Preface	v
Introduction	
E. Quagliariello	xi
THE GENETIC FUNCTION OF ANIMAL MITOCHONDRIAL DNA	
Structure and evolution of animal mitochondrial DNA	
I.B. Dawid, C.K. Klukas, S. Ohi, J.L. Ramirez and W.B. Upholt	3
The behavior of cytoplasmic genes in mammalian cells	
C.L. Bunn, D.C. Wallace and J.M. Eisenstadt	15
Mapping of the transcription products of rat-liver mitochondria by hybridization	
C. Saccone, G. Pepe, P. Cantatore, P. Terpstra and A.M. Kroon	27
Informational content and gene mapping of mitochondrial DNA from HeLa cells	
G. Attardi, F. Amalric, E. Ching, P. Costantino, R. Gelfand and D. Lynch	37
The expression of mouse mitochondrial DNA in prokaryotic and eukaryotic cells	
D.A. Clayton	47
THE GENETIC FUNCTION OF KINETOPLAST DNA	
The structure of kinetoplast DNA	
P. Borst, A.H. Fairlamb, F. Fase-Fowler, J.H.J. Hoeijmakers and P.O. Weislogel	59
Evolution of kinetoplast DNA	
M. Steinert, S. Van Assel, P. Borst and B.A. Newton	71
Kinetoplast DNA from <i>Leishmania tarentolae</i>	
S.S. Price, D.C. DiMaio and P.T. Englund	83
The kinetoplast DNA from a <i>Trypanosoma cruzi</i> strain resistant to ethidium bromide	
G. Riou	95
THE GENETIC FUNCTION OF MITOCHONDRIAL DNA IN LOWER EUKARYOTES	
Physical mapping of mitochondrial DNA from <i>Neurospora crassa</i>	
U. Bernard and H. Kuntzel	105
Restriction fragment map of <i>Neurospora crassa</i> mitochondrial DNA	
P. Terpstra, M. Holtrop and A.M. Kroon	111
Mitochondrial DNA from <i>Paramecium aurelia</i>	
D.J. Cummings, J.M. Goddard and R.A. Maki	119

The genetic control of mitochondrial ribosomal proteins in <i>Paramecium</i> A. Tait, J.K.C. Knowles and J.C. Hardy	131
The duplications and chewed ends of <i>Tetrahymena</i> mitochondrial DNA R.W. Goldbach, P. Borst, A.C. Arnberg and E.F.J. Van Bruggen	137
Joint control of cytochromes a and b by a unique mitochondrial DNA region comprising four genetic loci Z. Kotylak and P.P. Slonimski	143
Resolution of the mitochondrial genome A. Tzagoloff, F. Foury and A. Akai	155
Mitochondrial genes involved in the determination of mitochondrial membrane proteins D.J. Groot Obbink, R.M. Hall, A.W. Linnane, H.B. Lukins, B.C. Monk, T.W. Spithill and M.K. Trembath	163
Genetic and physical characterization of a segment of the mitochondrial DNA involved in the control of genetic recombination B. Dujon and F. Michel	175
The mitochondrial genome of yeast: Organization, evolution and the petite mutation G. Bernardi, A. Prunell, G. Fonty, H. Kopecka and F. Strauss	185
Electrophoretic variants of yeast mitochondrial translation products: Genetic and biochemical analysis M.G. Douglas, E. Kendrick, P. Boulikas, P. Perlman and R.A. Butow	199
Mitochondrial role in the induction of sugar utilization in <i>Saccharomyces cerevisiae</i> I.H. Evans and D. Wilkie	209
Transcription and organization of yeast mitochondrial DNA M. Rabinowitz, S. Jakovcic, N. Martin, F. Hendler, A. Halbreich, A. Lewin and R. Morimoto	219
Physical mapping of genetic markers in the yeast mitochondrial genome P. Nagley, K.S. Sriprakash, J. Rytka, K.B. Choo, M.K. Trembath, H.B. Lukins and A.W. Linnane	231
Localization of some mitochondrial mutations in relation to transfer and ribosomal RNA genes in <i>Saccharomyces cerevisiae</i> M. Bolotin-Fukuhara, G. Faye and H. Fukuhara	243
Localization of seven gene loci on a circular map of the mitochondrial genome of <i>Saccharomyces cerevisiae</i> R.J. Schweyen, B. Weiss-Brummer, B. Backhaus, and F. Kaudewitz	251
The organization of genes in yeast mitochondrial DNA J.P.M. Sanders, C. Heyting, A. DiFranco, P. Borst and P.P. Slonimski	259

The physical mapping of some genetic markers in the 21S ribosomal region of the mitochondrial DNA of yeast C. Heyting and J.P.M. Sanders	273
Coupled transcription-translation of yeast mitochondrial DNA <i>in vitro</i> as a means of gene identification and mapping A.F.M. Moorman and L.A. Grivell	281
Restriction enzyme analysis and physical mapping of mitochondrial DNA from petite mutants, carrying a genetic marker for oligomycin or paromomycin resistance A.DiFranco, J.P.M. Sanders, C. Heyting, P. Borst and P.P. Slonimski	291
tRNA in mitochondria from <i>Saccharomyces cerevisiae</i> grown in different physiological conditions: Hybridization on mitochondrial DNA fragments and import of cytoplasmic species G. Baldacci, C. Falcone, L. Frontali, G. Macino and C. Palleschi	305
Electron microscopic analysis of mitochondrial DNA sequences from petite and grande yeast J. Locker and M. Rabinowitz	313
Fine structure map constructed by electron microscopy and restriction endonucleases of the mitochondrial DNA segment conferring erythromycin resistance J. Lazowska, C. Jacq, S. Cebrat and P.P. Slonimski	325
Evidence of discrete size fragments of mitochondrial DNA complexed with a specific nuclease from <i>S.cerevisiae</i> C.V. Lusena and A. Bernardi	337
Concluding remarks A.M. Kroon and C. Saccone	343
Author index	349
Subject index	351
