

CONTENTS

CHAPTER 1 MASS SPECTROMETRY 1

1.1	Introduction	1
1.2	Instrumentation	2
1.3	Ionization Methods	3
1.3.1	Gas-Phase Ionization Methods	3
1.3.1.1	Electron Impact Ionization	3
1.3.1.2	Chemical Ionization	3
1.3.2	Desorption Ionization Methods	4
1.3.2.1	Field Desorption Ionization	4
1.3.2.2	Fast Atom Bombardment Ionization	4
1.3.2.3	Plasma Desorption Ionization	5
1.3.2.4	Laser Desorption Ionization	6
1.3.3	Evaporative Ionization Methods	6
1.3.3.1	Thermospray Mass Spectrometry	6
1.3.3.2	Electrospray Mass Spectrometry	6
1.4	Mass Analyzers	8
1.4.1	Magnetic Sector Mass Spectrometers	8
1.4.2	Quadrupole Mass Spectrometers	9
1.4.3	Ion Trap Mass Spectrometer	10
1.4.4	Time-of-Flight Mass Spectrometer	11
1.4.5	Fourier Transform Mass Spectrometer	12
1.4.6	Tandem Mass Spectrometry	12
1.5	Interpretation of EI Mass Spectra	12
1.5.1	Recognition of the Molecular Ion Peak	13
1.5.2	Determination of a Molecular Formula	14
1.5.2.1	Unit-Mass Molecular Ion and Isotope Peaks	14
1.5.2.2	High-Resolution Molecular Ion	15
1.5.3	Use of the Molecular Formula. Index of Hydrogen Deficiency	15
1.5.4	Fragmentation	16
1.5.5	Rearrangements	18
1.6	Mass Spectra of Some Chemical Classes	18
1.6.1	Hydrocarbons	18
1.6.1.1	Saturated Hydrocarbons	18
1.6.1.2	Alkenes (Olefins)	19
1.6.1.3	Aromatic and Aralkyl Hydrocarbons	21
1.6.2	Hydroxy Compounds	22
1.6.2.1	Alcohols	22
1.6.2.2	Phenols	23
1.6.3	Ethers	24
1.6.3.1	Aliphatic Ethers (and Acetals)	24
1.6.3.2	Aromatic Ethers	25
1.6.4	Ketones	26
1.6.4.1	Aliphatic Ketones	26
1.6.4.2	Cyclic Ketones	26
1.6.4.3	Aromatic Ketones	26
1.6.5	Aldehydes	28
1.6.5.1	Aliphatic Aldehydes	28
1.6.5.2	Aromatic Aldehydes	28
1.6.6	Carboxylic Acids	28
1.6.6.1	Aliphatic Acids	28

1.6.6.2	Aromatic Acids	29
1.6.7	Carboxylic Esters	29
1.6.7.1	Aliphatic Esters	29
1.6.7.2	Benzyl and Phenyl Esters	30
1.6.7.3	Esters of Aromatic Acids	30
1.6.8	Lactones	31
1.6.9	Amines	31
1.6.9.1	Aliphatic Amines	31
1.6.9.2	Cyclic Amines	32
1.6.9.3	Aromatic Amines (Anilines)	32
1.6.10	Amides	32
1.6.10.1	Aliphatic Amides	32
1.6.10.2	Aromatic Amides	32
1.6.11	Aliphatic Nitriles	32
1.6.12	Nitro Compounds	33
1.6.12.1	Aliphatic Nitro Compounds	33
1.6.12.2	Aromatic Nitro Compounds	33
1.6.13	Aliphatic Nitrites	33
1.6.14	Aliphatic Nitrates	33
1.6.15	Sulfur Compounds	33
1.6.15.1	Aliphatic Mercaptans (Thiols)	33
1.6.15.2	Aliphatic Sulfides	34
1.6.15.3	Aliphatic Disulfides	34
1.6.16	Halogen Compounds	35
1.6.16.1	Aliphatic Chlorides	35
1.6.16.2	Aliphatic Bromides	35
1.6.16.3	Aliphatic Iodides	35
1.6.16.4	Aliphatic Fluorides	36
1.6.16.5	Benzyl Halides	37
1.6.16.6	Aromatic Halides	37
1.6.17	Heteroaromatic Compounds	37

References 37

Student Exercises 37

Appendices 46

- A** Formula Masses (FM) for Various Combinations of Carbon, Hydrogen, Nitrogen, and Oxygen 46
- B** Common Fragment Ions 67
- C** Common Fragments Lost 69

CHAPTER 2 INFRARED SPECTROSCOPY 71

2.1	Introduction	71
2.2	Theory	71
2.2.1	Coupled Interactions	74
2.2.2	Hydrogen Bonding	75
2.3	Instrumentation	76
2.3.1	Dispersion IR	76
2.3.2	Fourier Transform Infrared Spectrometer (Interferometer)	76
2.4	Sample Handling	77

