

TABLE OF CONTENTS

Preface	xvii
---------------	------

SECTION 1: FATTY ACID SYNTHESIS

The cyanobacterial desaturases: aspects of their structure and regulation <i>N. Murata, S. Higashi, H. Wada, T. Sakamoto, M.H. Macherel, D. Macherel, Y. Tasaka and D. Los</i>	3
Membrane lipid structure and plant function: what are the relationships? <i>J. Browse, J. Lightner and M. McConn</i>	9
Role of polyunsaturated fatty acids in growth and development of <i>Arabidopsis</i> <i>M. Miquel and J. Browse</i>	15
Membrane bound desaturases and hydroxylases: structure function studies <i>J. Shanklin, E. J. Whittle and B.G. Fox</i>	18
PCR-based cloning of membrane-bound desaturases <i>H. Schmidt, P. Sperling and E. Heinz</i>	21
Cytochrome b_5 and fatty acid desaturation <i>M.A. Smith, J.A. Napier, R. Browne, P.R. Shewry and A.K. Stobart</i>	24
Preparation of 12- ^3H -oleates for assay of the Δ -12 desaturase <i>D.A. Abramovitch, S.C. Tucker and G.L. Powell</i>	27
The phylogenetic relationships of the species within the section <i>Arachis</i> utilizing a fatty acid synthesis gene <i>P.L. Tate, C. Ainsworth, G. Kochert and A. Abbott</i>	30
Lipid Metabolism in <i>Mucor javanicus</i> <i>F. Jackson, G. Griffiths, M. Smith and K. Stobart</i>	33
Are diacylglycerols possible substrates for linoleate desaturation in safflower cotyledons (<i>Carthamus tinctorius</i> L.)? <i>G. Kesri-Benhassaine and P. Mazliak</i>	36
Biochemical and molecular biological characterization of acetyl-CoA carboxylases <i>B.J. Nikolau, J.J. Caffrey, T. Diez, J.Y. Huang, X.M. Shang, L.M. Weaver and E. Syrkin Wurtele</i>	39
Maize acetyl-CoEnzyme A carboxylase genes <i>B. Gengenbach, M. Egli, S. Lutz, D. Somers, J. Gronwald, D. Wyse</i>	43
Expression of an algal acetyl-CoA carboxylase gene in <i>E. coli</i> . <i>P.G. Roessler</i>	46
Biochemical and molecular biological characterization of biotinylated proteins of plants <i>J.J. Caffrey, Y. Chen, T. Diez, X. Guan, J.Y. Huang, A.L. McKean, J. Song, X.M. Shang, X. Wang, L.M. Weaver, E. Syrkin Wurtele and B.J. Nikolau</i>	49

