Section I Isolation Culture and Preservation of Protoplasts

I.1 Recent Advances in the Isolation and Culture of Protoplasts and Their Implications in Crop Improvement

Y.P.S. BAJAJ

1. Introduction	3
2. Enzymes	5
3. Viability	6
4. Agarose Plating	6
5. Regeneration of Plants from Protoplasts	8
6. Culture of Haploid Protoplasts	10
7. Protoplast Culture and Somaclonal Variation	11
8. Immobilization of Protoplasts	12
9. Cryopreservation of Protoplasts	14
10. Conclusions and Prospects	15
References	16

I.2 Enzymes for the Isolation of Protoplasts

S. ISHII (With 1 Figure)

1. Introduction	23
2. Cell Wall Compositions	24
3. Enzymes that are Effective for Isolating Protoplasts from Gramineae Tissues	25
4. Comparison of Enzymes Between Monocots and Dicots that are Effective for Isolating Protoplasts	28
5. Purification Procedures of Enzymes	29
6. Protoplasts Isolated by Purified Enzymes	30
7. Summary and Conclusion	31
References	32

I.3 Viability of Plant Protoplasts

P.B. GAHAN (With 6 Figures)

1. Introduction	34
2. Methodology	34
3. Efficacy of the Methods	43
4. Summary	46
References	47

I.4 Agarose Plating of Protoplasts and Its Applications**J.J.M. DONS and C.M. COLIJN-HOOYMANS (With 2 Figures)**

1. Introduction	50
2. Embedding of Protoplasts in Agarose	50
3. Methods for the Culture of Agarose-Embedded Protoplasts	53
4. A Survey of Literature on the Application of Agarose Plating in Protoplast Culture	56
5. Special Applications of Agarose Culture	59
6. Concluding Remarks	60
References	61

I.5 Immobilization of Plant Protoplasts**H. SCHNABL and U. ZIMMERMANN (With 11 Figures)**

1. Introduction	63
2. Immobilization in Gel Matrices	64
3. Entrapment of Cell Protoplasts in Different Matrices	70
4. Viability of Immobilized Cells and Protoplasts	72
5. Applications of Immobilized Plant Cells and Protoplasts ..	79
6. Biotransformation	87
7. Biosynthesis	87
8. Product Release	89
9. Conclusions	92
10. Protocol for the Immobilization of Protoplasts	92
References	93

I.6 Cryopreservation of Plant Protoplasts**Y.P.S. BAJAJ (With 2 Figures)**

1. Introduction	97
2. Significance of Cryopreservation of Protoplasts	98
3. Review of Work	98
4. Isolation, Freezing and Culture of Protoplasts	99
5. Survival of Somatic Hybrid Protoplasts	103
6. Summary and Conclusions	105
References	105

Section II Regeneration of Plants from Protoplasts**II.1 Regeneration of Plants from Rice Protoplasts****J. KYOZUKA, K. SHIMAMOTO and H. OGURA (With 6 Figures)**

1. Introduction	109
2. Isolation of Protoplasts	111
3. Culture of Protoplasts	112
4. Regeneration of Plants	113
5. Somaclonal Variation	115

6. Agronomic Traits of Protoplast-Derived Plants	118
7. Conclusions and Prospects	121
8. Protocol	121
References	122

II.2 Isolation and Culture of Potato Protoplasts

M. ZUBA and H. BINDING (With 2 Figures)

1. Introduction	124
2. Isolation of Protoplasts	127
3. Culture of Protoplasts	129
4. Regeneration of Plants and the Characters of Regenerated Plants	130
5. Fusion of Protoplasts	135
6. Conclusions and Prospects	137
7. Protocols	137
References	142

II.3 Isolation and Culture of *Citrus* Protoplasts

A. VARDI and E. GALUN (With 5 Figures)

1. General Account	147
2. Isolation of Protoplasts	152
3. Protoplast Culture	153
4. Embryogenesis	155
5. Regeneration of Plants	155
6. Fusion of Protoplast	156
7. Conclusions and Prospects	156
8. Protocol	157
References	158