2.5	Interpretation of Spectra	78
2.6	Characteristic Group Absorptions of Organic Molecules	81
2.6.1	Normal Alkanes (Paraffins)	81
2.6.1.1	C—H Stretching Vibrations	81
2.6.1.2	C—H Bending Vibrations	81
2.6.2	Branched-Chain Alkanes	82
2.6.2.1	C—H Stretching Vibrations: Tertiary C—H Groups	82
2.6.2.2	C—H Bending Vibrations: gem-Dimethyl Groups	82
2.6.3	Cyclic Alkanes	83
2.6.3.1	C—H Stretching Vibrations	83
2.6.3.2	C—H Bending Vibrations	83
2.6.4	Alkenes	83
2.6.4.1	C=C Stretching Vibrations Unconjugated Linear Alkenes	83
2.6.4.2	Alkene C—H Stretching Vibrations	84
2.6.4.3	Alkene C—H Bending Vibrations	84
2.6.5	Alkynes	84
2.6.5.1	C≡C Stretching Vibrations	84
2.6.5.2	C—H Stretching Vibrations	85
2.6.5.3	C—H Bending Vibrations	85
2.6.6	Mononuclear Aromatic Hydrocarbons	85
2.6.6.1	Out-of-Plane C—H Bending Vibrations	85
2.6.7	Polynuclear Aromatic Hydrocarbons	86
2.6.8	Polymers	86
2.6.9	Alcohols and Phenols	88
2.6.9.1	O—H Stretching Vibrations	88
2.6.9.2	C—O Stretching Vibrations	89
2.6.9.3	O—H Bending Vibrations	89
2.6.10	Ethers, Epoxides, and Peroxides	89
2.6.10.1	C—O Stretching Vibrations	89
2.6.11	Ketones	92
2.6.11.1	C=O Stretching Vibrations	92
2.6.11.2	C—C(=O)—C Stretching and Bending Vibrations	94
2.6.12	Aldehydes	94
2.6.12.1	C=O Stretching Vibrations	94
2.6.12.2	C—H Stretching Vibrations	94
2.6.13	Carboxylic Acids	94
2.6.13.1	O—H Stretching Vibrations	94
2.6.13.2	C=O Stretching Vibrations	95
2.6.13.3	C—O Stretching and O—H Bending Vibrations	95
2.6.14	Carboxylate Anion	95
2.6.15	Esters and Lactones	96
2.6.15.1	C=O Stretching Vibrations	96
2.6.15.2	C—O Stretching Vibrations	97
2.6.16	Acid Halides	97
2.6.16.1	C=O Stretching Vibrations	97
2.6.17	Carboxylic Acid Anhydrides	97
2.6.17.1	C=O Stretching Vibrations	97
2.6.17.2	C—O Stretching Vibrations	97
2.6.18	Amides and Lactams	98
2.6.18.1	N—H Stretching Vibrations	98
2.6.18.2	C=O Stretching Vibrations (Amide I Band)	99
2.6.18.3	N—H Bending Vibrations (Amide II Band)	99
2.6.18.4	Other Vibration Bands	99
2.6.18.5	C=O Stretching Vibrations of Lactams	100
2.6.19	Amines	100
2.6.19.1	N—H Stretching Vibrations	100
2.6.19.2	N—H Bending Vibrations	100
2.6.19.3	C—N Stretching Vibrations	100
2.6.20	Amine Salts	100
2.6.20.1	N—H Stretching Vibrations	100
2.6.20.2	N—H Bending Vibrations	101
2.6.21	Amino Acids and Salts of Amino Acids	101
2.6.22	Nitriles	101
2.6.23	Isonitriles (R—N≡C), Cyanates (R—O—C≡N), Isocyanates (R—N=C=O), Thiocyanates (R—S—C≡N), and Isothiocyanates (R—N=C=S)	102
2.6.24	Compounds Containing a —N=N Group	102
2.6.25	Covalent Compounds Containing Nitrogen—Oxygen Bonds	102
2.6.25.1	N—O Stretching Vibrations	102
2.6.26	Organic Sulfur Compounds	103
2.6.26.1	S—H Stretching Vibrations: Mercaptans	103
2.6.26.2	C—S and C=S Stretching Vibrations	103
2.6.27	Compounds Containing Sulfur—Oxygen Bonds	104
2.6.27.1	S=O Stretching Vibrations	104
2.6.28	Organic Halogen Compounds	105
2.6.29	Silicon Compounds	106
2.6.29.1	Si—H Vibrations	106
2.6.29.2	SiO—H and Si—O Vibrations	106
2.6.29.3	Silicon-Halogen Stretching Vibrations	106
2.6.30	Phosphorus Compounds	106
2.6.30.1	P—H, P—C, P—O, and P=O Stretching Vibrations	106
2.6.31	Heteroaromatic Compounds	107
2.6.31.1	C—H Stretching Vibrations	107
2.6.31.2	N—H Stretching Frequencies	107
2.6.31.3	Ring Stretching Vibrations (Skeletal Bands)	108
2.6.31.4	C—H Out-of-Plane Bending	108
	References	108
	Student Exercises	108
	Appendices	118
	A Transparent Regions of Solvents and Mulling Oils	118
	B Characteristic Group Absorptions	119
	C Absorptions for Alkenes	124
	D Absorptions for Phosphorus Compounds	125
	E Absorptions for Heteroaromatics	125
	CHAPTER 3 PROTON (¹H) MAGNETIC RESONANCE SPECTROSCOPY	126
3.1	Introduction	126
3.2	Theory	126
3.2.1	Magnetic Properties of Nuclei	126
3.2.2	Excitation of Spin $\frac{1}{2}$ Nuclei	127
3.2.3	Relaxation	128
3.3	Instrumentation and Sample Handling	129
3.3.1	Instrumentation	129
3.3.2	Sensitivity of NMR Experiments	130
3.3.3	Solvent Selection and Sample Handling	131
3.4	Chemical Shift	132
3.5	Spin-Spin Coupling, Multiplets, and Spin Systems	137
3.5.1	Simple and Complex First-Order Multiplets	137
3.5.2	First-Order Spin Systems	140
3.5.3	Pople Notation	140