Compartmentalization of two forms of acetyl-CoA carboxylase and plant tolerance towards herbicides	
<i>Y. Sasaki, T. Konishi and Y. Nagano</i>	52
Towards a structural understanding of enzymes of lipid biosynthesis	
<i>A.R. Slabas, C. Brough, J. Kroon, W. Simon, R. Swinhoe, D. Rice, J. Rafferty, R. Winz, A.R. Stuitje and K. Elborough</i>	55
Chemical regulation of acetyl-CoA formation and <i>de novo</i> fatty acid biosynthesis in plants	
<i>H.K. Lichtenthaler and A. Golz</i>	58
The secretive family of β -ketoacyl-ACP synthases	
<i>P. von Wettstein-Knowles</i>	61
In planta expression of cDNA encoding 3-ketoacyl-acyl carrier protein synthase III (KAS III) from spinach	
<i>H. Tai and J.G. Jaworski</i>	72
Purification, crystallization, and preliminary X-ray diffraction analysis of a condensing enzyme	
<i>J.G. Olsen, M. Siggaard-Andersen, A. Kadziola, M. Wissenbach, J.A. Chuck, S. Larsen and P. von Wettstein-Knowles</i>	75
Inhibition of fatty acid condensing enzymes in plants	
<i>A.L. Jones, J.E. Dancer and J.L. Harwood</i>	78
Powerful new antibodies to β -ketoacyl-ACP synthases	
<i>M. Wissenbach, J.A. Chuck, M. Siggaard-Andersen, J.G. Olsen and P. von Wettstein-Knowles</i>	81
Screening barley for condensing enzymes of the fatty acid synthase	
<i>M. Siggaard-Andersen, M. Wissenbach, J.A. Chuck, J.G. Olsen and P. von Wettstein-Knowles</i>	84
A molecular study on the functional relationship between prokaryotic and plant enoyl-ACP reductases	
<i>A.R. Stuitje, M.M. Kater and H.J.J. Nijkamp</i>	87
Expression of mRNA and steady-state levels of protein isoforms of enoyl-ACP reductase from <i>Brassica napus</i>	
<i>T. Fawcett, W.J. Simon, J. Shanklin and A.R. Slabas</i>	90
Soluble and membrane associated enoyl reductases in <i>Brassica napus</i>	
<i>A. Fowler, W.J. Simon, T. Fawcett and A.R. Slabas</i>	93
The purification of acetoacyl carrier protein synthase from avocado and identification of a separate acetyl CoA:ACP transacylase activity	
<i>B.S. Gulliver and A.R. Slabas</i>	96
Over-expression and study of β -ketoacyl-[ACP] reductase from <i>Brassica napus</i> seed	
<i>N.C. Thomas, T. Fawcett, J.M. Martinez-Rivas and A.R. Slabas</i>	99
Isolation and characterization of stearoyl-ACP thioesterase	
<i>D. Liu and D. Post-Beittenmiller</i>	102
A novel acyltransferase activity in an oleaginous alga	
<i>J.C. Schneider and P.G. Roessler</i>	105

Dihydrosterculate in tobacco transformed with bacterial cyclopropane fatty acid synthase	
<i>K.M. Schmid</i>	108
Modulation of the very-long-chain fatty acid (VLCFA) formation in leek	
<i>C. Cassagne, J.J. Bessoule, F. Schneider, R. Lessire, B. Sturbois, P. Moreau and C. Spinner</i>	111
Thiocarbamate action on very long chain fatty acid synthesis in plants	
<i>P.B. Barrett and J.L. Harwood</i>	115
Elongation system involved in the biosynthesis of very long chain fatty acids in <i>Brassica napus</i> seeds: characterization and solubilization	
<i>H. Imai, A. Hlousek-Radojcic, A. Matthis and J. Jaworski</i>	118
Study of the partially purified C18:1-CoA elongase from developing rapeseeds (<i>Brassica napus</i> L.)	
<i>A. Créach, F. Domergue and R. Lessire</i>	121
Characterization of the trans 2-3 enoyl-CoA reductase of the acyl-CoA elongase from leek (<i>Allium porrum</i> L.)	
<i>C. Spinner, K. Levannier, R. Lessire, J.P. Lellouche, C. Mioskovski and C. Cassagne</i>	124
Molecular cloning and characterization of genes involved in cuticular wax biosynthesis	
<i>B.J. Nikolau, X. Xu, Y. Xia, J.D. Hansen, S. Heinen, T.J. Wen, M. Delledonne and P.S. Schnable</i>	127
Design of new modulators of the very-long-chain fatty acids biosynthesis	
<i>F. Schneider, J.J. Bessoule, C. Miokowski, J.P. Lellouche, K. Levannier and C. Cassagne</i>	131

