

355	Building Blocks for the Biotic Block	18
344	Organic Compounds in the Universe	20
328	Heterocyclic Nucleotides and ATP	21
323	Polynucleotides	22
300	Biochemical Synthesis	23
304	To Spur a Gene	24
309	"Blueprints of Life"	25
323	Where is Evolution Headed?	26
332	A Cell is Born	27
348	The Eukaryotic Cell	28
342	Other Way Other Places	29
381	Where is Evolution Headed?	30

Contents

<i>Preface</i>	vii
<i>A Note of Thanks</i>	ix
1 Building Blocks	1
2 Man and His World	9
3 Of Fossils and Men	14
4 In the beginning . . .	25
5 Hadean Earth	36
6 The Archean	49
7 Life on the Cellular Level	57
8 Life in the Precambrian	71
9 The Age of the Prokaryotes	89
10 The Advance of the Eucaryotes	101
11 The Architecture of Biochemical Compounds	117
12 The Molecular Basis of Life	131
13 From Blueprint to Organism	145
14 The Thread of Life	155
15 The Question of Genesis	172
16 Priming the Pump	186
17 The Driving Force	197
18 The Essentials of Life	215

19	Searching for the Building Blocks	229
20	Organic Compounds in the Universe	244
21	Nucleosides, Nucleotides and ATP	256
22	Polypeptides	267
23	Biochemical Syntax	280
24	To Split a Gene	294
25	"Particles of Life"	309
26	The Vital envelope	323
27	A Cell is Born	335
28	The Phenomenal Cell	346
29	Other Ways, Other Places	365
30	Where is Evolution Headed?	381
	<i>Suggested Books on the Origin of Life</i>	393
	<i>Books of Select Papers</i>	393
	<i>Journals on the Origin of Life</i>	394
	<i>Author Index</i>	395
	<i>Subject Index</i>	403
