Contributors	ix
Foreword	
Nina Strömberg Allen	xi
Preface	
Annette W. Coleman and Lynda J. Goff	xiii

Section I. Cytoskeleton Components

Diatoms and the Mechanism of Anaphase Spindle Elongation	
Kent McDonald and W. Zacheus Cande	3
Algal Centrin: Calcium-Sensitive Contractile Organelles	
Jeffrey L. Salisbury	19
Linkage Group XIX in <i>Chlamydomonas reinhardtii</i> (Chlorophyceae): Genetic Analysis of Basal Body Function and Assembly	
Susan K. Dutcher	39
The Interaction of Actin and Myosin in Cytoplasmic Movement	
John W. La Claire II	55
Maintenance and Dynamic Changes of Cytoplasmic Organization Controlled by Cytoskeletal Assemblies in <i>Acetabularia</i> (Chlorophyceae)	
Diedrik Menzel and Christine Elsner-Menzel	71
The Role of the Cytoskeleton During the Assembly, Secretion and Deployment of Scales and Spines	
Richard Wetherbee, Anthony Koutoulis, and Peter L. Beech	93

Section II. Morphogenesis and Differentiation

Polarization in <i>Fucus</i> (Phaeophyceae) Zygotes: Investigations of the Role of Calcium, Microfilaments and Cell Wall	
Ralph S. Quatrano and Darryl L. Kropf	111
Cellular Morphogenesis in the Filamentous Red Alga <i>Griffithsia</i>	
Susan D. Waaland	121
Cell Differentiation in <i>Volvox carteri</i> (Chlorophyceae): The Use of Mutants in Understanding Patterns and Control	
Richard C. Starr and Lothar Jaenicke	135

Cellular Morphogenesis: The Desmid (Chlorophyceae) System	
Oswald Kiermayer and Ursula Meindl	149

Section III. Cellular Recognition

Recognition Proteins of <i>Chlamydomonas reinhardtii</i> (Chlorophyceae)	
Ursula W. Goodenough and W. Steven Adair	171
Modulation of Sexual Agglutinability in <i>Chlamydomonas eugametos</i> (Chlorophyceae)	
H. van den Ende, A.M. Tomson, R. Demets, and R. Kooijman	187
The Role of Pheromones in Sexual Reproduction of Brown Algae	
Dieter G. Müller	201
The <i>Chlamydomonas</i> (Chlorophyceae) Eye as a Model of Cellular Structure, Intracellular Signaling and Rhodopsin Activation	
Kenneth W. Foster and Jureepan Saranak	215

Section IV. Model Systems for Photoreactions and Rhythms

Algae as Model Systems in the Study of Photosynthetic Membrane Organization	
Kenneth R. Miller and Laurel Spear-Bernstein	233
<i>Porphyridium</i> as a Red Algal Model for Photosynthesis Studies	
Elisabeth Gantt	249
Molecular Analyses of Complementary Chromatic Adaptation and the Biosynthesis of a Phycobilisome	
Arthur R. Grossman, Lamont K. Anderson, P.B. Conley, and P.G. Lemaux	269
Circadian Rhythms in Dinoflagellates as Experimental Systems for Investigating Circadian Timing	
Beatrice M. Sweeney	289
Poster Presentations	303
Participants	311
Index	321