3.5.4	Further Examples of Simple First-Order Spin Systems	141
3.5.5	Analysis of First-Order Multiplets	143
3.6	Protons on Oxygen, Nitrogen, and Sulfur Atoms: Exchangeable Protons	144
3.6.1	Protons on an Oxygen Atom	144
3.6.1.1	Alcohols	144
3.6.1.2	Water	146
3.6.1.3	Phenols	147
3.6.1.4	Enols	147
3.6.1.5	Carboxylic Acids	147
3.6.2	Protons on Nitrogen	147
3.6.3	Protons on Sulfur	149
3.6.4	Protons on or near Chlorine, Bromine, or Iodine Nuclei	149
3.7	Coupling of Protons to Other Important Nuclei (^{19}F , D (^2H), ^{31}P , ^{29}Si , and ^{13}C)	149
3.7.1	Coupling of Protons to ^{19}F	149
3.7.2	Coupling of Protons to D (^2H)	149
3.7.3	Coupling of Protons to ^{31}P	150
3.7.4	Coupling of Protons to ^{29}Si	150
3.7.5	Coupling of Protons to ^{13}C	150
3.8	Chemical Equivalence	150
3.8.1	Determination of Chemical Equivalence by Interchange Through Symmetry Operations	150
3.8.2	Determination of Chemical Equivalence by Tagging (or Substitution)	151
3.8.3	Chemical Equivalence by Rapid Interconversion of Structures	151
3.8.3.1	Keto-Enol Interconversion	151
3.8.3.2	Interconversion Around a Partial Double Bond (Restricted Rotation)	152
3.8.3.3	Interconversion Around the Single Bonds of Rings	152
3.8.3.4	Interconversion Around the Single Bonds of Chains	152
3.9	Magnetic Equivalence	154
3.10	AMX, ABX, and ABC Rigid Systems with Three Coupling Constants	155
3.11	Weakly and Strongly Coupled Systems: Virtual Coupling	156
3.11.1	Weakly Coupled Systems	156
3.11.1.1	1-Nitropropane	156
3.11.2	Strongly Coupled Systems	157
3.11.2.1	1-Hexanol	157
3.11.2.2	3-Methylglutaric Acid	157
3.12	Chirality	158
3.13	Magnitude of Vicinal and Geminal Coupling Constants	160
3.14	Long-Range Coupling	162
3.15	Selective Spin Decoupling: Double Resonance	162
3.16	Nuclear Overhauser Effect	162
3.17	Conclusion	163
	References	164
	Student Exercises	164

Appendices 175

A	Chart A.1: Chemical Shifts of Protons on a Carbon Atom Adjacent (α Position) to a Functional Group in Aliphatic Compounds (M–Y)	175
	Chart A.2: Chemical Shifts of Protons on a Carbon Atom Once Removed (β Position) from a Functional Group in Aliphatic Compounds (M–C–Y)	177
B	Effect on Chemical Shifts by Two or Three Directly Attached Functional Groups	178
C	Chemical Shifts in Alicyclic and Heterocyclic Rings	180
D	Chemical Shifts in Unsaturated and Aromatic Systems	181
	Chart D.1: Chemical Shifts of Protons on Monosubstituted Benzene Rings	183
E	Protons Subject to Hydrogen-Bonding Effects (Protons on Heteroatoms)	184
F	Proton Spin-Spin Coupling Constants	185
G	Chemical Shifts and Multiplicities of Residual Protons in Commercially Available Deuterated Solvents	187
H	Chemical Shifts of Common Laboratory Solvents as Trace Impurities	188
I	Proton NMR Chemical Shifts of Amino Acids in D_2O	190