SECTION 2 : MEMBRANES

Ultrastructural features of chloroplasts from fatty acid desaturase mutants of <i>Arabidopsis thaliana</i>	
<i>P.J. Quinn</i>	135
Electron microscopy and X-ray scattering studies of the structural organisation of prolamellar bodies isolated from <i>Zea mays</i>	
<i>E. Selstam, P. Williams, T. Brain and W. Bras</i>	141
MGDG synthase of spinach chloroplast envelope: properties of the substrate binding sites	
<i>E. Maréchal, M.A. Block, J. Joyard and R. Douce</i>	144
UDP-Galactose: diacylglycerol galactosyltransferase in cucumber seedlings: purification of the enzyme and the activation by phosphatidic acid	
<i>H. Ohta, M. Shimajima, T. Arai, T. Masuda, Y. Shioi and K. Takamiya</i>	152
Detection of phosphatidylglycerol and monogalactosyl-diglyceride on peptides of photosystem I in <i>Nicotiana tabacum</i> species	
<i>A. Makewicz, A. Radunz and G.H. Schmid</i>	156

Intrachloroplastic lipid export: a general process with a key role for the chloroplast envelope in the establishment of lipid asymmetry in thylakoid membranes A. Rawyler, M. Meylan-Bettex and P.A. Siegenthaler	161
Localization of lipids and xanthophylls in inside-out vesicles from thylakoids of <i>Nicotiana tabacum</i> J. Dädelow, A. Radunz and G.H. Schmid	164
Thoughts concerning a new paradigm of the photosystem II region of the thylakoid membrane based on lipid structure and function P.A. Siegenthaler, Y. Xu, J. Smutny, M. Meylan-Bettex, J. Vallino and A. Rawyler	170
Lipid dependence of protein kinase activities in spinach chloroplast envelope membranes L. Bovet, J. Smutny and P.A. Siegenthaler	173
Polar lipid composition, photosynthetic activity and chlorophyll-protein complexes of chloroplasts from hemiparasitic angiosperms originating from temperate and tropical areas C. Tuquet and G. Sallé	176
In vivo manipulation of lipid composition in mutants of <i>Chlamydomonas reinhardtii</i> : a tool to study the roles of lipids in the biogenesis of the photosynthetic membrane A. Trémolières, G. Dubertret, H. Paulsen, S. Hobe and C. Demandre	179
Temperature and light conditions during the growth of squash seedlings influence greatly the relative content of phosphatidylglycerol molecular species in cotyledons Y. Xu and P.A. Siegenthaler	182
Investigations of pyruvate dehydrogenase in pea root plastid preparations S.A. Sparace, Q. Qi and K.F. Kleppinger-Sparace	185
Formation of autophagic vacuoles and accumulation of deacylation products of membrane polar lipids during the course of sucrose starvation in higher plant cells R. Douce, S. Aubert, R. Bligny, A.J. Dorne, E. Gout and F. Marty	188
Lipid composition of intact and functional mitochondria isolated from <i>Arabidopsis thaliana</i> suspension cultures T. Guillot-Salomon, J. Davy de Virville, I. Aaron, M.F. Alin, C. Cantrel and F. Moreau	197
Purification and characterization of carnitine acyltransferase from mung-bean (<i>Vigna radiata</i> L.) mitochondria H. Schwabedissen-Gerbling and B. Gerhardt	200
Lipid changes in mitochondria of <i>Arum italicum</i> spadix during the inflorescence development J. Bahl, C. Demandre, M. Chauveau, M.J. Alpha and J. Roussaux	203
Approach to In vivo function of nonspecific lipid transfer proteins in higher plants M. Yamada, S. Tsuboi, M. Kosone, T. Osafune, T. Ehara, C. Masuta, A. Koiwai, S. Muto, T. Yuasa, H. Ariga and M. Nishimura	206

