recombinants and Transformation of Agricultural Crops

J. SIMPSON and L. HERRERA-ESTRELLA (With 6 Figures)

1 Introduction .....	75
2 The <i>Agrobacterium</i> System .....	75
3 Vector Systems .....	79
4 Transfer and Expression of Foreign DNA in Plant Cells .....	82
5 Use of Selectable Reporter Genes in Plant Cells .....	83
6 Plant Transformation Systems .....	85
7 Use of Reverse Genetics Techniques to Study Plant Gene Regulation .....	88
8 Variability of Transformed Plants .....	92
9 Conclusions .....	93
References .....	93

#### V Genetically Transformed Maize (*Zea mays* L.) Plants from Protoplasts

C. A. RHODES, D. A. PIERCE, I. J. METTLER,  
D. MASCARENHAS, and J. J. DETMER (With 4 Figures)

1 Introduction .....	99
2 Methodology and Experimental Results .....	99
3 Summary and Conclusions .....	105
References .....	105

#### VI Protoplast Culture and Transformation Studies on Rice

S. HASEZAWA, A. BABA, and K. SYŌNO (With 3 Figures)

1 Introduction .....	107
2 Isolation and Culture of Rice Protoplasts .....	108
3 Recent Progress in Culture and Regeneration of Rice Protoplasts (1984-1987) .....	111
4 Transformation of Rice Protoplasts by Spheroplast Treatment .....	113
5 Introduction and Expression of Foreign Genes in Gramineae Plants .....	117
6 Summary and Conclusion .....	119
References .....	120

#### VII Transformation in Potato

M. YAMAMOTO (With 7 Figures)

1 Introduction .....	122
2 Transformation Studies in Potato for Resistance to <i>Phytophthora infestans</i> .....	123
3 Techniques and Material Used for Transformation Studies .....	124
4 Results .....	127
5 Other Studies on Transformation in Potato .....	135
6 Significance of the Work and Its Prospects .....	136
References .....	137

## VIII Transformation in Cotton

E. FIROOZABADY (With 5 Figures)

1 General Account .....	140
2 Transformation and Plant Regeneration in Cotton .....	144
3 Conclusions and Prospects .....	151
References .....	153

IX Transformation in *Populus* spp.

J.C. SELLMER and B.H. MCCOWN (With 8 Figures)

1 Introduction .....	155
2 Genetic Transformation of <i>Populus</i> .....	157
3 Conclusions .....	170
References .....	171

X Transformation in *Vinca rosea* L.: An Example of Spheroplast Method for Gene Transfer

S. HASEZAWA and K. SYONO (With 5 Figures)

1 Introduction .....	173
2 Techniques .....	174
3 Technical Problems in the Spheroplast Method .....	181
4 Mechanism of Introduction of Spheroplasts into Protoplasts ..	182
5 Introduction of <i>E. coli</i> Spheroplasts into Protoplasts .....	184
6 Summary and Conclusion .....	186
References .....	186

XI Transformation in *Hyoscyamus*

D. HANOLD (With 2 Figures)

1 Introduction .....	188
2 In Vitro Transformation of Protoplast-Derived <i>H. muticus</i> Cells by <i>A. tumefaciens</i> .....	189
3 Summary and Conclusions .....	194
References .....	195

## XII Genetic Manipulation in Brassica

F. TRAIL, C. RICHARDS, and F.-S. WU (With 5 Figures)

1 Introduction .....	197
2 Protoplast Fusion .....	198
3 Transformation .....	208
4 Conclusion .....	212
References .....	213

## XIII Direct Gene Transfer in Protoplasts of

*Nicotiana plumbaginifolia*F. SALA, M. L. MARCHESI, S. CASTIGLIONE, J. PASZKOWSKI,  
M. SAUL, I. POTRYKUS, and I. NEGRUTIU (With 2 Figures)

1 Introduction .....	217
2 A Simple Chemical Procedure for the Stable Transformation of <i>Nicotiana plumbaginifolia</i> Protoplasts .....	218
3 Stable Transformation of <i>Nicotiana plumbaginifolia</i> by Electroporation .....	224
4 Transient Expression of a Foreign Gene Introduced by a PEG Treatment into <i>Nicotiana plumbaginifolia</i> Protoplasts .....	225
5 Discussion .....	226
References .....	227

XIV Microinjection of Cells and Protoplasts: Integration of  
Foreign DNA

A. CROSSWAY (With 3 Figures)

1 Introduction .....	228
2 Techniques .....	228
3 Uptake and Integration of DNA .....	232
4 Future Directions .....	237
5 Protocol .....	238
References .....	239

XV Electrofusion: The Technique and Its Application to  
Somatic Hybridization

G. W. BATES (With 7 Figures)

1 Introduction .....	241
2 Biophysics of Electrofusion .....	243
3 Application of Electrofusion to Plant Protoplasts .....	246
4 Conclusions and Prospects .....	254
References .....	255

XVI Versatile Apparatuses for Electrogene Mapping,  
Electrophoresis and Electrofusion

K. YOSHIDA and T. KONDO (With 12 Figures)

1 Introduction .....	257
2 Fundamental Theory and Physical Parameters in Electrophoresis .....	257
3 Versatile Apparatus for Electrophoresis Including Isoelectrofocusing .....	259
4 Highly Simplified Horizontal Electrophoretic Apparatus Including a Simple Power Supply .....	261
5 Protoplast Fusion by Electric Impulse Generated by the Simple Power Supply .....	264

