

CONTENTS

1. INTRODUCTION	1
1.1. Structural View of Membranology	1
1.2. Historical Overview	2
1.3. Configurations and Packaging	10
1.4. Polymer Membrane Markets	14
1.5. Membrane Literature	15
References	20
2. MEMBRANE SEPARATION PROCESSES	22
2.1. Concentration-Driven Processes	22
2.1.1. Separation of Gases, Vapors, and Organic Liquids	24
2.1.2. Dialysis	37
2.2. Electromembrane Processes	38
2.3. Pressure-Driven Processes	44
2.3.1. Microfiltration	44
2.3.2. Ultrafiltration	60
2.3.3. Hyperfiltration	64
References	78
3. MISCELLANEOUS USES OF MEMBRANES	82
3.1. Selective Membrane Electrodes	82
3.2. Collector Membranes	87

x CONTENTS

- 3.3. Controlled-Release Devices 90
- 3.4. Membrane Reactors 99
- 3.5. Solid-State Electrolytes for Batteries and Fuel Cells 99
 - 3.5.1. Electrolytes for Secondary-Cell Batteries 99
 - 3.5.2. Electrolytes for Fuel Cells 101
- References 104

4. MEMBRANE POLYMERS 106

- 4.1. Essential Membrane Polymer Characteristics 106
- 4.2. Neutral Polymers 124
- 4.3. Ion-Exchange Polymers and Ionomers 155
- 4.4. Water Structure and Membrane-Water Interactions 172
- 4.5. Polymer Modification and New Polymer Design 177
- References 180

5. POLYMER SOLUTIONS 186

- 5.1. Nature of Polymer-Solvent Interactions 189
- 5.2. Solvent Power 193
- 5.3. Representative Polymer Solutions 200
- References 221

6. DENSE MEMBRANES 224

- 6.1. Solvent-Cast Films 225
- 6.2. Melt-Extruded Films 230
- 6.3. Dense Membranes Formed during Polymerization 234
- References 235

7. PHASE-INVERSION MEMBRANES 237

- 7.1. Mechanism of Phase Inversion 237
- 7.2. The Dry Process 238
- 7.3. The Wet Process 251
- 7.4. The Thermal Process 261
- 7.5. The Polymer-Assisted Phase-Inversion (PAPI) Process 264
- 7.6. Inhomogeneity in Depth 265
- 7.7. Composite Membranes 277
- 7.8. Structural Irregularities 281
- References 285

8. OTHER POROUS MEMBRANES	287
8.1. Swollen Dense Films	287
8.2. Stretched Semicrystalline Films	290
8.3. Sintered-Particle Membranes	297
8.4. Parchment Paper and Cellophanes	302
8.5. Leaching-Process Membranes	303
8.6. Porous Membranes Formed during Polymerization	305
8.7. Nucleation-Track Membranes	305
References	309
9. LIQUID AND DYNAMICALLY FORMED MEMBRANES	311
9.1. Emulsion-Type Liquid Membranes	311
9.2. Supported Liquid Membranes	314
9.3. Dynamically Formed Membranes	325
References	328
10. BIOLOGICAL MEMBRANES	329
10.1. Natural Biomembranes	329
10.2. Material Transport through Biological Membranes	333
10.3. Synthetic Biomembranes	336
References	341
Index	343