Reconstituted lipid transfer: comparison of the regulation of acyl lipid release from endoplasmic reticulum and chloroplast envelope	
A. S. Sandelius and M. Rüntfors	210
Isolation of transfer vesicles issued from the endoplasmic reticulum of leek seedlings	
B. Sturbois, P. Moreau, O. Loreau and C. Cassagne	213
Biosynthesis of an unusual phospholipid, <i>N</i> -Acyl-phosphatidyl-ethanolamine in cotton cotyledons	
T.S. Moore, Jr and K.D. Chapman	216
Regulation of phosphatidylinositol 4-kinase by protein phosphorylation: A plasma membrane-cytoskeletal connection	
W.F. Boss, W. Yang, Z. Tan and M. Cho	219
Do the maize phosphatidylinositolphosphate-kinase discriminate between the phosphatidylinositol molecular species?	
A. Chicha, C. Demandre, A.M. Justin and P. Mazliak	224
On the presence of glycosylphosphatidylinositol-anchored proteins in plants	
G.A. Thompson Jr., N. Morita, H. Okuyama, Y. Kim, Y.G. Ko and C.Y. Hung	227
Pathway of synthesis of 3- and 4-phosphorylated phosphoinositides in stomatal guard cells of <i>Commelina communis</i> L.	
P. Parmar and C.A. Brearley	230
Solubilization and selectivity of the phosphatidylinositol-synthase from etiolated maize coleoptile microsomes	
A.M. Justin, A. Hmyene, J.C. Kader and P. Mazliak	233
Lipids in brown algae: identification of a new phospholipid and the use of the betaine lipid DGTA as a taxonomic marker	
W. Eichenberger, D.G. Müller and C.E. Schmid	236
The transbilayer distribution of glucosylceramide in plant plasma membrane	
D.V. Lynch and A.J. Phinney	239
Changes in the synthesis of unusual glycolipids during somatic embryogenesis in <i>Daucus carota</i>	
L.A. Quesada-Allué, B. Cadenas, K. Hagelin, F. Guzzo and F. LoSchiavo	242
ATPase and H ⁺ transport activities in microsomes from cotyledons of sunflower (<i>Helianthus annuus</i> L.) genotypes differing in oleic acid content	
A. Chica, M. Pilar Rodríguez-Rosales, N. Ferrol and J.P. Donaire	247
Lipid modulation of the activity of tonoplast H ⁺ -ATPase purified from mung bean (<i>Vigna radiata</i> L.) hypocotyls	
K. Kasamo and H. Yamanishi	250

SECTION 3 : LIPID OXIDATION AND DEGRADATION

Developmental implications of membrane hyperfluidity induced by lipid peroxidation and subsequent jasmonate formation	
Y.Y. Leshem	255