CHAPTER 4 CARBON-13 NMR SPECTROSCOPY 191

4.1	Introduction	191
4.2	Theory	191
4.2.1	^1H Decoupling Techniques	191
4.2.2	Chemical Shift Scale and Range	192
4.2.3	T_1 Relaxation	193
4.2.4	Nuclear Overhauser Effect (NOE)	193
4.2.5	^{13}C — ^1H Spin-Spin Coupling (J Coupling)	196
4.2.6	Sensitivity	197
4.2.7	Solvents	197
4.3	Interpretation of a Simple ^{13}C NMR Spectrum: Diethyl Phthalate	198
4.4	Quantitative ^{13}C Analysis	198
4.5	Chemical Equivalence	200
4.6	DEPT	200
4.7	Chemical Classes and Chemical Shifts	203
4.7.1	Alkanes	204
4.7.1.1	Linear and Branched Alkanes	204
4.7.1.2	Effect of Substituents on Alkanes	205
4.7.1.3	Cycloalkanes and Saturated Heterocyclics	205
4.7.2	Alkenes	206
4.7.3	Alkynes	208
4.7.4	Aromatic Compounds	208
4.7.5	Heteroaromatic Compounds	209
4.7.6	Alcohols	209
4.7.7	Ethers, Acetals, and Epoxides	209
4.7.8	Halides	211
4.7.9	Amines	211
4.7.10	Thiols, Sulfides, and Disulfides	211
4.7.11	Functional Groups Containing Carbon	211
4.7.11.1	Ketones and Aldehydes	212

- 4.7.11.2 Carboxylic Acids, Esters, Chlorides, Anhydrides, Amides, and Nitriles **214**
 4.7.11.3 Oximes **214**

References **214**

Student Exercises **214**

Appendices **225**

- A** The ^{13}C Chemical Shifts, Coupling Constants, and Peak Multiplicities of Common Deuterated NMR Solvents **225**
B ^{13}C Chemical Shifts of Common Laboratory Solvents as Trace Impurities in Selected Deuterated NMR Solvents **226**
C ^{13}C Chemical Shift Ranges for Chemical Classes **227**
D ^{13}C Chemical Shifts (ppm) for Several Natural Products **229**

CHAPTER 5 TWO-DIMENSIONAL NMR SPECTROSCOPY **230**

- 5.1** Introduction **230**
5.2 Theory **231**
5.3 Correlation Spectroscopy **233**
 5.3.1 ^1H — ^1H Correlation: COSY **235**
5.4 Ipsenol: ^1H — ^1H COSY **235**
 5.4.1 Ipsenol: Double Quantum Filtered ^1H — ^1H COSY **238**
 5.4.2 Carbon Detected ^{13}C — ^1H COSY: HETCOR **238**
 5.4.3 Proton Detected ^1H — ^{13}C COSY: HMQC **239**
 5.4.4 Ipsenol: HETCOR and HMQC **239**
 5.4.5 Ipsenol: Proton-Detected, Long-Range ^1H — ^{13}C Heteronuclear Correlation: HMBC **241**
5.5 Caryophyllene Oxide **243**
 5.5.1 Caryophyllene Oxide: DQF-COSY **243**
 5.5.2 Caryophyllene Oxide: HMQC **243**
 5.5.3 Caryophyllene Oxide: HMBC **247**
5.6 ^{13}C — ^{13}C Correlations: INADEQUATE **249**
 5.6.1 INADEQUATE: Caryophyllene Oxide **251**
5.7 Lactose **251**
 5.7.1 DQF-COSY: Lactose **251**
 5.7.2 HMQC: Lactose **254**
 5.7.3 HMBC: Lactose **254**
5.8 Relayed Coherence Transfer: TOCSY **254**
 5.8.1 2D TOCSY: Lactose **254**
 5.8.2 1D TOCSY: Lactose **257**
5.9 HMQC-TOCSY **259**
 5.9.1 HMQC-TOCSY: Lactose **259**
5.10 ROESY **259**
 5.10.1 ROESY: Lactose **259**

- 5.11** VGSE **262**
 5.11.1 COSY: VGSE **262**
 5.11.2 TOCSY: VGSE **262**
 5.11.3 HMQC: VGSE **262**
 5.11.4 HMBC: VGSE **264**
 5.11.5 ROESY: VGSE **265**

5.12 Pulsed Field Gradient NMR **265**
