

CONTENTS

Preface	ix
GRAFT COPOLYMERIZATION OF CELLULOSE AND CELLULOSE DERIVATIVES	
1. Some Challenges in Grafting to Cellulose and Cellulose Derivatives . V. Stannett	3
2. Free-Radical Initiated Graft Polymerization of Vinyl Monomers onto Cellulose	21
J. C. Arthur, Jr.	
3. Graft Copolymerization of Vinyl Monomers onto Cellulosic Fibers .	33
B. Rånby and L. Gädde	
4. The Ceric Ion Method of Grafting Acrylic Acid to Cellulose	45
D. J. McDowall, B. S. Gupta, and V. Stannett	
5. Grafting of Rayon Fabrics in Cold Plasma Conditions	57
C. I. Simionescu, M. M. Macoveanu, S. Percec, G. Cazacu, and A. Ioanid	
6. Grafting of Methyl Methacrylate onto KPM Rayon and Jute Fiber: Effect on the Properties of Grafted Fibers	73
Md. Habibuddowla	
7. Photochemical Grafting on Wood Cellulose	83
J. P. Fouassier	
8. Photoinduced Grafting Reactions in Cellulose and Cellulose Derivatives	101
D. N.-S. Hon and H.-C. Chan	
9. Photoinduced Graft Copolymerization of Cellulose Derivatives	119
T. Akira and T. Shirō	
10. Acid Effect in UV- and Radiation-Induced Grafting of Styrene to Cellulose	141
C. H. Ang, J. L. Garnett, S. V. Jankiewicz, and D. Sangster	
11. Graft Copolymer of Cellulose Nitrate	155
K. S. V. Srinivasan, D. N.-S. Hon, and M. Santappa	
12. Computer Simulations of Grafting Reactions of Styrene onto Pre-irradiated Cellulose Acetate	179
T. Yasukawa and K. Murakami	
GRAFT COPOLYMERIZATION OF STARCH AND BAMBOO	
13. Cross-linking in Saponified Starch-g-Polyacrylonitrile	195
G. F. Fanta, R. C. Burr, and W. M. Doane	

14. Grafting Reaction of Dextran onto Polymer Surface	217
M. Taniguchi, R. K. Samal, M. Suzuki, H. Iwata, and Y. Ikada	
15. Graft Copolymerization of Acrylonitrile onto Bamboo Using IR Spectroscopic Technique as a Probe	233
K. C. Lin, Y. S. Wu, T. H. Tan, and T. L. Tai	
GRAFT COPOLYMERIZATION OF LIGNOCELLULOSIC FIBERS	
16. Grafting of Some Vinyl Monomers onto Lignocellulose and Cellulose in the Presence of Lignin	253
O. Y. Mansour, A. Nagaty, and Al.-F. Beshay	
17. The Xanthate Method of Grafting. Part IX. Grafting of Acrylonitrile onto High-Yield Hardwood Pulp	269
B. V. Kokta, R. C. Lo, and C. Daneault	
18. Graft Copolymerization of Lignosulfonate with Methacrylic Acid and Acrylate Monomers	285
R. Chen and B. V. Kokta	
CHEMICAL MODIFICATION OF LIGNOCELLULOSIC FIBERS	
19. Chemical Modification of Wood with Thioacetic Acid	303
S. Kumar and S. C. Agarwal	
20. Thermoplasticization of Cellulose and Wood by Graft Copolymerization and Acylation	321
N. Shiraishi, T. Aoki, M. Norimoto, and M. Okumura	
21. UV Degradation and Accelerated Weathering of Chemically Modified Wood	349
W. C. Feist and R. M. Rowell	
Index	373