Estimation of free and bound MDA in plant extracts: comparison between spectrophotometric and HPLC methods	
<i>D. Hagège, S. Feutry, M. Krsnik-Rasol, D. Poder and J.F. Menez</i>	259
Oxylipins in plants: the peroxygenase pathway	
<i>E. Blée and F. Schuber</i>	262
Peroxisomal catabolism of linoleic acid	
<i>B. Gerhardt and A. Kleiter</i>	265
Fatty acid oxidation enzymes of the yeast <i>Candida cloacae</i>	
<i>M.A. West, J. Hill, M. Watson, W. Simon, N. Lindner, J. Casey and A.R. Slabas</i>	268
α -oxidation of fatty acids in cucumber	
<i>G.I. Andersen, P. Baardseth, E. Slinde, J. Bremer and A. Nilsson</i>	271
Physiologically active products of plant lipoxygenase pathway	
<i>A. Grechkin</i>	274
Temporal and organ-specific expression of enzymes of fatty acid hydroperoxide metabolism in developing sunflower seedlings	
<i>B.A. Vick</i>	280
Formation of ketols of 9-hydroxylinolenic acid in corn seeds	
<i>T.E. Gafarova and D.M. Tyshkivsky</i>	283
Cloning of an elicitor-induced lipoxygenase cDNA from tobacco	
<i>C. Véronési, J. Fournier, M. Rickauer, M.L. Pouénat and M.T. Esquerré-Tugayé</i>	286
Enzyme assisted formation of fatty acid hydroperoxide	
<i>G.J. Piazza and M.B. Medina</i>	289
Jasmonate- and stress-induced lipoxygenase forms in barley leaf segments (<i>Hordeum vulgare</i> CV. <i>Salome</i>)	
<i>I. Feussner, J. Ziegler, O. Miersch and C. Wasternack</i>	292
Hydroperoxide dehydrase in barley grains	
<i>N. Schmitt and A.C. Douma</i>	295
Isolation and characterization of a lipase from <i>Botrytis cinerea</i>	
<i>P. Commenil, L. Belingheri and M. Sancholle</i>	298
Induction of lipase activity in germinating barley	
<i>J.C. Heistek and A.C. Douma</i>	301
Properties of a purified soluble MGDG-acyl-hydrolase from cowpea (<i>Vigna unguiculata</i> L.) leaves	
<i>A.T. Pham Thi, Y. Sahseh, H. Roy-Macauley, A. d'Arcy-Lameta and Y. Zuily-Fodil</i>	304
A phospholipase activity causes changes in phospholipid composition of tobacco cells in response to fungal elicitors	
<i>S. Roy, M.L. Pouénat, C. Caumont, M.C. Prévost and M.T. Esquerré-Tugayé</i>	307
Phospholipase activities associated with the tonoplast from <i>Acer pseudoplatanus</i> cells: identification of a phospholipase A ₁ activity	
<i>E. Tavernier and A. Pugin</i>	310
<i>In vitro</i> phospholipase activity of capsicein, an α -elicitor secreted by a phytopathogenic fungus, <i>Phytophthora capsici</i>	
<i>C. Nespoulous, C. Mella, J.C. Huet and J.C. Pernollet</i>	313

Possible role of membrane lipid degradation in tulip bulb scale micropropagation <i>M.W.P.C. van Rossum and L.H.W. van der Plas</i>	316
--	-----

SECTION 4 : ISOPRENOIDS

Some new aspects of isoprenoid biosynthesis in plants <i>T.J. Bach</i>	321
Molecular cloning of radish acetoacetyl-coenzyme A thiolase by genetic complementation of a yeast mutant <i>K.U. Vollack and T.J. Bach</i>	335
Plant sterol biosynthesis-identification of the component reactions of oxidative sterol C4-demethylation <i>A. Rahier, M. Taton and S. Pascal</i>	338
Plant sterol biosynthesis. Cytochrome P-450 obtusifolios 14 α -Methyl demethylase a key enzymatic step <i>M. Taton, F. Salmon and A. Rahier</i>	341
Effect of salinity on the sterol content of soybean root membranes <i>A. Surjus, M. Durand and Y. Sauvaire</i>	344
Regulation and functions of sterols in yeast <i>L.W. Parks</i>	347
Relative squalene synthase activity and its kinetic properties in different yeast strains <i>C. Socaciu, M. Faye, M.L. Dumas, G. Pauly and M. Gleizes</i>	350
Jasmonic acid induced changes in carotenoid levels and zeaxanthin cycle performance <i>M. Betz, C. Schindler, J. Schwender and H.K. Lichtenthaler</i>	353
Purification and characterization of abietadiene cyclase of maritime pine (<i>Pinus pinaster</i> Ait.) <i>J. Walter, B. Laprébande, A. Laferrière, Haoua and A. Saint-Guily</i>	356

SECTION 5 : LIPIDS AND ENVIRONMENT

Recent environmental concerns and lipid metabolism <i>J.L. Harwood</i>	361
Is the membrane the primary target in the biological perception of temperature? Effect of membrane physical state on the expression of stress-defence genes <i>L. Vigh, D.A. Los, N. Murata, A. Glatz, E. Kovács and I. Horváth</i>	369
Temperature regulation of desaturation of fatty acids in cytosolic and chloroplastic glycerolipids <i>J.P. Williams, M.U. Khan and D. Wong</i>	372
Acyl turnover in triacylglycerols. Its role in the regulation by temperature of the 18:1/18:2 ratio in sunflower seeds <i>M. Mancha, C. Sarmiento and R. Garcés</i>	378

