Preface	v
Contributors	xi

PART I. FINDING GENES IN COMPLEX PLANT SYSTEMS

1 An Improved Method for Plant BAC Library Construction <i>Meizhong Luo and Rod A. Wing</i>	3
2 Constructing Gene-Enriched Plant Genomic Libraries Using Methylation Filtration Technology <i>Pablo D. Rabinowicz</i>	21
3 RescueMu Protocols for Maize Functional Genomics <i>Manish N. Raizada</i>	37
4 Precious Cells Contain Precious Information: <i>Strategies and Pitfalls in Expression Analysis from a Few Cells</i> <i>Isabelle M. Henry and Dina F. Mandoli</i>	59
5 Combined ESTs from Plant-Microbe Interactions: <i>Using GC Counting to Determine the Species of Origin</i> <i>Edgar Huitema, Trudy A. Torto, Allison Styer,</i> <i>and Sophien Kamoun</i>	79

PART II. IN SILICO PREDICTION OF PLANT GENE FUNCTION

6 Computer Software to Find Genes in Plant Genomic DNA <i>Ramana V. Davuluri and Michael Q. Zhang</i>	87
7 Genomic Colinearity as a Tool for Plant Gene Isolation <i>Wusirika Ramakrishna and Jeffrey L. Bennetzen</i>	109
8 Using Natural Allelic Diversity to Evaluate Gene Function <i>Sherry R. Whitt and Edward S. Buckler, IV</i>	123
9 Quantitative Trait Locus Analysis as a Gene Discovery Tool <i>Michael D. McMullen</i>	141

PART III. FORWARD AND REVERSE GENETIC STRATEGIES

10 Transposon Tagging Using Activator (Ac) in Maize <i>Thomas P. Brutnell and Liza J. Conrad</i>	157
---	-----

11	T-DNA Mutagenesis in <i>Arabidopsis</i> <i>Jose M. Alonso and Anna N. Stepanova</i>	177
12	Physical and Chemical Mutagenesis <i>Andrea Kodym and Rownak Afza</i>	189
13	High-Throughput TILLING for Functional Genomics <i>Bradley J. Till, Trenton Colbert, Rachel Tompa, Linda C. Enns, Christine A. Codomo, Jessica E. Johnson, Steven H. Reynolds, Jorja G. Henikoff, Elizabeth A. Greene, Michael N. Steine, Luca Comai, and Steven Henikoff</i>	205
14	Gene and Enhancer Traps for Gene Discovery <i>Marcela Rojas-Pierce and Patricia S. Springer</i>	221
15	High-Throughput TAIL-PCR as a Tool to Identify DNA Flanking Insertions <i>Tatjana Singer and Ellen Burke</i>	241
16	Custom Knock-Outs with Hairpin RNA-Mediated Gene Silencing <i>Susan Varsha Wesley, Qing Liu, Anna Wielopolska, Geoff Ellacott, Neil Smith, Surinder Singh, and Chris Helliwell</i>	273
17	Virus-Induced Gene Silencing <i>S. P. Dinesh-Kumar, Radhamani Anandalakshmi, Rajendra Marathe, Michael Schiff, and Yule Liu</i>	287
18	Exploring the Potential of Plant RNase P as a Functional Genomics Tool <i>Dileep K. Pulukkunat, M. L. Stephen Raj, Debasis Pattanayak, Lien B. Lai, and Venkat Gopalan</i>	295
19	Maintaining Collections of Mutants for Plant Functional Genomics <i>Randy Scholl, Martin M. Sachs, and Doreen Ware</i>	311
PART IV. GAIN OF FUNCTION APPROACHES		
20	Vector Construction for Gene Overexpression as a Tool to Elucidate Gene Function <i>Alan Lloyd</i>	329
21	T-DNA Activation Tagging <i>Johan Memelink</i>	345
PART V. PHENOTYPIC PROFILING AS A TOOL TO DETERMINE GENE FUNCTION		
22	Expression Profiling Using cDNA Microarrays <i>Suling Zhao and Wesley B. Bruce</i>	365

23	Open Architecture Expression Profiling of Plant Transcriptomes and Gene Discovery Using GeneCalling® Technology Oswald R. Crasta and Otto Folkerts	381
24	Proteomics as a Functional Genomics Tool Ulrike Mathesius, Nijat Imin, Siria H. A. Natera, and Barry G. Rolfe	395
25	Metabolite Profiling as a Functional Genomics Tool Anusha P. Dias, Johnny Brown, Pierluigi Bonello, and Erich Grotewold	415
26	Growth Stage-Based Phenotypic Profiling of Plants Susanne Kjemtrup, Douglas C. Boyes, Cory Christensen, Amy J. McCaskill, Michelle Hylton, and Keith Davis	427
