<i>Foreword</i>	xv
<i>Preface</i>	xvii
<i>Acknowledgments</i>	xix

## Section I

### Mass Spectrometry of Peptides and Proteins

- The Use of a Volatile N-Terminal Degradation Reagent for Rapid, High-Sensitivity Sequence Analysis of Peptides by Generation of Sequence Ladders 3  
*M. Bartlet-Jones, W. A. Jeffery, H. F. Hansen, and D. J. C. Pappin*
- Investigation of Polyethylene Membranes as Potential Sample Supports for Linking SDS-PAGE with MALDI-TOF MS for the Mass Measurement of Proteins 13  
*James A. Blackledge and Anthony J. Alexander*
- Comparison of ESI-MS, LSIMS, and MALDI-TOF-MS for the Primary Structure Analysis of a Monoclonal Antibody 21  
*Leticia Cano, Kristine M. Swiderek, and John E. Shively*
- MS Based Scanning Methodologies Applied to *Conus* Venom 31  
*A. Grey Craig, Wolfgang H. Fischer, Jean E. Rivier, J. Michael McIntosh, and William R. Gray*
- Direct Coupling of an Automated 2-Dimensional Microcolumn Affinity Chromatography-Capillary HPLC System with Mass Spectrometry for Biomolecule Analysis 39  
*D. B. Kassel, T. G. Consler, M. Shalaby, P. Sekhri, N. Gordon, and T. Nadler*
- Edman Degradation and MALDI Sequencing Enables N- and C-Terminal Sequence Analysis of Peptides 47  
*Roland Kellner, Gert Talbo, Tony Houthaeve, and Matthias Mann*

- Identification of the Amino Terminal Peptide of N-Terminally Blocked Proteins by Differential Deutero-Acetylation Using LC/MS Techniques 55  
*Craig D. Thulin and Kenneth A. Walsh*

## Section II

### Analysis of Posttranslational Processing Events

- HPAEC-PAD Analysis of Monoclonal Antibody Glycosylation 65  
*Jeffrey Rohrer, Jim Thayer, Nebojsa Avdalovic, and Michael Weitzhandler*
- Carbohydrate Structure Characterization of Two Soluble Forms of a Ligand for the ECK Receptor Tyrosine Kinase 75  
*Christi L. Clogston, Patricia L. Derby, Robert Toso, James D. Skrine, Ming Zhang, Vann Parker, G. Michael Fox, Timothy D. Bartley, and Hsieng S. Lu*
- Characterization of Individual N- and O-Linked Glycosylation Sites Using Edman Degradation 83  
*A. A. Gooley, N. H. Packer, A. Pisano, J. W. Redmond, K. L. Williams, A. Jones, M. Loughnan, and P. F. Alewood*
- The Unexpected Presence of Hydroxylysine in Noncollagenous Proteins 91  
*Michael S. Molony, Shiaw-Lin Wu, Lene K. Keyt, and Reed J. Harris*
- Isolation of *Escherichia coli* Synthesized Recombinant Proteins that Contain  $\epsilon$ -N-Acetyllysine 99  
*Bernard N. Violand, Michael R. Schlittler, Cory Q. Lawson, James F. Kane, Ned R. Siegel, Christine E. Smith, and Kevin L. Duffin*
- LC-MS Methods for Selective Detection of Posttranslational Modifications in Proteins: Glycosylation, Phosphorylation, Sulfation, and Acylation 107  
*Mark F. Bean, Rqland S. Annan, Mark E. Hemling, Mary Mentzer, Michael J. Huddleston, and Steven A. Carr*
- Identification of Phosphorylation Sites by Edman Degradation 117  
*John D. Shannon and Jay W. Fox*
- Determination of the Disulfide Bonds of Human Macrophage Chemoattractant Protein-1 Using a Gas Phase Sequencer 125  
*Ramnath Seetharam, Jeanne I. Corman, and Shubhada M. Kamerkar*

### Section III

## Protein Sequencing and Amino Acid Analysis

- Enzymatic Digestion of PVDF-Bound Proteins in the Presence of  
Glucopyranoside Detergents: Applicability to Mass Spectrometry 135  
*Joseph Fernandez, Farzin Gharahdaghi, and Sheenah M. Mische*
- In-Gel Digestion of SDS PAGE-Separated Proteins: Observations from  
Internal Sequencing of 25 Proteins 143  
*Kenneth R. Williams and Kathryn L. Stone*
- Peptide Mapping at the 1  $\mu$ g Level: In-Gel vs. PVDF Digestion  
Techniques 153  
*Lee Anne Merewether, Christi L. Clogston, Scott D. Patterson, and  
Hsieng S. Lu*
- Enzymatic Digestion of Proteins in Zinc Chloride and Ponceau S Stained  
Gels 161  
*Sharleen Zhou and Arie Admon*
- Direct Collection Onto Zitex and PVDF for Edman Sequencing: Elimination  
of Polybrene 169  
*William A. Burkhardt, Mary B. Moyer, Wanda M. Bodnar,  
Anita M. Everson, Violeta G. Valladares, and Jerome M. Bailey*
- Minimizing N-to-O Shift in Edman Sequencing 177  
*William H. Vensel and George E. Tarr*
- The Hydrolysis Process and the Quality of Amino Acid Analysis: ABRF-  
94AAA Collaborative Trial 185  
*K. Ümit Yüksel, Thomas T. Andersen, Izydor Apostol, Jay W. Fox,  
Raymond J. Paxton, and Daniel J. Strydom*
- A New Reagent for Cleaving at Cystine Residues 193  
*C. Mitchell, L. Hinman, L. Miller, and P. C. Andrews*
- Protein Sequence Analysis Using Microbore PTH Separations 201  
*Michael F. Rohde, Christi Clogston, Lee Anne Merewether,  
Patricia Derby, and Kerry D. Nugent*

