

CONTENTS

CHAPTER 1	Micropropagation Systems	8
	Bioreactor Systems	8
	Temporary Immersion Systems	10
	Hydropriming System	16
	Fingerling Culture	17
	Inter-culture System	18
	Floral Reversion System	18
	Culture on Cellulose Acetate Membranes	19
	Comparison of Solid and Liquid Culture Systems	19
	Predicting Component Concentrations for New Micropropagation Media	23
	Skotomorphogenesis	27
	Semi-sterile Micropropagation	28
	Partial Photoautotrophic Culture	28
	Bulbil-like Body – A New Type of Somatic Embryo Structure	29
	“Axenic Hydroponic” Propagation System for <i>In Vitro</i> Plant Culture	30
	Embryogenesis or Organogenesis from the Same Explants	30
CHAPTER 2	Micropropagation Techniques	32
	Enhancement of Micropropagation by Medium Additives	32
	Effects of <i>Meta</i> -Topolins	32
	Benzothiadiazole Enhances <i>Ornithogalum</i> Micropropagation	33
	Methylglyoxal Promotes Shoot Morphogenesis	34
	Polyamines and Hydrogen Peroxide Enhance Regeneration	34
	CCC Promotes <i>In Vitro</i> Tuberization of Safed Musli	35
	Relationships Between Nutrient Concentrations and Plant Densities	36
	Effects of a Novel Aromatic Cytokinin Analogue	36
	Thidiazuron and 24-Epibrassinolide Enhance Direct Regeneration	37
	Effects of Chitosan and Thidiazuron	38
	Glutamine Enhances Regeneration of Somatic Embryos	38
	Effect of Carbohydrates Sources on Micropropagation	39
	Amino Acids Enhance Duckweed Regeneration	39
	Effects of Antibiotics on Micropropagation	40
	L-ascorbic Enhances Regeneration of Multiple Plant Species	42
	Effect of Exogenous Cobalt on Micropropagation	42
	Nanoparticles and Nanotubes Enhance Micropropagation	43
	Effect of Smoke Water and Karrikinolide on Micropropagation	44
	Plant Protein Enhances <i>Theobroma cacao</i> Regeneration	45
	Seaweed Extract Enhances Micropropagation	45
	Orange Juice Replaces Growth Regulators for Micropropagation	46
	Comparison of Picloram with 2,4-D for Regeneration of <i>Urochloa</i>	46
	Effects of Zinc Sulfate and Copper Sulfate	47
	Salicylic Acid Protets Against Drought Stress	48

Dodder Extract Enhances Regeneration of Transgenic <i>Medicago sativa</i>	49
Sodium Silicate Improves Quality of Micropropagated Anthurium	49
Sodium Nitroprusside Stimulates Growth and Shoot Regeneration	49
Effects of Exogenous Iron	50
Comparison of Various Media for Micropropagation	50
A Non-destructive Method for Measuring <i>In Vitro</i> Plant Size and Color	51
Supporting Materials	51
Gelling Agents	51
Inorganic Supporting Materials	52
Rooting of Micropropagules	53
Use of Phenol Plugs	53
Phoroglucinol and Red LED Light Improve <i>In Vitro</i> Rooting	54
Additive Effects of Auxins and Copper on Sorghum Root Induction	54
Effect of Various Light Wavelengths on Rooting of Microcuttings	55
<i>Ex Vitro</i> Rooting Reduces Micropropagation Costs	55
Carbon Nanotubes Enhance <i>In Vitro</i> Rooting	56
<i>Azospirillum brasilense</i> Enhances <i>In Vitro</i> Rooting	57
Interactive Effects of Light and Melatonin on <i>Withania</i> Root Growth	57
Bacterium Enhances Jojoba Salt Tolerance During <i>In Vitro</i> Rooting	58
Pineapple and Green Algal Extracts Enhance Rooting of Microshoots	58
Effects of Silicon on <i>In Vitro</i> Rooting of Devil's Claw	59
Enhancement of Root Formation by Hydrogen Peroxide	59
Effects of Putrescine and Polyamine Inhibitors	60
Effects of CuO Nanoparticles	60
Horticultural Rooted Mini-cutting Propagation System for Coffee	61
Effect of Oligosaccharin on <i>In Vitro</i> Rooting	61
Etiolation and Flooding of Donor Plants Enhance Rooting of Explants	62
Humic Acid Enhances <i>In Vitro</i> Rooting of Azalea Micropropagules	63
Genetic Effects on Micropropagation	63
Enhanced Regeneration Via Expression of <i>BABY BOOM</i> Gene	63
Cyclin D Genes Enhance Banana Regeneration	65
Nopaline <i>Agrobacterium tzs</i> Gene Enhances Regeneration	65
Effects of <i>gfp</i> Genes on Regeneration of Tobacco	65
Expression of Superoxide Gene Improves Regeneration and Stress Tolerance	66
Down-regulation of Genes Enhances Plant Regeneration	66
Culture Vessels	67
Effects of Different Culture Vessels on <i>Eucalyptus</i> Micropropagation	67
Effects of Culture Vessel Seals	68
Control of Sex Expression in Micropropagated Cucumbers	69
Enhancement of Micropropagation by Bacteria and Fungi	70
Mycorrhization	70
Bacterial Biotization	72
Fungal Biotization	82
Biotization by Both Bacteria and Fungi	84
Cold Temperatures and Gibberellic Acid Break Dormancy	85