Correlation studies between chilling sensitivity of stored basil leaves and their composition of membrane lipids	
<i>S. Meir, L. Twito and S. Philosoph-Hadas</i>	381
Wheat lipid accumulation is altered by the "greenhouse effect"	
<i>M. Williams, P.R. Shewry and J.L. Harwood</i>	384
Effects of a heat shock on the molecular species of rape polar lipids	
<i>F. Aid, C. Demandre, G. Kesri-Benhassaine and P. Mazliak</i>	387
The effect of temperature and abscisic acid on the level of erucic acid in the oil of oilseed rape	
<i>J.A. Wilmer, J. P.F.G. Helsper and L.H.W. v.d. Plas</i>	390
Effects of pesticides on the biosynthesis and accumulation of lipophilic components in plant cuticles	
<i>H. Albertin, F. Nurit, J. Favre-Bonvin, P. Ravanel and M. Tissut</i>	393
Influence of chloroacetamide herbicides on <i>Scenedesmus acutus</i> fatty acids. A central role of oleic acid?	
<i>M. Couderchet, F. Kring and P. Böger</i>	408
Lipid metabolism in <i>Scenedesmus acutus</i> wild type and metazachlor tolerant cell lines	
<i>M. Couderchet, J. Rumbolz and P. Böger</i>	411
Effects of powdery mildew on the leaf surface waxes of wheat	
<i>A. Almiñana and D. Lösel</i>	414
Effects of hexaconazole on the plasma membranes of <i>Alternaria brassicicola</i>	
<i>M. Ihabi, L. Belingheri and M. Sancholle</i>	417
Effects of proline and glycine betaine on lipid peroxidation in rape (<i>Brassica napus</i> L.) leaves submitted to water stress	
<i>A. Aziz, D. Rolin and F. Larher</i>	420
Salt effect on lipid metabolism of rape seeds during germination	
<i>D. Ben Miled-Daoud and A. Chérif</i>	423
Effects of drought stress on enzymatic breakdown of galactolipids in cowpea (<i>Vigna unguiculata</i> L.) leaves	
<i>P. Campos and A.T. Pham Thi</i>	426
Salt stress effect on polar lipid metabolism of olive leaves	
<i>M. Zarrouk, W. Seggat-Dakhma and A. Chérif</i>	429
Adaptation of potato cells to low water potential and changes in membrane fatty acid composition and fluidity	
<i>A. Leone, M. Tucci, S. Grillo, A. Costa and L. Vigh</i>	432
Sodium chloride effect on the evolution of fatty acid composition in developing rape seedlings	
<i>F. Najine, B. Marzouk and A. Cherif</i>	435
Effect of salt on [14 C] acetate incorporation in developing cotton seeds	
<i>A. Smaoui and A. Cherif</i>	438
Comparison of fatty acid composition of phospholipids in normal and habituated sugar beet cell lines	
<i>S. Feutry, D. Poder, M. Krsnik-Rasol, J.F. Menez and D. Hagège</i>	441