Assignment of Cysteine and Tryptophan Residues during Protein Sequencing:  
Results of ABRF-94SEQ 209

*Jay Gambee, Philip C. Andrews, Karen DeJongh, Greg Grant,  
Barbara Merrill, Sheenah Mische, and John Rush*

Automated C-Terminal Protein Sequence Analysis Using the Hewlett-Packard  
G1009A C-Terminal Protein Sequencing System 219

*Chad G. Miller, David H. Hawke, Jacqueline Tso, and  
Sherrell Early*

Applications Using an Alkylation Method for Carboxy-Terminal Protein  
Sequencing 229

*MeriLisa Bozzini, Jindong Zhao, Pau-Miau Yuan, Doreen Ciolek,  
Yu-Ching Pan, John Horton, Daniel R. Marshak, and  
Victoria L. Boyd*

C-Terminal Sequence Analysis of Polypeptides Containing C-Terminal  
Proline 239

*Jerome M. Bailey, Oanh Tu, Gilbert Issai, and John E. Shively*

## Section IV

### Peptide and Protein Separations and Other Methods

High Sensitivity Detection of Tryptic Digests Using Derivatization and  
Fluorescence Detection 251

*Steven A. Cohen, Igor Mechnikov, and Patricia Young*

Reagents for Rapid Reduction of Disulfide Bonds in Proteins 259

*Rajeeva Singh and George M. Whitesides*

Strategies for the Removal of Ionic and Nonionic Detergents from Protein  
and Peptide Mixtures for On- and Off-Line Liquid Chromatography Mass  
Spectrometry (LCMS) 267

*Kristine M. Swiderek, Michael L. Klein, Stanley A. Hefta,  
and John E. Shively*

Online Preparation of Complex Biological Samples prior to Analysis by  
HPLC, LC/MS, and/or Protein Sequencing 277

*Ken Stoney and Kerry Nugent*

Methods for the Purification and Characterization of Calcium-Binding Proteins  
from Retina 285

*Arthur S. Polans, Krzysztof Palczewski, Wojciech A. Gorczyca, and  
John W. Crabb*

Evidence for the Presence of  $\alpha$ -Bungarotoxin in Venom-Derived  
 $\kappa$ -Bungarotoxin 293

*James J. Fiordalisi and Gregory A. Grant*

Progress in the Development of Solvent and Chromatography Systems  
Appropriate for Bitopic Membrane Proteins 301

*Song-Jae Kil, Lisa M. Oleksa, Geoffrey C. Landis,  
and Charles R. Sanders II*

Rapid Separation of Proteins and Peptides Using Conventional Silica-  
Based Supports: Identification of 2-D Gel Proteins following In-Gel  
Proteolysis 311

*Robert L. Moritz, James Eddes, Hong Ji, Gavin E. Reid, and  
Richard J. Simpson*

## Section V

### Mutagenesis and Protein Design

Studying  $\alpha$ -Helix and  $\beta$ -Sheet Formation in Small Proteins 323

*Catherine K. Smith, Mary Munson, and Lynne Regan*

Circular Permutation of RNase T1 through PCR Based Site-Directed  
Mutagenesis 333

*Jane M. Kuo, Leisha S. Mullins, James B. Garrett,  
and Frank M. Raushel*

*E. coli*-Expressed Human Neurotrophin-3 Characterization of a C-Terminal  
Extended Product 341

*John O. Hui, Shi-Yuan Meng, Vishwanatham Katta, Larry Tsai,  
Michael F. Rohde, and Mitsuru Haniu*

Spectral Enhancement of Recombinant Proteins with Tryptophan Analogs:  
The Soluble Domain of Human Tissue Factor 349

*C. A. Hasselbacher, R. Rusinova, E. Rusinova, and  
J. B. Alexander Ross*

Utilization of Partial Reactions, Side Reactions, and Chemical Rescue to Analyze Site-Directed Mutants of Ribulose 1,5-Bisphosphate (RuBP) Carboxylase/Oxygenase (Rubisco) 357

*Mark R. Harpel, Engin H. Serpersu, and Fred C. Hartman*

Probing the Roles of Conserved Histidine Residues in  $\beta$ -Galactosidase (*E. coli*) Using Site Directed Mutagenesis and Transition State Analog Inhibition 365

