

Contents

I. Introduction

1. Perspective 3
Amir Muhammed
2. Inaugural Address 7
Sadiq Hussain Qureshi
3. The World Food Crisis 11
Joseph C. Wheeler

II. Natural and Induced Genetic Variability

4. Natural Variation and Its Conservation 21
O. H. Frankel
5. On Germ Plasm Conservation with Special Reference to the Genus
Medicago 45
R. C. von Borstel and K. Lesins
6. Distribution Patterns of Indigenous Wheat Varieties in Northern
Pakistan 51
Altafur Rehman Rao
7. Useful Genetic Sources of Economic Importance and Their Utilization
in Wheat-Breeding Programs in Pakistan 67
S. A. Qureshi
8. Natural and Induced Genetic Variability in Wheat 75
A. Shakoor, N. I. Hashmi, and M. Siddique Sadiq

9. The Exploitation of Natural Genetic Variability for the Improvement of Chickpea (<i>Cicer arietinum</i> L.)	83
A. K. Auckland and K. B. Singh	
10. Synthetic Amphiploids in Breeding—Genetic and Evolutionary Studies in Wheat	97
K. A. Siddiqui	
11. The Use of Aneuploids in Studies of Genetics, Breeding, and Evolution in Wheat	103
G. Kimber	
12. Prospects and Perspectives in Mutation Breeding	117
R. D. Brock	
13. Norin-10-Based Semidwarfism	133
Michael D. Gale and Colin N. Law	
14. Evaluation of Branched Ear Derivatives of <i>Triticum aestivum</i> L.	153
Mohammad Aslam and Manzoor Ahmad Bhutta	

III. Genetic Variability and Resistance to Disease

15. Artificial Mutagenesis as an Aid in Overcoming Genetic Vulnerability of Crop Plants	163
C. F. Konzak, R. A. Nilan, and A. Kleinhofs	
16. Principal Diseases of Major Crops in Pakistan with Reference to Genetic Resistance	179
C. M. Akhtar	
17. The Measurement of Disease Severity in Cereal Smut	193
J. V. Groth, C. O. Person, and T. Ebba	
18. Stabilizing Selection for Pathogenicity in Cereal Rust Fungi	205
Mohammad Aslam and L. E. Browder	
19. Development of Disease-Resistant Chickpea	213
Abdul Ghafoor Kausar	

IV. Genetics of Quantitative Characters

20. Coadaptation in Plant Populations	223
R. W. Allard	
21. Estimation of Genotypic and Environmental Variation in Plants	233
V. A. Dragavtsev and J. Pešek	

22. Heritability Estimates from Four Generations of a Diallel Cross of Common Wheat	241
Barkat Ali Soomro	
23. Diallel Analysis of Four Agronomic Traits in Common Wheat	249
M. B. Yildirim	
24. The Use of Selection Indices in Maize (<i>Zea mays</i> L.)	259
Mohammad Yousaf	
25. Quantitative Genetically Nonequivalent Reciprocal Crosses in Cultivated Plants	269
Rustem Aksel	

V. Prospects of Breeding for Physiological Characters

26. Physiological Basis of Salt Tolerance in Plants	283
Leon Bernstein	
27. Prospects of Breeding for Salt Tolerance in Rice	291
M. Akbar, A. Shakoor, and M. S. Sajjad	
28. Plant Responses to High Temperatures	301
C. Y. Sullivan, N. V. Norcio, and J. D. Eastin	
29. Effect of High-Temperature Stress on the Growth and Seed Characteristics of Barley and Cotton	319
Riaz A. Khan	
30. Plant Genotype Effects on Nitrogen Fixation in Grasses	325
Johanna Döbereiner	

VI. Seed Storage Proteins

31. Storage Proteins in Cereals	337
Hans Doll	
32. Nutritional Aspects of Cereal Proteins	349
Bjørn O. Eggum	
33. Wheat Protein	371
V. A. Johnson	
34. Improving Protein Content and Quality in Legumes	387
D. Boulter	
35. The Variability of Free Amino Acids and Related Compounds in Legume Seeds.	397
E. A. Bell, M. Y. Qureshi, B. V. Charlwood, D. J. Pilbeam, and C. S. Evans	

36. A Genetic Approach to the Increase of Methionine Content in Legume Seeds	413
Donald E. Foard	
 VII. Genetic Manipulation in Cell Cultures	
37. Prospects for Crop Improvement through Plant Tissue Culture	417
W. R. Scowcroft	
38. Biophysical and Genetic Evidence for Transformation in Plants	431
L. Ledoux	
39. Tissue Culture Studies on <i>Amaranthus viridis</i>	439
M. Zain-ul-Abedin, Amtul Nafees, and A. Mahmood	
40. Molecular Mechanisms in Genetic Transformation	447
Jane K. Setlow	
41. Unconventional Methods in Plant Breeding	455
Georg Melchers	
Participants	469
Author Index	479
Subject Index	493
