

Contents

Preface xi

- 1 Introduction to Protein Engineering 1**
Jeffrey L. Cleland, Andrew J. S. Jones, and Charles S. Craik
- 2 Protein Conformation 33**
Fred E. Cohen and David P. Hearst
- 3 Predicting the Conformation of Proteins from Sequence Data 71**
Steven A. Benner
- 4 Expression of Proteins in Bacteria 101**
George Georgiou
- 5 Expression of Heterologous Gene Products in Yeast 129**
Sergio Pichuanes, Anton Tien Nguyen, and Alex Franzusoff
- 6 Expression of Engineered Proteins in Mammalian Cell Culture 163**
Tina Etcheverry
- 7 Insect Cell Expression Technology 183**
Verne A. Luckow
- 8 Protein Expression in *Xenopus* Oocytes 219**
Margaret Habash Marino
- 9 Mutational Effects on Protein Folding: Methodology, Application, and Interpretation 249**
Mark R. Hurle and C. Robert Matthews
- 10 Successful Protein Folding on an Industrial Scale 283**
Rainer Rudolph

- 11 Protein Engineering for Stability 299**
Scott Braxton
- 12 Structure–Function Relationships for Protein Design 317**
Craig S. Gibbs
- 13 Bacteriophage Display Libraries 349**
Jill Winter
- 14 Design of Metalloproteins 369**
Homme W. Hellinga
- 15 Engineering Therapeutic Antibodies 399**
Robert F. Kelley
- 16 Site-Directed Mutagenesis of Tissue-Type Plasminogen Activator 435**
Bruce A. Keyt, Nicholas F. Paoni, and William F. Bennett
- 17 Site-Directed Drug Design 467**
Diane DeCamp, Richard Ogden, Irwin Kuntz, and Charles S. Craik
- Index 507**
