

Table of Contents

List of Contributors	IX
I. DNA Structure and Gene Structure	
1. Structural and Topological Polymorphism of DNA <i>A. Nordheim, R.E. Herrera, K. Meese, L. Runkel, P.M. Scholten, H. Schröter, P.E. Shaw</i> ...	3
2. The Molecular Architecture of Plant Genes. A Phylogenetic Perspective <i>K. Elliston, J. Messing</i>	21
3. Transfer, Structure and Expression of Foreign Genes in Plants <i>K. Weising, G. Kahl, J. Schell</i>	57
4. Enhancers and Trans-acting Factors <i>H.R. Schöler, A.K. Hatzopoulos, U. Schlokot</i>	89
II. DNA-affine Proteins and Their Genes	
5. Histones, Histone Variants and Postsynthetic Histone Modifications <i>D. Doenecke</i>	123
6. Histones and HMG Proteins of Higher Plants <i>S. Spiker</i>	143
7. The Role of Histone H1 in Nucleosomes and Chromatin Fibers <i>F. Thoma</i>	163
8. The HMG Proteins and Their Genes <i>G. Goodwin, M. Bustin</i>	187
9. Recent Progress in the Study of Nonhistone Chromosomal Proteins <i>T.C. James, S.A. Amero, S.C.R. Elgin</i>	208
10. Histone Genes in Higher Plants <i>C. Gigot</i>	229
III. DNA-Protein Interactions	
11. Nucleosomes and Transcription <i>Y. Lorch, J.W. La Pointe, R.D. Kornberg</i>	243
12. Nucleosome Positioning <i>in vivo</i> and <i>in vitro</i> <i>B. Neubauer, W. Linxweiler, X.Y. Zhang, W. Hörz</i>	251
13. Mechanisms of Nucleosome Positioning Tested in Minichromosomes of Yeast <i>Saccaromyces cerevisiae</i> <i>F. Thoma</i>	269
IV. Chromatin	
14. Chromatin of Active and Inactive Genes <i>I.L. Cartwright, S.C.R. Elgin</i>	283
15. Chromatin Structure of Plant Genes <i>G. Kahl, A. Görz, K. Weising, W. Schäfer, E. Hirasawa</i>	301

16. Chromatin Domains and Gene Expression - Different Chromatin Conformations Characterize the Various Functional States of the Chicken Lysozyme Gene <i>H.P. Fritton, K. Jantzen, T. Igo-Kemenes, J. Nowock, U. Strech-Jurk, M. Theisen, A.E. Sippel</i>	333
17. Regulatory Function and Molecular Structure of DNase I- hypersensitive Elements in the Chromatin Domain of a Gene <i>A.E. Sippel, M. Theisen, U. Borgmeyer, U. Strech-Jurk, R.A.W. Rupp, A.W. Püschel, A. Müller, A. Hecht, A. Stief, T. Grussenmeyer</i>	355
18. Organization and Length Heterogeneity of Plant Ribosomal RNA Genes <i>V. Hemleben, M. Ganai, J. Gerstner, K. Schiebel, R.A. Torres</i>	371
19. Chromatin Structure and Expression of Plant Ribosomal RNA Genes <i>W.F. Thompson, R.B. Flavell, J.C. Watson, L.S. Kaufman</i>	385
20. Architecture of the 5' Flanking Regions of the Maize <i>Adh</i> Genes <i>A.-L. Paul, M. Ashraf, S. Bollinger, R.J. Ferl</i>	397
V. DNA Methylation and Transcription	
21. Eukaryotic Gene Inactivation by Sequence-specific Promoter Methylation and the Release of the Transcription Block <i>W. Doerfler, K.-D. Langner, D. Knebel, A. Hoeveler, U. Müller, U. Lichtenberg, B. Weisshaar, D. Renz</i>	409
22. DNA Methylation and its Effect on Transformed Gene Expression <i>A.G. Hepburn</i>	419
23. Enzymology of DNA Methylation in Mammalian Cells <i>D. Drahovsky, G.P. Pfeifer</i>	435
VI. Nuclear Matrix	
24. Nuclear Matrix <i>D. Werner, R. Rest, B. Neuer-Nitsche</i>	449
25. Nuclear Scaffold and the Higher-order Folding of Eukaryotic DNA <i>S.M. Gasser</i>	461
VII. Chromosomes	
26. Three-dimensional Organization of Interphase Chromosomes in Polytene Nuclei of <i>Drosophila melanogaster</i> <i>M. Hochstrasser, D. Mathog, Y. Gruenbaum, H. Saumweber, J.W. Sedat</i>	473
27. Phased Approaches to Mapping the Physical Structure of Entire Chromosomes <i>C.L. Smith, M.T. Yu, C.R. Cantor</i>	489
VIII. Perspectives	
28. Perspectives of Chromatin Research: Plant and Animal <i>J. Bonner</i>	499
Index	507
