

CONTENTS

<i>Editors' preface</i>	<i>page ix</i>
L. FERENCZY Microbial protoplast fusion	1
DAVID SHERRATT Gene manipulation <i>in vitro</i>	35
KENNETH N. TIMMIS Methods for the manipulation of DNA <i>in vitro</i>	49
ANDREW A. TRAVERS, CSABA KARI AND HILARY A. F. MACE Transcriptional regulation by bacterial RNA polymerase	111
HERBERT N. ARST, JR Aspects of the control of gene expression in fungi	131
RAY DIXON, CHRISTINA KENNEDY AND MIKE MERRICK Genetic control of nitrogen fixation	161
D. A. HOPWOOD Genetic studies of antibiotics and other secondary metabolites	187
P. HELENA MÄKELÄ AND B. A. D. STOCKER Genetics of the bacterial cell surface	219
JOHN S. PARKINSON Genetics of bacterial chemotaxis	265
PAUL NURSE Genetic analysis of the cell cycle	291
LUCILLE SHAPIRO, PERRY NISEN AND BERT ELY Genetic analysis of the differentiating bacterium: <i>Caulobacter crescentus</i>	317

WERNER K. MAAS	
Genetics of bacterial virulence	341
P. R. DAY	
Genetics of pathogenic fungi	361
S. G. BARTLETT, J. E. BOYNTON AND N. W. GILLHAM	
Genetics of photosynthesis and the chloroplast	379
<i>Index</i>	413
