Preface	
Israel Zelitch	xiii
Photograph of Thomas Burr Osborne	xvi
Acknowledgments	xvii

Section I. Historical Perspective

Thomas Burr Osborne and Protein Chemistry	
Joseph S. Fruton	1

Section II. Chloroplast Metabolism

Relationship Between Light-Driven Electron Transport, Carbon Reduction and Carbon Oxidation in Photosynthesis	
Ulrich Heber, Ulrich Schreiber, Katharina Siebke, and Karl-Josef Dietz ..	17
Phosphate Translocators in Plastids	
Hans W. Heldt, Ulf-Ingo Flügge, Sieglinde Borchert, Gabriele Brückner, and Juni-ichi Ohnishi.	39
Sucrose, Pyrophosphate, and Plastid Metabolism in Relation to Cellular Communication	
Shi-Jean Sung, Tadeusz Loboda, and Clanton C. Black.	55

Section III. Partitioning of Carbon Products

Regulation of Starch and Sucrose Synthesis in Tobacco Species. Studies of <i>Nicotiana tabacum</i> and a Mutant of <i>N. sylvestris</i> Deficient in Plastid Phosphoglucomutase	
Kenneth R. Hanson.	69
Regulation of the Partitioning of Products of Photosynthesis	
Steven C. Huber, Joan A. Huber, and Kenneth R. Hanson	85

Section IV. Chloroplast Genetics and Molecular Biology

Chloroplast Mutations From Protoplast-Derived Cultures of Tobacco	
Neil A. McHale	103

Molecular Developmental Biology of Ribulose Bisphosphate Carboxylase	
Lawrence Bogorad and Steven R. Rodermel	119

Towards Manipulation of Plastid Genes in Higher Plants	
Pal Maliga, Benjamin Moll, and Zora Svab	133

Section V. Photosynthetic Electron Transport

Regulation of Light Harvesting and Electron Transport in Photosystem II	
Peter Horton, Graham Noctor, and Debbie Rees	145

Control of Photophosphorylation by Regulation of the Coupling Factor	
Donald R. Ort, Patricia Grandoni, Adriana Ortiz-Lopez, and Roger P. Hangarter	159

Section VI. The C₄ Pathway

Regulation of the C₄ Pathway of Photosynthesis	
Gerald E. Edwards and Maurice S.B. Ku	175

Section VII. Ribulose Bisphosphate Carboxylase

Control of Photosynthesis by Ribulose Bisphosphate Carboxylase Activity	
Richard G. Jensen	191

Biochemistry of Ribulose Bisphosphate Carboxylase	
Alfred J. Keys	207

The In Vitro Mutagenesis of Ribulose Bisphosphate Carboxylase	
Steven Gutteridge and George H. Lorimer	225

Section VIII. Photorespiration and Photosynthesis

Oxygen-Resistant Photosynthesis in Tobacco Plants Selected for Oxygen-Resistant Growth	
Israel Zelitch	239

Biochemistry and Developmental Biology of the C-2 Cycle	
David J. Oliver and Younghee Kim	253

Plant Catalases: Demonstration and Characteristics of a Catalase Isozyme With Enhanced Peroxidatic Activity	
Evelyn A. Havir	271

The RuBP Carboxylase/Oxygenase Model and Photorespiration in C₃ Leaves	
Richard B. Peterson	285

Genetic Regulation of the Photorespiratory Pathway	
Peter J. Lea and Ray D. Blackwell	301

Section IX. Dark Respiration and Photosynthesis

Light Enhanced Dark Respiration	
D. Stokes, D.A. Walker, C.P.L. Grof, and G.G.R. Seaton	319

Chloroplast Respiration	
Martin Gibbs, Kenneth O. Willeford, Kiran Jit K. Ahluwalia, Zoltán Gombos, and Sung-Soo Jun	339

Regulation of the Cyanide-Resistant Respiratory Pathway	
James N. Siedow	355

Section X. Photosynthesis and Crop Yield

The Effects of Awns and Spike Size on Source and Sink Limitation to Yield in Wheat (<i>Triticum aestivum</i> L.)	
Richard K. Kiyomoto	367

Photosynthesis and Crop Productivity	
John D. Mahon	379

Prospects for Genetically Increasing the Photosynthetic Capacity of Crops	
Roger B. Austin	395

Index	411
