

Contents

Preface	xi
1 Introduction	
I. The Ultrastructure of Cell Membranes	1
II. Functions of Cell Membranes	4
III. The Hydrophobic Effect	16
IV. Summary	21
2 The Lipids of Cell Membranes	
I. Phospholipids	22
II. Sphingolipids	34
III. Glycolipids	36
IV. Sterols	38
V. Summary	39
3 Membrane Models and Model Membranes	
I. Membrane Models	40
II. Model Membrane Systems	43
III. Summary	60
4 Lipid Properties in Membranes	
I. Membrane Structure	62
II. Lipid Conformation in Membranes	86
III. Phospholipid Motional Properties	92
IV. Summary	119
5 Cholesterol and Cell Membranes	
I. General Features of the Cholesterol Molecule	120
II. Cholesterol Location in Cells	122
	vii

III. Behavior of the Cholesterol Molecule in Membranes	128
IV. Location of Cholesterol in the Membrane	130
V. Cholesterol Effects on the Physical Properties of Membranes	130
VI. Effects of Cholesterol on Membrane Functionality	135
VII. Effects of Cholesterol in Membrane Biosynthesis and Cell Growth	137
VIII. Summary	138
6 Membrane Proteins	
I. Classification of Membrane Proteins	140
II. Membrane Protein Conformation	149
III. Summary	168
7 Lipid-Protein Interactions in Biological Membranes and Reconstitution of Membrane Function	
I. Theoretical Considerations	169
II. Experimental Data	175
III. Lipid Requirements for Membrane Protein Activity	184
IV. Lipid-Protein Interactions and Lipid State	186
V. Reconstitution	187
VI. Summary	189
8 Transport	
I. Passive Diffusion	191
II. Facilitated Diffusion	194
III. Active Transport	205
IV. Ion Currents	214
V. Summary	214
9 Membrane Fusion	
I. Measurement of Fusion of Phospholipid Vesicles	218
II. Fusion of PS Vesicles	220
III. Virus Fusion	223
IV. Calcium and Biological Membranes	224
V. Intercellular Membrane Fusions	225
VI. Summary	225
10 The Metabolism of Membrane Lipids	
I. Fatty Acid Biosynthesis	227
II. Biosynthesis of Phosphatidate	237
III. Biosynthesis of Diacylglycerol from Phosphatidate	239

IV. Biosynthesis of Phosphatidylcholine	240
V. Phosphatidylethanolamine Biosynthesis	241
VI. Phosphatidylserine Biosynthesis	243
VII. Phosphatidylglycerol and Diphosphatidylglycerol Synthesis	243
VIII. Phosphatidylinositol Biosynthesis	243
IX. Biosynthesis of the Sphingolipids	244
X. Metabolism of Sphingolipids	247
XI. Cholesterol Biosynthesis	248
XII. Regulation of Cholesterol Levels in the Cell	251

11 Membrane Biogenesis

I. Assembly of Lipids into Membranes	255
II. Biosynthesis of Membrane Proteins and Their Assembly into Membranes	258
III. Summary	266

Selected Readings	269