II.4 Regeneration of Plants from *Linum* Protoplasts

M. N. BARAKAT and E. C. COCKING (With 6 Figures)

1. Economic Importance and Breeding Objectives in <i>Linum</i> ...	160
2. Source Material for Protoplast Isolation	161
3. Protoplast Isolation	161
4. Protoplast Culture	165
5. Plant Regeneration from Protoplast-Derived Callus	167
6. Protoplast Fusion	170
7. Conclusions	170
8. Protocol	170
References	171

II.5 Isolation and Culture of *Glycine* Protoplasts

C. A. NEWELL and H. T. LUU (With 2 Figures)

1. Introduction	173
2. Isolation of Protoplasts	179

3. Culture of Protoplasts	181
4. Regeneration of Plants	182
5. Fusion of Protoplasts	184
6. Miscellaneous Studies	186
7. Conclusions and Prospects	188
8. Protocol	189
References	189

II.6 Regeneration of Plants from Cabbage (*Brassica oleracea* var. *capitata*) Protoplasts

Y. YAMASHITA and K. SHIMAMOTO (With 15 Figures)

1. Introduction	193
2. Isolation of Protoplasts	194
3. Culture of Protoplasts	195
4. Regeneration of Plants	197
5. Characterization of Protoplast-Derived Plants	198
6. Protoplast Fusion	200
7. Conclusion	200
8. Protocol	201
References	204

II.7 Regeneration of Plants from Chicory (*Chicorium intybus* L.) Protoplasts

Y. CHUPEAU (With 4 Figures)

1. Introduction	206
2. Isolation of Protoplasts	208
3. Culture of Protoplasts	210
4. Regeneration of Plants	212
5. Conclusions and Prospects	215
6. Protocol	215
References	215

II.8 Regeneration of Plants from Protoplasts of Lettuce and its Wild Species

S. ENOMOTO and K. OHYAMA (With 9 Figures)

1. General Account	217
2. Isolation of Protoplasts	218
3. Protoplast Culture	220
4. Plant Regeneration	223
5. Protoplast Fusion	223
6. Conclusions and Prospects	224
7. Protocol	224
References	225

II.9 Regeneration of Plants from Protoplasts of Butterbur (*Petasites japonicus*, Fr. Schmidt)

K. YABE, T. NISHIO and K. TAKAYANAGI (With 3 Figures)

1. Introduction	227
2. Isolation of Protoplasts	228
3. Culture of Protoplasts	230
4. Regeneration of Plants	232
5. Fusion of Protoplasts	232
6. Conclusion and Prospects	233
7. Protocol	233
References	234

II.10 Isolation and Culture of Orchid Protoplasts

S. YASUGI (With 14 Figures)

1. Introduction	235
2. Isolation of Protoplasts	236
3. Culture of Protoplasts	243
4. Fusion of Protoplasts	249
5. Conclusions and Prospects	251
References	252

II.11 Regeneration of Plants from Protoplasts of *Salpiglossis*

C. J. BOYES and K. C. SINK (With 1 Figure)

1. Introduction	254
2. Isolation of Protoplasts	255
3. Culture of Protoplasts	257
4. Regeneration of Plants	259
5. Protoplast Fusion	259
6. Conclusions and Prospects	259
7. Protocol	260
References	261

II.12 Isolation and Culture of Protoplasts of

Forest Tree Species

E. G. KIRBY, M. A. CAMPBELL and R. M. PENCHEL

1. Introduction	262
2. The Status of Protoplast Research with Forest Species	262
3. Long-Range Application of Protoplast Techniques to Tree Improvement	271
References	272

Section III Protoplast Fusion and Somatic Hybridization

III.1 Fusion of Plant Protoplasts – Techniques

K. N. KAO and M. R. MICHAYLUK

1. Introduction	277
2. Methods of Fusion	277
3. Summary	285
References	286

III.2 Ultrastructural Studies of Plant Protoplast Fusion

L. C. FOWKE (With 17 Figures)

1. Introduction	289
2. Higher Plants	289
3. Algae and Higher Plants	298
4. Conclusions	300
5. Protocols	301
References	301

