

CONTENTS

INDUCED MUTATIONS AND THE ADVANCEMENT OF GENETICS

(Session I)

Value of induced mutation research for improving genetic knowledge (Invited paper) (IAEA-SM-251/42)	3
<i>J. Mac Key</i>	
Induced chromosome and gene mutations for specific goals in barley genetics and breeding (IAEA-SM-251/1)	23
<i>F. Scholz, G. Künzel</i>	
Excerpts from discussion	35
Use of mutants that affect homoeologous pairing for introducing alien variation in both <i>durum</i> and common wheat (IAEA-SM-251/2)	37
<i>B. Giorgi, F. Barbera</i>	
Excerpt from discussion	47
Egg transformation and parthenogenetic diploidy induced through the aid of ionizing radiation: theory and practice (IAEA-SM-251/39)	49
<i>K.K. Pandey</i>	
L'induction de variabilité génétique dans le plastome: recherche de protéines modifiées dans les chloroplastes (IAEA-SM-251/3)	67
<i>H. Dulieu</i>	

Poster Presentation

Persistence of lethal genes in maize populations due to natural selection (IAEA-SM-251/50)	81
<i>J.C. Salerno, H.E. Hopp, E.A. Favret</i>	

INDUCED MUTATIONS AND PLANT EVOLUTION (Session II)

Mutations and parallel variation (Invited paper) (IAEA-SM-251/43)	85
<i>Å. Gustafsson, U. Lundqvist</i>	
Excerpts from discussion	110
Potential for redesigning the pea crop using spontaneous and induced mutations (IAEA-SM-251/21)	111
<i>B. Snoad, C.L. Hedley</i>	
Excerpt from discussion	125

Processes influencing the evolution of irradiated wheat populations (IAEA-SM-251/16)	127
<i>K. Borojević, S. Šesek</i>	
Mutations as a means for analysing polyploid systems (IAEA-SM-251/4)	143
<i>J. Mac Key</i>	
Excerpt from discussion	151

Poster Presentations

Implications of induced dwarfism on yield components in rice (<i>Oryza sativa</i> L.) (IAEA-SM-251/32)	153
<i>M.A. Awan, A.A. Cheema</i>	
Selection studies in certain mutant populations of wheat (IAEA-SM-251/33)	154
<i>M.B. Yildirim</i>	
Role of mutants in breeding sour cherry varieties with an apomictic system of reproduction and self-fertility (IAEA-SM-251/62)	155
<i>O.S. Zhukov, L.V. Gavrilina</i>	

INDUCED MUTATIONS AND PLANT PHYSIOLOGY (Session III)

Potential use of induced mutants in crop plant physiology studies (Invited paper) (IAEA-SM-251/44)	159
<i>P.B. Vose</i>	
Excerpts from discussion.....	181
Use of induced mutants of genes controlling nitrate reductase, starch deposition, and anthocyanin synthesis in barley (IAEA-SM-251/14)	183
<i>R.A. Nilan, A. Kleinhofs, R.L. Warner</i>	
Excerpt from discussion	200
Yield response of an erect, narrow and thick-leaved rice mutant and the derived strain to different planting densities (IAEA-SM-251/6)	201
<i>H. Yamaguchi, M. Watanabe, S. Sato, Y. Kanbayashi</i>	
Variation in some physiological components of yield in induced mutants of mungbean (IAEA-SM-251/5)	213
<i>R.G. Thakare, S.E. Pawar, D.C. Joshua, R. Mitra, C.R. Bhatia</i>	
Excerpt from discussion	226
Isolation and use of mutants with an altered germination behaviour in <i>Arabidopsis thaliana</i> and tomato (IAEA-SM-251/7)	227
<i>M. Koornneef, J.H. van der Veen, C.J.P. Spruit, C.M. Karssen</i>	
Excerpt from discussion	232