Infection by arbuscular mycorrhizal fungus <i>Glomus mosseae</i> of leek plants (<i>Allium porum</i> L.): effect on lipids A. Grandmougin-Ferjani, Y. Dalpé, E. Veignie, M.A. Hartmann, C. Rafin and M. Sancholle	444
Increasing the content of polyunsaturated fatty acids in <i>Spirulina platensis</i> and <i>Porphyridium cruentum</i> by variation of light and nutrients M. Springer, N. Rogova, H. Franke and O. Pulz	447
Influence of summer episodes of atmospheric O ₃ on Δ^5 and Δ^9 fatty acids in lipids of norway spruce during winter hardening A.R. Wellburn, D.C. Robinson, A. Thompson and I.D. Leith	450
Gibberellic acid analogs modification of epicuticular wax R.E. Wilkinson and J.J. Roberts	453
Formation of ω -feruloyloxypalmitic acid and tetradecyl ferulate in enzymic extracts of wound-healing potato tuber discs (<i>Solanum tuberosum</i> L.) S. Lotfy, F. Javelle and J. Negrel	456
The leaf acyl lipid composition of plants exposed to moderately enhanced levels of ozone : species, age and dose dependence A.S. Sandelius, A.S. Carlsson, H. Pleijel, L.I. Hellgren, G. Wallin and G. Selldén	459
<i>In vivo</i> and <i>in vitro</i> inhibition of fatty acid desaturation by the antibiotic cerulenin Z. Cohen, I. Khozina, D. Shiran, H.A. Norman and P. Pillai	462

SECTION 6 : OIL SEED AND GENE TECHNOLOGY

Structure of plant enoyl-ACP reductase genes G.J. de Boer, M.M. Kater, A.R. Wagenaar, T. Fawcett, T.R. Slabas, H.J.J. Nijkamp and A.R. Stuitje	467
Decanoyl-acyl carrier protein inhibits the β -ketoacyl-acyl carrier protein synthase III in <i>Cuphea lanceolata</i> seed extract R. Schuch, F.M. Brück, M. Brummel and F. Spener	470
Studies in the optimisation of the overexpression of β -ketoacyl-ACP synthase I from barley and <i>Escherichia coli</i> J.A. Chuck, M. Wissenbach, M. Siggaard-Andersen, J.G. Olsen and P. von Wettstein-Knowles	473
Transgenic expression of bacterial fas components in rapeseed I.I.G.S. Verwoert, E.C. Verbree, K.H. van der Linden, H.J.J. Nijkamp and A.R. Stuitje	476
Synthesis of starch and fatty acids by plastids isolated from developing embryos of oilseed rape S. Rawsthorne and F. Kang	479
Identification of a low density membrane fraction involved in storage triacylglycerol synthesis D.J. Lacey and M.J. Hills	482
Molecular characterization of aconitase in etiolated pumpkin cotyledons M. Hayashi, L. De Bellis and M. Nishimura	485

