

CONTENTS

Preface	ix
1. Perspectives on Preparation of Cellulose for Hydrolysis	1
E. S. Lipinsky	
2. The Hydrolysis of Cellulosic Materials to Useful Products	25
A. E. Humphrey	
3. Conformational Effects in the Hydrolysis of Cellulose	55
R. H. Atalla	
4. Influence of Fine Grinding on the Hydrolysis of Cellulosic Materials—Acid vs. Enzymatic	71
M. A. Millett, M. J. Effland, and D. F. Caulfield	
5. Absolute Viscosimetric Method for the Determination of Endocellulase (C_x) Activities Based upon Light-Scattering Interpretations of Gel Chromatographic Fractionation Data	91
J. Demeester, M. Bracke, and A. Lauwers	
6. Influence of Cellulose Physical Structure on Thermohydrolytic, Hydrolytic, and Enzymatic Degradation of Cellulose	127
B. Philipp, V. Jacopian, F. Loth, W. Hirte, and G. Schulz	
7. Hydrolysis of Polysaccharides with Trifluoroacetic Acid and Its Application to Rapid Wood and Pulp Analysis	145
D. Fengel and G. Wegener	
8. Rapid Hydrolysis of Cellulose in Homogeneous Solution	159
K. Garves	
9. New Catalysis Systems for Hydrolysis of Model Substances of Cellulose	167
K. Arai	
10. Synergism Between Enzymes Involved in the Solubilization of Native Cellulose	181
T. M. Wood and S. I. McCrae	
11. The Mode of Enzymatic Degradation of Cellulose Based on the Properties of Cellulase Components	211
T. Kanda, S. Nakakubo, K. Wakabayashi, and K. Nisizawa	
12. The Cellulase System of <i>Trichoderma</i>: Relationships Between Purified Extracellular Enzymes from Induced or Cellulose-Grown Cells	237
M. Gritzali and R. D. Brown, Jr.	

13. Biosynthesis, Purification, and Mode of Action of Cellulases of <i>Trichoderma reesei</i>	261
C.-S. Gong, M. R. Ladisch, and G. T. Tsao	
14. Selective Screening Methods for the Isolation of High Yielding Cellulase Mutants of <i>Trichoderma reesei</i>	289
B. S. Montenecourt and D. E. Eveleigh	
15. Degradation of Delignified Sprucewood by Purified Mannanase, Xylanase, and Cellulases	303
M. Sinner, N. Parameswaran, and H. H. Dietrichs	
16. The Cellulolytic Enzyme System of <i>Thermoactinomyces</i>	331
B. Hägerdal, J. Ferchak, E. K. Pye, and J. R. Forro	
17. Two Pea Cellulases Display the Same Catalytic Mechanism Despite Major Differences in Physical Properties	347
G. MacLachlan and Y.-S. Wong	
18. Structural and Mechanistic Comparisons of Some β -(1 $\rightarrow$ 4) Glycoside Hydrolases	361
M. G. Paice and L. Jurasek	
Index	375