Selection for low alkaloid mutants in <i>Lupinus mutabilis</i> (IAEA-SM-251/59)	233
<i>K.W. Pakendorf, P.J. van Rensburg</i>	
Excerpts from discussion	242

Poster Presentations

Control of barley development using dwarf mutants (IAEA-SM-251/51).....	243
<i>H.E. Hopp, G.C. Favret, E.A. Favret</i>	
Dry matter and nitrogen accumulation in the endosperm of wheat mutants (IAEA-SM-251/54)	244
<i>A. Brunori, A. Micke, T. Hermelin</i>	
Barley mutants with improved protein and high grain yield in Cyprus (IAEA-SM-251/31)	245
<i>A. Hadjichristodoulou, A. Della</i>	
Quelques caractéristiques biochimiques de la variété No.6 (Tsibashi) du soja et de ses deux mutants (IAEA-SM-251/36)	246
<i>B.L.L. Manyala, M. Kasende, K. Kembola</i>	

INDUCED MUTATIONS AND PLANT PARASITES (Session IV)

Analisis de la relación huésped-patógeno mediante el empleo de mutaciones inducidas en ambos organismos (Memoria encargada) (IAEA-SM-251/47)	251
<i>E.A. Favret</i>	
Excerpts from discussion	264
Intérêt des variants cytoplasmiques en amélioration des plantes: application à la recherche de maïs résistants aux toxines spécifiques de la stérilité mâle cytoplasmique Texas (IAEA-SM-251/8)	267
<i>A. Cornu, E. Vuillaume, R. Bodergat</i>	
Excerpt from discussion	275
Sélection de cals embryogènes de froment résistants à des préparations toxiques de <i>Helminthosporium sativum</i> P.K. et B. (IAEA-SM-251/9)	277
<i>A. Dutrecq</i>	
Excerpt from discussion	285

Poster Presentations

Induced mutation by gamma radiation for collar rot disease resistance of Thai kenaf (IAEA-SM-251/34)	287
<i>S. Keoboonrueng, S. Kanlong, S. Siddhipongse, R. Syamananda</i>	
Frequency of artificially induced and spontaneous mutants to blast resistance in rice (IAEA-SM-251/55)	288
<i>A.H. Zakri, B.S. Jalani, N.T. Arasu, H.P.K. Gaul</i>	

Evaluation of wheat stem rust-resistant mutants at different yield levels (IAEA-SM-251/49)	289
<i>A.A. Veiga, J.C. Felicio, C.E.O. Camargo, B.C. Barros,</i>	
<i>A. Tulmann Neto, J.O.M. Menten, A. Ando</i>	

INDUCED MUTATIONS AND PLANT SYMBIOSES (Session V)

Potential use of induced mutations to improve symbioses of crop plants with N ₂ -fixing bacteria (Invited paper) (IAEA-SM-251/45)	293
<i>R.J. Rennie</i>	
Excerpts from discussion	319
Effect of Rhizobium inoculation on some characters of a high protein mutant and its parent field bean <i>Vicia faba</i> L. (IAEA-SM-251/26)	323
<i>A.M.T. Abo-Hegazi, A.E.M. Tolba, M.H.T. Eweida, A.I. El-Agamy,</i>	
<i>A.E.A. Haggag</i>	
Isolation of a nitrate-reductase-deficient mutant of pea (<i>Pisum sativum</i>) and its use in the study of the inhibiting effect of nitrate (NO ₃ ⁻) on nitrogen fixation (IAEA-SM-251/10)	327
<i>W.J. Feenstra, E. Jacobsen, A.J.C. de Visser</i>	
Excerpt from discussion	332

Poster Presentation

Symbiotic dinitrogen fixation by mutant lines of field bean (<i>Vicia faba minor</i>) (IAEA-SM-251/56)	333
<i>H. Brunner, F. Zapata</i>	

INDUCED MUTATIONS AND IN VITRO CULTURE (Session VI)