Effects of the constitutive expression of a medium chain acyl-ACP thioesterase from California Bay on leaf lipid composition of transformed <i>Brassica</i> plants <i>V. Eccleston and J. Ohlrogge</i>	488
Cloning and expression in <i>Escherichia coli</i> of a novel thioesterase from <i>Arabidopsis thaliana</i> specific for long chain acyl-acyl carrier proteins <i>P. Dörmann, T. A. Voelker and J.B. Ohlrogge</i>	49
Expression of acyl-[ACP] thioesterase in <i>Cuphea lanceolata</i> and in transgenic rapeseed <i>N. Martini, J. Schell and R. Töpfer</i>	495
Genetic and biochemical studies of medium chain fatty acid synthesis in <i>Cuphea</i> <i>M. Slabaugh, J. Leonard, G. Huestis, J. Crane and S. Knapp</i>	499
Utilization of laurate by the Kennedy pathway in developing seeds of <i>Brassica napus</i> expressing a 12:0-ACP thioesterase gene <i>H.M. Davies, C.A. Eriqat and T.R. Hayes</i>	503
Reducing polyunsaturation in oils of transgenic canola and soybean <i>W.D. Hitz, N.S. Yadav, R.S. Reiter, C.J. Mauvais and A.J. Kinney</i>	506
Solubilization of 12- and 6-desaturases from seeds of borage microsomes <i>A.M. Galle, A. Oursel, M. Joseph and J.C. Kader</i>	509
Sunflower mutants with altered fatty acid composition in the seed oil <i>R. Garcés, J. Osorio, M. Mancha and J.M. Fernández-Martínez</i>	512
Direct genetic selection of a maize cDNA clone that encodes a protein which has similarities to fatty-acyltransferases <i>A.P. Brown, J. Coleman, A.M. Tommey, M.D. Watson and A.R. Slabas</i>	515
Interaction of photoreactive substrate analogs with diacylglycerol acyltransferase from microspore-derived embryos of oilseed rape <i>R. Weselake, K. Pomeroy, T. Furukawa-Stoffer, D. Little and R. Rajasekharan</i> ...	518
Acyltransferase activities specific to sn-2 in low linolenic acid rapeseed lines <i>C. Jourdain and M. Renard</i>	521
Photoaffinity labeling of lysophosphatidylcholine acyltransferase from developing castor bean endosperm <i>R. Rajasekharan and H. Roychowdhury</i>	525
Role of cholinephosphotransferase and diacylglycerol acyltransferase in channeling unusual fatty acids into the triacylglycerol pool during oilseed development <i>G. Vogel and J. Browse</i>	528
cDNA clones from <i>Limnanthes douglasii</i> encoding an erucoyl-CoA specific 1-acylglycerol-3-phosphate acyltransferase <i>C. Hanke, G. Peterek, F.P. Wolter and M. Frentzen</i>	531
Cloning of a cDNA coding for a glycerol-3-phosphate dehydrogenase from <i>Cuphea lanceolata</i> <i>L. Hausmann, J. Schell and R. Töpfer</i>	534
Characterization of the diacylglycerol acyl-transferase in the lipid body fraction from an oleaginous fungus <i>Y. Kamisaka</i>	537

Identification of jojoba seed acyl-CoA: Fatty alcohol acyltransferase by photolabeling with acyl-CoA analog	
<i>J.M. Shockey, J.D. Kemp and R. Rajasekharan</i>	540
Acyl CoA binding proteins in <i>Brassica napus</i> L.: Amino acid sequence, genes and expression	
<i>M.J. Hills, R. Dann, D. Lydiate and A. Sharpe</i>	543
An uncommon pathway in the biosynthesis of acetylenic fatty acids in mosses	
<i>P. Beutelmann and S. Stymne</i>	546
Germinating rapeseed as biocatalyst for lipolytic and synthetic reactions	
<i>K.D. Mukherjee and I. Jachmanián</i>	549
Lipolytic activity isolated from sunflower (<i>Helianthus annuus</i> L.) germinating seed spherosomes	
<i>S. Bahri, A. Oursel, J. Ben Hamida and J.C. Kader</i>	552
Factors affecting lipase activity in the oil palm (<i>Elaeis guineensis</i>) mesocarp	
<i>R. Sambanthamurthi, O.K. Cheang and S. H. Parman</i>	555
Are oleosins only associated with oil bodies from desiccation tolerant plant tissues?	
<i>D.J. Murphy, J.H.E. Ross and H.W. Pritchard</i>	558
Oil body proteins	
<i>M. Millichip, F. Jackson, G. Griffiths, A. Tatham, A. Drake, P. Shewry and K. Stobart</i>	561
Olive oil biogenesis. Contribution of fruit photosynthesis	
<i>J. Sánchez</i>	564
Comparative study of oil composition in four olive varieties	
<i>M. Kachouri, M. M'Sallem, M. Zarrouk and A. Cherif</i>	567
Towards genetic engineering of oil palm (<i>Elaeis guineensis</i> Jacq.)	
<i>S.C. Cheah, R. Sambanthamurthi, S.N.A. Abdullah, A. Othman, M.A.A. Manaf, U.S. Ramli and A.P.G. Kadir</i>	570
Neutral lipids of mature and developing sea buckthorn (<i>Hippophaë rhamnoides</i> L.) fruits	
<i>A.G. Vereshchagin and V.D. Tsydendambaev</i>	573
Authors index	579
Subject index	585
