Contributors	xi
Preface	
Winslow R. Briggs	xv
Acknowledgments	xvii
Introduction	
Winslow R. Briggs	xix
My Association With Stacy French	
Govindjee	1
Photosynthesis From the Molecule to the Biosphere: A Challenge for Integration	
Charles Barry Osmond	5
Photosynthesis and Plant Productivity—Scaling to the Biosphere	
H.A. Mooney and C.B. Field	19
Some Viewpoints on Photosynthetic Response and Adaptation to Environmental Stress	
Olle Björkman	45
Photosystem II and Oxygen Evolution	
Norio Murata and Mitsue Miyao	59
Photosystem II: From a Femtosecond to a Millisecond	
Govindjee, and M.R. Wasielewski	71
Temperature-Dependent Steady-State and Picosecond Kinetic Fluorescence Measurements of a Photosystem I Preparation From Spinach	
Ishita Mukerji and Kenneth Sauer	105
Biophysical Studies of Photosynthesis: Capture and Storage of Quantum Energy	
J. Ames	123
Bacterial Reaction Centers	
William W. Parson	135

viii / Contents

Rubisco: Mechanisms and Their Possible Constraints on Substrate Specificity	
John Pierce	149
Dynamic Molecular Organization of the Plant Thylakoid Membrane	
Jan M. Anderson and William W. Thomson	161
The Allocation of Protein Nitrogen in the Photosynthetic Apparatus: Costs, Consequences, and Control	
John R. Evans and Jeffrey R. Seemann	183
Productive Structure of a Leaf	
Ichiro Terashima	207
Canopy Photosynthesis	
John M. Norman and Wayne Polley	227
The "CO₂ Concentrating Mechanism" of Cyanobacteria: Physiological, Molecular, and Theoretical Studies	
Aaron Kaplan, Devorah Friedberg, Rakefet Schwarz, Rina Ariel, Julie Seijffers, and Leonora Reinhold	243
Light-Regulation and the Pea RBCS-3A Gene	
Cris Kuhlmeier and Nam-Hai Chua	257
Control of Chloroplast Gene Expression During Plant Development and Environmental Changes	
Wilhelm Gruissem, Xing-wang Deng, and John Tonkyn	269
Illumination of Eight-Day-Old Dark-Grown Barley Seedlings Activates Chloroplast Protein Synthesis: Evidence for Regulation of Translation Initiation	
Patricia E. Gamble, Robert R. Klein, and John E. Mullet	285
The Assembly of Ribulose Biphosphate Carboxylase in <i>Escherichia coli</i> and Isolated Chloroplasts	
Anthony A. Gatenby, Pierre Goloubinoff, Thomas H. Lubben, and George H. Lorimer	299
Nitrogen-Dependent Biogenesis of Chlorophyll-Protein Complexes	
F. Gerald Plumley, Susan E. Douglas, Alison Branagan Switzer, and Gregory W. Schmidt	311
The Plastid Envelope Membranes and Their Contribution to Plastid Membrane Biogenesis	
Jacques Joyard, Maryse A. Block, Claude Alban, and Roland Douce ..	331
A New Hypothesis for the Mechanism of Protein Translocation Into Chloroplasts	
Kenneth Keegstra	347
Regulation in Photosynthesis	
Ulrich Heber	359
Regulation of Excitation Energy Distribution by State Transitions	
John Biggins, Doug Bruce, and Pamela B. Gibbs	363

Light Stress and Photoprotection Related to the Carotenoid Zeaxanthin in Higher Plants	
Barbara Demmig-Adams, Klaus Winter, Almuth Krüger, and Franz-Christian Czygan	375
Interactions Between Electron Transport and Carbon Assimilation: Regulation of Light-Harvesting and Photochemistry	
Peter Horton	393
Regulation of Photosynthetic CO₂ Assimilation During Sunflecks	
Robert W. Pearcy	407
Function of the Ferredoxin/Thioredoxin System in Reductive Activation of Target Enzymes of Isolated Intact Chloroplasts	
N.A. Crawford, M. Droux, N.S. Kosower, and B.B. Buchanan	425
Calcium Regulation of Localized to Delocalized Proton Gradient Switching in Thylakoids: The 8kDa CF₀ Subunit Is Part of the Ca⁺² Gating Structure	
Gisela G. Chiang and Richard A. Dilley	437
Biochemical Studies of Photosynthesis: From CO₂ to Sucrose	
Richard C. Leegood	457
Limitation to CO₂ Fixation by Photosynthetic Processes	
Ian E. Woodrow	475
Index	503
