

Contents

Contributors.....	xiii
Preface.....	xix
Ralph R. Baker and Peter E. Dunn	
I. FOUNDATIONS OF BIOLOGICAL CONTROL	
A. BROAD PERSPECTIVES	
Investigation of Mechanisms: The Key to Successful Use of Biotechnology	
Robert R. Schmidt.....	1
Biological Control of Pests and Diseases: Integrating a Diverse Heritage	
James R. Cate.....	23
The Broad Perspectives on Biological Control	
Samuel H. Smith.....	45
B. BIOLOGICAL CONTROL OF PEST INSECTS	
Ecological Theory and Biological Control	
William W. Murdoch.....	49
Interface of the Natural Enemy and Environment	
Donald R. Strong.....	57
Establishing a Foothold for Theory in Biocontrol Practice: Using Models to Guide Experimental Design and Release Protocols	
Peter Kareiva.....	65
Functional Response of Arthropod Predators and Its Role in the Biological Control of Insect Pests in Agricultural Systems	
Robert J. O'Neil.....	83
New Directions for Insect Control With Baculoviruses	
James R. Fuxa.....	97
Fungi as Naturally Occurring Entomopathogens	
Raymond I. Carruthers and Kirsten Hural.....	115
Entomogenous Fungi as Microbial Pesticides	
Clayton W. McCoy.....	139

viii / Contents

Control of Insects by Protozoa	
J.E. Henry.	161
Polymorphic Microsporidia of Mosquitoes: Potential for Biological Control	
Theodore G. Andreadis.	177
Entomopathogenic Nematodes in Biological Control of Insects	
Harry K. Kaya.	189
Microbial Control of Vector Insects	
Elizabeth W. Davidson.	199
 C. BIOLOGICAL CONTROL OF PLANT PATHOGENS	
Approaches to Studying Viral Cross Protection	
J.A. Dodds.	213
Bacteria as Antagonists in Biological Control of Plant Pathogens	
Bruce C. Hemming.	223
Fungi as Antagonists	
J.M. Lynch.	243
Biological Control of Nematodes	
Michael A. McClure.	255
The Phylloplane	
Harvey W. Spurr, Jr.	271
 D. BIOLOGICAL CONTROL OF WEEDS	
Mycoherbicides	
G.E. Templeton and Dana K. Heiny.	279
Special Problems Associated With Aquatic Weed Control	
R. Charudattan, J.T. DeValerio, and V.J. Prange.	287
Identifying Limiting Factors in the Biocontrol of Weeds	
Alan K. Watson and Lee A. Wymore.	305
Allelopathy: A Viable Weed Control Strategy	
Alan R. Putnam, M.G. Nair, and J.P. Barnes.	317
Conflicts and Strategies for Future Development of Mycoherbicides	
David O. TeBeest.	323
 E. DEVELOPMENT OF BIOCONTROL AGENTS FOR AGRICULTURE	
Commercial Production and Formulation of Microbial Biocontrol Agents	
C.A. Baker and J.M.S. Henis.	333
Formulation of Biocontrol Agents for Use in Plant Pathology	
W.J. Connick, Jr., J.A. Lewis, and P.C. Quimby, Jr.	345
Genetic Considerations in the Propagation of Entomophagous Species	
R.T. Roush.	373
Nutritional Considerations in Propagation of Entomophagous Species	
S.N. Thompson.	389