III.3 Symmetric Versus Asymmetric Fusion Combinations in Higher Plants

I. NEGRUTIU, A. MOURAS, Y. Y. GLEBA, V. SIDOROV, S. HINNISDAELS, Y. FAMELAER and M. JACOBS (With 3 Figures)

1. Introduction	304
2. Wide Crosses by Means of Protoplast Fusion	304
3. Spontaneous Asymmetrization of Fusion Products	306
4. Symmetric Hybrids Between Unrelated Plant Species – the Disappointment	307
5. Technical Advances with Relevance to Fusion Studies	308
6. Asymmetric Hybrides in Wide Crosses by Gamma-Fusion: Towards Chromosome Transfer and Gene Introgression	311
7. Gamma-Fusion in the <i>N. plumbaginifolia</i> System	313
8. Conclusion	316
References	317

III.4 Somatic Hybridization in Tomato

M. R. HANSON, M. A. O'CONNELL and C. VIDAIR
(With 4 Figures)

1. Introduction	320
2. Protoplast Isolation	320
3. Protoplast Culture	322
4. Regeneration of Plants	324
5. Protoplast Fusion	325
6. Conclusions and Prospects	331
7. Protocols	331
References	333

III.5 *Lycopersicon* and *Petunia* Somatic Hybrids

Z. TABAEIZADEH, C. BERGOUNIOUX and Y. DEMARLY

(With 4 Figures)

1. Introduction	336
2. Important Factors in Protoplast Culture and Somatic Hybridization of the Genus <i>Lycopersicon</i>	338
3. An Overview of Somatic Hybridization with the Genus <i>Lycopersicon</i>	343
4. Somatic Hybridization in <i>Lycopersicon</i> and <i>Petunia</i>	344
5. Conclusion and Prospects	351
6. Protocol for Isolation, Fusion and Culture of <i>Lycopersicon peruvianum</i> and <i>Petunia hybrida</i> Protoplasts	352
References	353

III.6 Somatic Hybridization in *Hyoscyamus* and *Nicotiana*

G. LAZAR (With 3 Figures)

1. Introduction	356
2. Isolation of Protoplasts	357
3. Protoplast Culture	359
4. Plant Regeneration	360
5. Somatic Hybridization	360
6. Conclusions and Prospects	365
7. Protocol	366
References	366

III.7 *Medicago* Protoplasts: Fusion, Culture and Plant Regeneration

D.M. GILMOUR, T.J. GOLDS and M.R. DAVEY

(With 16 Figures)

1. Introduction	370
2. Isolation of Protoplasts	371
3. Culture of Protoplasts	374
4. Regeneration of Plants	379
5. Fusion of Protoplasts and Culture of Heterokaryons	381
6. Miscellaneous Studies	384
7. Conclusions and Prospects	385
8. Protocol for the Isolation and Fusion of <i>Medicago</i> Seedling Cotyledon Protoplasts	386
References	387

III.8 Somatic Hybridization Between *Moricandia* and *Brassica*

K. TORIYAMA, T. KAMEYA and K. HINATA (With 4 Figures)

1. Introduction	389
2. Isolation of Protoplasts	390
3. Culture of Protoplasts	391

4. Fusion of Protoplasts and Somatic Hybridization	392
5. Protocol for the Protoplast Fusion by the Dextran Method .	395
References	395

III.9 Somatic Hybridization in *Trifolium*

J. HONKANEN and P. RYÖPPY (With 7 Figures)

1. Introduction	397
2. Isolation of Protoplasts	398
3. Culture of Protoplasts	400
4. Regeneration of Plants	402
5. Fusion of Protoplasts	403
6. Conclusions and Prospects	407
7. Protocol	407
References	407

III.10 Somatic Hybridization in Rice×Soybean

M. NIIZEKI (With 4 Figures)

1. Introduction	410
2. Isolation of Protoplasts	411
3. Culture of Protoplasts	413
4. Fusion of Protoplasts	414
5. Response to Streptomycin	421
6. Conclusion and Prospects	423
Protocol	432
References	432

Subject Index	436