*Nathan J. Roth, Katherine Y. N. Wong, and Reuben E. Huber*

## Section VI

### Analysis of Protein Interactions

Rapid *in Vitro* Assembly of Class I Major Histocompatibility Complex 375

*Nicholas J. Papadopoulos, James C. Sacchettini, Stanley G. Nathenson, and Ruth Hogue Angeletti*

Peptide Models of bZIP Proteins: Quantitative Analysis of DNA Affinity and Specificity 385

*Steven J. Metallo and Alanna Schepartz*

Applying Affinity Coelectrophoresis to the Study of Nonspecific, DNA Binding Peptides 393

*Michael L. Nedved and Gregory R. Moe*

Investigating Calmodulin-Target Sequence Interactions Using Mutant Proteins and Synthetic Target Peptides 401

*Wendy A. Findlay, Stephen R. Martin, and Peter M. Bayley*

Interactions of Bacterial Cell-Surface Proteins with Antibodies: A Versatile Set of Protein-Protein Interactions 409

*Gordon C. K. Roberts, Lu-Yun Lian, Igor L. Barsukov, Jeremy P. Derrick, Koichi Kato, and Yoji Arata*

Studies of Cytokine-Cytokine Receptor Interactions: Influence of Ligand Dimerization 417

*Larry D. Ward, Geoffrey J. Howlett, Robert L. Moritz, Annet Hammacher, Kiyoshi Yasukawa, and Richard J. Simpson*

New High Sensitivity Sedimentation Methods: Application to the Analysis of the Assembly of Bacteriophage P22 427

*Walter F. Stafford III, Sen Liu, and Peter E. Prevelige, Jr.*

## Section VII

### Protein Conformation and Folding

Cyanogen as a Conformational Probe 435

*Richard A. Day, Amy Hignite, and Warren E. Gooden*

Evaluation of Interactions between Residues in  $\alpha$ -Helices by Exhaustive Conformational Search 443

*Trevor P. Creamer, Rajgopal Srinivasan, and George D. Rose*

Design, Synthesis, and Characterization of a Water-Soluble  $\beta$ -Sheet Peptide 451

*David S. Wishart, Les H. Kondejewski, Paul D. Semchuk, Cyril M. Kay, Robert S. Hodges, and Brian D. Sykes*

Automated Analysis of Protein Folding 459

*Richard A. Smith, Jack Henkin, and Thomas F. Holzman*

HSP70 Protein Complexes: Their Characterization by Size-Exclusion HPLC 467

*Daniel R. Palleros, Li Shi, Katherine Reid, and Anthony Fink*

Methods for Collecting and Analyzing Attenuated Total Reflectance FTIR Spectra of Proteins in Solution 475

*Keith A. Oberg and Anthony L. Fink*

## Section VIII

### NMR Analysis of Peptides and Proteins

$^{19}\text{F}$  NMR Studies of Fluorinated Sugars Binding to the Glucose and Galactose Receptor 487

*Linda A. Luck*

Heteronuclear Gradient-Enhanced NMR for the Study of 20–30 kDa Proteins:  
Application to Human Carbonic Anhydrase II 495

*Ronald A. Venters and Leonard D. Spicer*

Toward the Solution Structure of Large (>30 kDa) Proteins and  
Macromolecular Complexes 503

*Cheryl H. Arrowsmith, Weontae Lee, Matthew Revington,  
Toshio Yamazaki, and Lewis E. Kay*

Solution Structures of Horse Ferro- and Ferricytochrome c Using 2D and 3D  
<sup>1</sup>H NMR and Restrained Simulated Annealing 511

*Phoebe X. Qi, Ernesto J. Fuentes, Robert A. Beckman,  
Deena L. Di Stefano, and A. Joshua Wand*

NMR Relaxation Methods to Study Ligand–Receptor Interactions 521

*David W. Hoyt, Jian-Jun Wang, and Brian D. Sykes*

## Section IX Peptide Synthesis

Application of 2-Chlorotrityl Resin: Simultaneous Synthesis of Peptides  
Which Differ in the C-Termini 531

*Anita L. Hong, Tin T. Le, and Trung Phan*

Correlation of Cleavage Techniques with Side-Reactions following Solid-  
Phase Peptide Synthesis 539

*Gregg B. Fields, Ruth H. Angeletti, Lynda F. Bonewald,  
William T. Moore, Alan J. Smith, John T. Stults, and  
Lynn C. Williams*

Protein Synthesis on a Solid Support Using Fragment Condensation 547

*Siegfried Brandtner and Christian Griesinger*

Characterization of a Side Reaction Using Stepwise Detection in Peptide  
Synthesis with Fmoc Chemistry 555

*Yan Yang, William V. Sweeney, Susanna Thörnqvist, Klaus Schneider,  
Brian T. Chait, and James P. Tam*

## Erratum

High Sensitivity Peptide Sequence Analysis Using *in Situ* Proteolysis on High Retention PVDF Membranes and a Biphasic Reaction Column Sequencer 565

*Sandra Best, David F. Reim, Jacek Mozdzanowski,  
and David W. Speicher*

Index 575