Control of Hyperhydricity	86
Float Hydroculture	86
Effect of BAP and Type of Gelling Agent	86
Silver Ions and Nanoparticles Reduce Hyperhydricity	87
Effect of Increased Calcium in the Culture Medium	88
Control of Hyperhydricity with Trichloroacetate	88
Control of Hyperhydricity with Anti-ethylene Compounds	89
Reversion of Hyperhydricity	90
Effects of Radiation on Micropropagation	91
Effects of Low-dosage Gamma Rays and Methyl Jasmonate	91
Effects of Low-dosage Ultra-violet Radiation	93
Laser Irradiation Enhances Blackberry Regeneration	94
Effects of Light Quality and Intensity on Micropropagation	95
Weak Magnetic Fields Enhance <i>Genista aetnensis</i> Micropropagation	100
Effects of Stress on Micropropagation	100
Control of Browning and Shoot Necrosis	101
Comparison of Tissue Culture with Bud Manipulation for <i>Musa</i> Sucker Production	105
Micropropagation Using a Cytokini Pulse and Micrografting	105
 CHAPTER 3 Reducing Costs of Micropropagation	 107
Reducing Costs of Banana Micropropagation	107
Use of Panela	107
Use of Banana Juice	107
Low-cost Potato Micropropagation	108
Simple Inexpensive Methods for Orchid Micropropagation	109
Low-cost System for Commercial Production of Virus-free Sweet Potato	110
Low-cost Medium Supplements for Micropropagation of <i>Daphne</i> Species	111
Low-cost Pineapple Micropropagation	111
Botanical Starches as Substitutes for Agar	112
Low-cost Micropropagation of Taro	113
Low-cost Micropropagation of Banana	113
Low-cost Bromeliad Micropropagation	114
Low-cost Micropropagation of Fujian Cherry	115
Media from Brown Seaweeds Enhance Micropropagation	115
Table Sugar as a Low-cost Option for Sugarcane Micropropagation	116
 CHAPTER 4 Acclimatization and Conservation of <i>In Vitro</i> Plantlets	 118
Acclimatization	118
Low-cost Acclimatization of Sweet Potato	118
Effect of Light Intensity on Acclimatization	118
Effect of Silver Nitrate on Rooting and Acclimatization of Ginger	119
Bacteria Promote Acclimatization of Micropropagated Plantlets	119
Seismomorphogenesis: A New Approach to Acclimatization	120
Enhancement of Acclimatization by Arbuscular Mycorrhizal Fungi	121
Effects of <i>In Vitro</i> Silicon Supplementation on Acclimatization of Banana	122
Acclimatization of Coffee Micropropagules	122

Porous Substrates Enhance <i>Ex Vitro</i> Acclimatization of Micropropagules	123
Floating Hydroponic System Produces Rapid Acclimatization	123
Use of Saturated Salt Solution to Decrease Relative Humidity	124
Improvement of Acclimatization through Elevation of Carbon Dioxide Levels	125
Conservation of Micropropagated Plants	125
Slow Growth Storage	125
CHAPTER 5 Applications of Micropropagation	126
Production of Plants with Antibacterial Activity	126
Vitroplants as Sugarcane Seed Sources	126
Mutation Induction In Potato Using <i>In Vitro</i> Systems	127
<i>In Vitro</i> Flowering and Fruiting	128
Phytoremediation of Metal-contaminated Soils	129
CHAPTER 6 Patents	130
Wuschel Gene Expression Promotes Somatic Embryogenesis	130
Classifying Somatic Embryos by Their Ability to Germinate	130
Maturing and Synchronizing Conifer Somatic Embryos	130
CHAPTER 7 Micropropagation of Selected Plants	132
Orchids	132
Various Brassinolides Stimulate <i>In Vitro</i> Growth of <i>Phalaenopsis</i>	132
Effects of Media, Sucrose Concentrations and Natural Additives	133
Effects of Chitosan and Thidiazuron Combinations on Micropropagation	133
Comparison of Fertilizers as Culture Media	133
Effects of Hyaluronic Acid and Sodium Alginate on Multiplication	134
Comparison of Gelling Agents	135
Rescue of Immature Seeds Permits Orchid Hybridization	136
Recovery of Orchid Polyploids	136
High-Germinating Synthetic Seeds	137
Benzimidazole Derivatives Enhance Orchid Micropropagation	137
Douglas Fir	138
Palm Trees	139
Oil Palm	139
Desert Date Palm	140
Date Palm	140
Stevia	141
Potato	142
Comparison of Systems for Potato Microtuber Production	142
Effect of Sucrose Concentration on Potato Microtuber Formation	143
One-step, Cultivar Independent Potato Micropropagation	143
Avoidance of Calcium Deficiency Symptoms and Enhancement of Growth	144
Ultrasonication Enhances <i>In Vitro</i> Growth and Development of Potato Shoots	145
Effect of Transplant Age on Crop Yields from Micropropagated Potato Plants	145

Lily	146
Humic Acid Enhances Lily Bulblet Production	146
Effect of Ozone Treatments on <i>In Vitro</i> Propagation of <i>Lilium</i>	146
Effects of Mild Abiotic Stress	146
RESEARCH DIRECTORY	148
TAXONOMIC INDEX	165