Induced mutations in advancing in vitro culture techniques (Invited paper) (IAEA-SM-251/46)	339
<i>P. Maliga, V.A. Sidorov, Á. Cséplő, L. Menczel</i>	
Excerpts from discussion	352
Selection and analysis of mutants over-producing amino acids of the aspartate family in barley, <i>Arabidopsis</i> and carrot (IAEA-SM-251/28)	353
<i>A. Cattoir-Reynaerts, E. Degryse, M. Jacobs</i>	
Developments of a selective system for somatic cell hybrids (IAEA-SM-251/17)	363
<i>F. Lo Schiavo, G. Biasini, G. Giuliano, M. Terzi</i>	

Induction by ionizing radiation of genetic markers for the development of in vitro genetic manipulation as a tool in crop plant improvement (IAEA-SM-251/23)	373
<i>P.S.Th.J. Werry</i>	
Excerpts from discussion	382
Isolation of auxotrophic and temperature-sensitive variants using haploid plant protoplasts (IAEA-SM-251/11)	383
<i>C. Gebhardt, A. Strauss, P.J. King</i>	
Mutants tolerant to low-temperature conditions induced in suspension culture as a source for improvement of <i>Euphorbia pulcherrima</i> Willd. ex Klotzsch (IAEA-SM-251/12)	399
<i>F. Walther, W. Preil</i>	

Poster Presentations

Conditions of selection for wheat mutants deregulated in lysine control (IAEA-SM-251/27)	407
<i>J.M. Jacquemin, J.A. Dubois</i>	
<i>Petunia hybrida</i> drug-resistant mutant cell lines express their mutant character at plant level (IAEA-SM-251/57)	407
<i>A.J. Kool, C.M. Colijn</i>	

INDUCED MUTATIONS AND GENE ECOLOGY (Session VII)

Induced mutations in gene-ecological studies (Invited paper) (IAEA-SM-251/48)	411
<i>W. Gottschalk</i>	
Excerpt from discussion	436
Genetic architecture of flowering time as identified by induced mutations (IAEA-SM-251/15)	437
<i>H.A.S. Hussein</i>	
Excerpt from discussion	450
Cold tolerance of mutant maize sublines (IAEA-SM-251/24)	451
<i>A. Bálint, M. Herczegh</i>	

INDUCED MUTATIONS AND PLANT BREEDING (Session VIII)

Research tool uses of rice mutants for increasing crop productivity (IAEA-SM-251/13)	457
<i>J.N. Rutger, M.L. Peterson</i>	
Excerpts from discussion	467

Induced mutations for genetic analyses and improvement of wheat (IAEA-SM-251/53)	469
<i>C.F. Konzak</i>	
Induced mutations for investigation of histogenetic processes as the basis for optimal mutant selection (IAEA-SM-251/40)	489
<i>F. Pohlheim</i>	
Excerpt from discussion	495
Use of mutagens to induce and transfer apomixis in plants (IAEA-SM-251/38)	497
<i>W.W. Hanna, G.W. Burton</i>	
 <i>Poster Presentations</i>	
Analysis of the somatic mutation process in barley (IAEA-SM-251/52)	501
<i>A.R. Prina, E.A. Favret</i>	
Value of dwarf or compact-type mutants as a tool in breeding programmes, exemplified by <i>Capsicum annum</i> L. (IAEA-SM-251/41)	502
<i>S. Daskalov</i>	
Utilization of induced mutations and gamma radiation in cross-breeding of <i>durum</i> wheat (IAEA-SM-251/61)	504
<i>K.A. Filev</i>	
Mutagenesis in growing plants (IAEA-SM-251/63)	505
<i>V.K. Shcherbakov</i>	
 Summary Report of Consultants' Meeting on the Induction of Mutation in Extranuclear Hereditary Cell Elements	509
List of Chairmen of Sessions and Secretariat of the Symposium	523
List of Participants	525
Author Index	537
