<i>List of figures</i>	xi
<i>Preface</i>	xv
<i>Acknowledgements</i>	xvii
SECTION I PRINCIPLES	
Chapter 1 What is disease?	2
Introduction	2
Modes of nutrition of micro-organisms	3
Symptoms of disease	4
Koch's postulates	5
Factors affecting disease development	6
Further reading	11
Chapter 2 What causes disease?	12
Fungi as plant pathogens	12
Bacteria as plant pathogens	28
Mycoplasma-like organisms as plant pathogens	36
Viruses as plant pathogens	38
Further reading	48
Chapter 3 How does disease build up?	50
Infection and colonisation of plants	50
Infection	50
Colonisation	56
Infection and colonisation by fungi	57
Infection and colonisation by bacteria	60
Infection and colonisation by viruses	62
Epidemiology	63
Further reading	68
Chapter 4 What effect does disease have on the crop?	69
Introduction	69
Disease damage: symptoms	69

Disease damage: physiological	72
Disease assessment	77
Crop loss	80
Further reading	85
Chapter 5 How do we control disease?	86
Introduction	86
Legislative control	87
Cultural control	91
Disease resistance	97
Mechanisms of resistance in plants	112
Chemical control	116
Protectant fungicides	119
Systemic fungicides	122
Application and formulation	127
Biological control	145
Forecasting disease	150
Integrated control	153
Further reading	156
SECTION II PRACTICE	159
Introduction	159
Chapter 6 Diseases of small-grain cereals	160
Take-all	160
Eyespot	166
Sharp eyespot	171
<i>Fusarium</i> foot rot	174
Powdery mildew	180
Yellow rust (Stripe rust)	185
Brown rust	190
Black stem rust	192
Crown rust	194
Leaf and glume blotch (<i>Septoria nodorum</i>)	195
Leaf blotch (<i>Septoria tritici</i>)	199
Leaf blotch or scald (<i>Rhynchosporium</i>)	201
Net blotch	206
Barley yellow dwarf virus (BYDV)	209
Barley yellow mosaic virus (BaYMV)	212
Loose smut	215
Ergot	219
Sooty mould and black point	222
<i>Fusarium</i> ear blight (scab)	222
Further reading	224
Chapter 7 Diseases of oilseed rape	225
Clubroot	226
<i>Sclerotinia</i> stem rot	228
<i>Phoma</i> leaf spot and stem canker	232

<i>Botrytis</i> grey mould	235
Light leaf spot	236
Dark leaf and pod spot (<i>Alternaria</i>)	239
Downy mildew	242
Powdery mildew	245
Ring spot	246
White leaf spot	247
Virus diseases	248
Further reading	248
Chapter 8 Diseases of field peas and beans	250
Foot and root rot	250
Wilt	251
Stem rot	254
Downy mildew	255
Powdery mildew (peas)	256
Rust	257
<i>Ascochyta</i> leaf stem and pod spot	258
<i>Mycosphaerella</i> leaf stem and pod spot	260
Grey mould (peas)	262
Chocolate spot (beans)	262
Bacterial blight (peas)	265
Virus diseases	266
Further reading	267
Chapter 9 Diseases of potatoes	268
Potato blight (late blight)	268
Early blight (target spot)	275
Stem canker and black scurf	277
Blackleg and soft rot	280
Ring rot	283
Brown rot	284
Wart	285
Powdery scab	286
Common scab	290
Pink rot	291
Watery wound rot (leak)	292
Gangrene	293
Dry rot	296
Skin spot	297
Silver scurf	298
Leaf roll	300
Mild mosaic	302
Severe mosaic, rugose mosaic, leaf drop streak	303
Spraing (TRV)	304
Spraing (PMTV)	305
Further reading	306

Chapter 10 Diseases of sugar beet	307
Blackleg (damping-off)	307
<i>Phoma</i> diseases	308
<i>Alternaria</i> leaf spot	309
Downy mildew	310
Powdery mildew	311
<i>Cercospora</i> leaf spot	312
<i>Ramularia</i> leaf spot	313
Rust	315
Violet root rot	316
Virus yellows	316
Rhizomania	318
Further reading	319
Chapter 11 Diseases of soybeans	321
Seedling blight	321
Phytophthora root and stem rot	322
Charcoal rot	324
Brown stem rot	325
Pod and stem rot	327
Stem canker	329
Brown spot	329
Anthracnose	330
Bacterial blight	332
Virus diseases	333
Further reading	333
Chapter 12 Diseases of maize (corn)	334
Stalk rot	334
Charcoal rot	336
Stewart's disease (bacterial wilt)	337
Grey leaf spot	338
Anthracnose	339
Ear rot	340
Storage moulds	341
Virus diseases	342
Further reading	342
Chapter 13 Diseases of field vegetables	343
Vegetable brassicas	343
Carrots and parsnips	344
Onions and leeks	345
Lettuces	347
Further reading	347
<i>Glossary of plant pathological terms</i>	348
<i>Text references</i>	358
<i>Index</i>	365
