Preface	v
List of Contributors	xi
Systematics Association Publications	xv
MODES OF GENOME EVOLUTION	
Selfish DNA after Fourteen Months <i>W. Ford Doolittle</i>	3
Transposable DNA Sequences in Eukaryotes. <i>David J. Finnegan, Barbara H. Will, Alexei A. Bayev, Anne M. Bowcock and Lesley Brown</i>	29
Sequencing and Manipulating Highly Repeated DNA <i>George L. Gabor Miklos</i>	41
Changes to Genomic DNA in Methotrexate-resistant Cells <i>Christopher J. Bostock and Christopher Tyler-Smith</i>	69
Conserved and Divergent Sequences of Bovine Satellite DNAs <i>Gérard Philippe Roizès and Michel Pagès</i>	95
Evolution of Primate DNA Organization <i>David Gillespie, Larry Donehower and David Strayer</i>	113
Conserved Sex-associated Repeated DNA Sequences in Vertebrates <i>K.W. Jones and L. Singh</i>	135

EVOLUTION OF GENE FAMILIES

- Evolution of Globin Genes 157
A.J. Jeffreys
- The Sea Urchin Actin Genes, and a Speculation on the
Evolutionary Significance of Small Gene Families 177
*Eric H. Davidson, Terry L. Thomas, Richard H.
Scheller and Roy J. Britten*
- On the Generation of Antibody Diversity and On
Computer Aided Analysis of V Kappa Gene Sequences 193
*H.G. Zachau, J. Höchtel, P.S. Neumaier, M. Pech
and H. Schnell*
- Human Antibody Genes: Evolutionary Comparisons as a
Guide to Function and the Mechanisms of DNA
Rearrangement 205
*T.H. Rabbitts, D.L. Bentley, A. Forster, Celia
P. Milstein and G. Matthysens*
- Gene Expression in Phylogenetically Polyploid
Organisms 219
M. Leipoldt and J. Schmidtke

NUCLEAR ORGANIZATION AND DNA CONTENT

- Nucleotypic Basis of the Spatial Ordering of
Chromosomes in Eukaryotes and the Implications
of the Order for Genome Evolution and Phenotypic
Variation 239
Michael D. Bennett
- Repeated DNA Sequences and Nuclear Structure 263
Laura Manuelidis
- Assays of the Phenotypic Effects of Changes in DNA
Amounts 287
H. Rees, G. Jenkins, A.G. Seal and J. Hutchinson

GENOME EVOLUTION AND SPECIES SEPARATION

- Sequence Amplification, Deletion and Rearrangement:
Major Sources of Variation during Species
Divergence 301
Richard Flavell

CONTENTS

ix

Big Chromosomes and Speciation Amongst Amphibia <i>H.C. Macgregor</i>	325
--	-----

The Dynamics of Genome Evolution and Species Differentiation <i>Gabriel Dover, Stephen Brown, Enrico Coen, John Dallas, Tom Strachan and Martin Trick</i>	343
---	-----

SUMMARY

Overview - Unsolved Evolutionary Problems <i>J. Maynard Smith</i>	375
--	-----