6 Construction of a Versatile Apparatus for PFGE and Its Possible Application to "Electrogene Mapping" .....	267
References .....	279
XVII Chloroplast Genomes as Genetic Markers	
S.D. KUNG (With 5 Figures)	
1 Introduction .....	283
2 Chloroplast Genome and Its Properties .....	284
3 Chloroplast Genomes and Their Application as Genetic Markers .....	290
4 Conclusions .....	299
References .....	300
XVIII Flow Cytometric Analysis and Sorting of Somatic Hybrid and Transformed Protoplasts	
D. W. GALBRAITH (With 12 Figures)	
1 Introduction .....	304
2 Flow Analysis and Sorting of Somatic Hybrid Protoplasts ...	306
3 Flow Analysis and Sorting of Transformed Protoplasts .....	322
4 Summary and Conclusions .....	325
References .....	326
XIX Isolation of Nuclei and Their Transplantation into Plant Protoplasts	
P.K. SAXENA and J. KING (With 4 Figures)	
1 Introduction .....	328
2 Sources of Nuclei .....	328
3 Isolation Techniques .....	329
4 Isolation and Purification of Nuclei .....	331
5 Induction of Uptake of Nuclei by Protoplasts .....	334
6 Post-Transplantation Events .....	336
7 Concluding Remarks .....	338
8 The Protocol for Isolation and Transplantation of Nuclei ...	339
References .....	340
XX Chromosome Transplantation and Applications of Flow Cytometry in Plants	
A.M.M. DE LAAT, H.A. VERHOEVEN, and K.SREE RAMULU (With 5 Figures)	
1 Introduction .....	343
2 Flow Cytometry and Its Application .....	344
3 Chromosome Isolation and Sorting .....	347
4 Characterization of Isolated, Flow-Sorted Chromosomes .....	351
5 Chromosome Transfer .....	354
6 Conclusions .....	355
References .....	356

## XXI Transfer of Mitochondria Through Protoplast Fusion

H. ICHIKAWA, L. TANNO-SUENAGA, and J. IMAMURA

(With 6 Figures)

1 Introduction .....	360
2 Selection Method of Formation of <i>Daucus</i> Cybrid Plants by Donor-Recipient Protoplast Fusion .....	364
3 Characterization of Putative Cybrid Plants .....	366
4 Restriction and Southern Analysis of mtDNA's from Carrot Cybrids .....	368
5 Conclusion .....	372
References .....	373

## XXII Incorporation of the Firefly Luciferase Gene into Plant Cells

D. W. OW and S. H. HOWELL (With 8 Figures)

1 Introduction .....	376
2 The Firefly Luciferase .....	376
3 Expression of the CaMV 35S-Luciferase Chimeric Gene .....	377
4 Spatial Pattern of Gene Expression .....	380
5 Expression of Luciferase in Cultured Cells .....	382
6 Transient Expression Studies .....	383
7 Conclusions and Prospects .....	384
8 Protocol .....	386
References .....	387

## XXIII Uptake of Viruses by Plant Protoplasts and Their Use as Transforming Agents

A. C. CASSELLS (With 7 Figures)

1 Introduction .....	388
2 Chemical Methods for the Inoculation of Plant Protoplasts ..	391
3 Electrical and Physicochemical Methods for the Inoculation of Plant Protoplasts .....	395
4 Liposome Carriers for the Inoculation of Protoplasts .....	396
5 Efficiency of Inoculation Procedure .....	397
6 Virus Uptake and Transformation .....	398
7 Summary and Conclusions .....	399
References .....	401

## XXIV Uptake of Fungal Protoplasts by Plant Protoplasts

P. T. LYNCH, S. ISAAC, and H. A. COLLIN (With 13 Figures)

1 Introduction .....	406
2 Protoplast Isolation .....	408
3 Initiation of Fusion Between Plant and Fungal Protoplasts ..	411
4 Prolonged Incubation of Plant-Fungal Protoplasts .....	418
5 The Fate of Plant-Fungal Protoplasts .....	422

6 Conclusions .....	423
7 Summary Protocol.....	424
References .....	424

## XXV Chloroplast Uptake and Genetic Complementation

K. L. GILES (With 1 Figure)

1 Chloroplast Uptake .....	428
2 The Preparation of Material .....	434
3 Genetic Complementation .....	437
4 A Summary - The Agronomic Potentials of Chloroplast Uptake .....	441
5 The Potential for the Uptake of Blue Green Algae .....	442
6 Conclusions and Prospects.....	443
References .....	443

## - XXVI Cytoplasts: Isolation and Uses

C. R. LANDGREN (With 2 Figures)

1 Introduction .....	447
2 Cytoplasts .....	448
3 Uses of Cytoplasts.....	454
4 Conclusions and Prospects.....	455
References .....	457

## XXVII Vacuoles: Isolation, Purification, and Uses

A. MARETZKI and M. THOM (With 1 Figure)

1 Introduction .....	459
2 General Methods of Isolation .....	459
3 Purification Procedures .....	464
4 Isolation and Purification Scheme .....	473
5 Uses of Vacuoles .....	474
6 Conclusions .....	475
References .....	476

## - XXVIII Miniprotoplasts and Their Use in Genetic Engineering

A. WALLIN, S. WAARA, and T. ERIKSSON (With 3 Figures)

1 Introduction .....	480
2 Types of Subprotoplasts .....	480
3 Methods for Fragmentation of Protoplasts.....	483
4 Characterization of Miniprotoplasts.....	486
5 Use and Significance of Miniprotoplasts in Cell Manipulation and Genetic Engineering .....	488
6 Summary and Conclusions .....	491
References .....	491

Subject Index .....	495
