

TABLE OF CONTENTS

Chapter 1	
The Quantitation of Aqueous Aluminum	1
Paul R. Bloom and M. Susan Erich	
Chapter 2	
Aqueous Equilibrium Data for Mononuclear Aluminum Species	39
Darrell Kirk Nordstrom and Howard M. May	
Chapter 3	
Inorganic Aluminum-Bearing Solid Phases	81
Bruce S. Hemingway and Garrison Sposito	
Chapter 4	
Aqueous Polynuclear Aluminum Species	117
Paul M. Bertsch and David R. Parker	
Chapter 5	
Environmental Chemistry of Aluminum-Organic Complexes	169
George F. Vance, Frank J. Stevenson, and Frank J. Sikora	
Chapter 6	
Surface Reactions of Aqueous Aluminum Species	221
Philip M. Jardine and Lucian W. Zelazny	
Chapter 7	
The Surface Chemistry of Aluminum Oxides and Hydroxides	271
Sabine Goldberg, James A. Davis, and John D. Hem	
Chapter 8	
The Solubility of Aluminum in Soils	333
W. L. Lindsay and P. M. Walthall	
Chapter 9	
The Chemistry of Aluminum in Surface Waters	363
Charles T. Driscoll and Kimberley M. Postek	
Chapter 10	
Aluminum Geochemistry at the Catchment Scale in Watersheds Influenced by Acidic Precipitation	419
William H. Hendershot, François Courchesne, and Dean S. Jeffries	
Index	451