Genetic Improvement of Arthropod Natural Enemies: Becoming a Conventional Tactic?	
Majorie A. Hoy.	405
Economic Considerations in Marketing and Application of Biocontrol Agents	
Bruce C. Carlton.	419
Discussion: Biological Evaluation of Planned Introductions	
David J. Drahos and Frederick D. Bennett.	435
 F. PLANT MANAGEMENT IN BIOLOGICAL CONTROL	
Plant Management in Relation to Biological Control of Plant Pathogens	
R. James Cook.	441
Crop Management Systems and Their Effects on Biological Control of Insects	
Jerry L. Stimac.	449
Discussion Summary: Enhancement of Sustainable Agriculture as Related to Biocontrol	
Kenneth E. Conway and Alison G. Power.	467
Discussion Summary: Influence of the Soil Environment on Insect and Plant Pathogens	
John M. Duniway and Clayton W. McCoy.	473
Discussion Summary: Biological Control in Closed Structures and Biospheres	
Dan Funck-Jensen and Mary W. Olsen.	479
 II. ENHANCING MECHANISIMS OF BIOCONTROL	
A. INSECT HOST-PARASITE INTERACTIONS	
Proximate Factors Influencing Parasitoid Progeny Allocation	
Michael R. Strand.	485
Parasitic Effects on Host Development	
Nancy E. Beckage.	497
Immunosuppression	
S. Bradleigh Vinson.	517
Molecular Biology of the <i>Campoletis sonorensis</i> Polydnavirus in Host-Parasite Relationships	
Max D. Summers.	537
 B. <i>BACILLUS THURINGIENSIS</i> DELTA-ENDOTOXIN	
Specificity <i>In Vivo</i> and <i>In Vitro</i> of <i>Bacillus thuringiensis</i> Delta-Endotoxins Active on Lepidoptera	
Arthur Aronson and Dong Wu.	547
Alternative Hosts for <i>Bacillus thuringiensis</i> Delta-Endotoxin Genes	
Jerald S. Feitelson, Thomas C. Quick, and Frank Gaertner.	561
Insecticidal Crystal Proteins From <i>Bacillus thuringiensis</i> and Their Use in Transgenic Crops	
Jan Leemans, A. Reynaerts, H. Höfte, M. Peferoen, H. Van Mellaert, and H. Joos.	573

x / Contents

Insect Resistance to <i>Bacillus thuringiensis</i> δ-Endotoxin	
William H. McGaughey	583
Differential Expression of the 3 δ-Endotoxin Genes in <i>Bacillus thuringiensis</i> Subsp. <i>Kurstaki</i> HD 1	
Helen Rothnie and Martin Geiser	599
C. APPLICATIONS OF BIOTECHNOLOGY	
Planned Release of an Engineered Baculovirus Insecticide	
David H.L. Bishop and Robert D. Possee	609
Transgenic Plants Resistant to Viruses	
L. Sue Loesch-Fries	629
Roles for Public and Private Sector Scientists in Developing Pest-Resistant Crops	
Fred Gould and Arthur Weissinger	641
Discussion Summary: Application of Biotechnology to the Systematics and Monitoring of Biocontrol Agents	
C.Y. Kawanishi and B.C. Hemming	649
D. INTERACTIONS OF BIOLOGICAL CONTROL AGENTS WITHIN PLANTS	
Mechanisms Involved in Protection of Infection Sites	
Baruch Sneh	653
Induced Resistance: Physiology and Biochemistry	
Luis Sequeira	663
<i>Agrobacterium radiobacter</i> Strain K84: A Model Biocontrol System	
Stephen K. Farrand	679
Molecular Basis for Hypovirulence and Its Ecological Relationships	
Dennis W. Fulbright	693
E. ANTAGONISM EXTERIOR TO PLANT	
Antibiotics: Evidence for Their Production and Sites Where They Are Produced	
David M. Weller and Linda S. Thomashow	703
Biochemical and Ecological Aspects of Competition in Biological Control	
Timothy C. Paulitz	713
Mycoparasitism—Recognition, Physiology, and Ecology	
Ilan Chet	725
F. APPLICATION OF STRATEGIES FOR ENHANCEMENT	
Molecular and Biochemical Bases for Activities of Biological Control Agents: The Role of Siderophores	
Joyce E. Loper	735
Enhancing Efficiencies of Biocontrol Agents by Use of Biotechnology	
Neal Gutterson, William Howie, and Trevor Suslow	749

Microbial Attributes Associated With Root Colonization	
Stephen T. Lam.	767
Deployment Tactics for Biocontrol Agents in Plant Pathology	
G.E. Harman.	779
Efficiency and Potential Use in Crop Protection of the Naturally Occurring Resident Antagonists on the Phylloplane	
F.L. Lukezic, K.T. Leath, M. Jones, and R.G. Levine.	793
Session Summary: Bacteria in Biological Control	
Anne K. Vidaver.	813
Index	815
