

TABLE OF CONTENTS

Volume I

PHOTOSYNTHESIS

Chapter 1

- Oxygen Evolution by Photosystem II: Polypeptide Structure
and Inorganic Constituents 3
C. Yocum

Chapter 2

- Photophosphorylation Activity of Higher Plant Chloroplast Thylakoid Membranes..... 7
C. Yocum

Chapter 3

- Photosystem II and Inhibition by Herbicides 9
W. F. J. Vermaas, H. B. Pakrasi, and C. J. Arntzen

Chapter 4

- Chlorophyll Absorption and Fluorescence in Photosynthetic Membranes 13
J. S. Brown

Chapter 5

- Mutations in the *psbA* Gene: Comparative Analysis of the Q_B Protein from Wild-Type
and Herbicide-Resistant Isolates of Higher Plants, Algae, and Cyanobacteria 17
J. M. Erickson and J. Rochaix

Chapter 6

- Photosynthetic Carbon Reduction Cycle..... 21
R. G. Jensen and R. E. B. Seftor

Chapter 7

- Interactions of Carbon and Nitrogen Metabolism in Photosynthetic and Nonphotosynthetic
Tissues of Higher Plants: Metabolic Pathways and Controls..... 25
J. M. Robinson

Chapter 8

- Integration of Biochemistry with Leaf Anatomy during C₄ Plant Photosynthesis 37
C. C. Black, H. M. Vines, and J. A. Jernstedt

Chapter 9

- Crassulacean Acid Metabolism 45
I. P. Ting

Chapter 10

- Photorespiration — Chemistry and Nature of Organelles with which It Is
Associated..... 49
A. H. C. Huang

Chapter 11	
Regulation of Photorespiration	53
R. B. Peterson and K. R. Hanson	

Chapter 12	
Alternative Plant Photosynthetic CO ₂ Fixation Cycles	57
C. C. Black and H. M. Vines	

Chapter 13	
Cellular Specialization in the Assimilation of Essential Nutrients C, N, and S by C ₄ Leaves	63
C. C. Black and H. M. Vines	

PROTEINS, CARBOHYDRATES, AND LIPIDS

Chapter 14	
Transport of Proteins into the Chloroplast	69
K. C. Vaughn and S. O. Duke	

Chapter 15	
The Primary Cell Wall	75
D. J. Nevins	

Chapter 16	
Regulation of Photosynthetic Starch/Sucrose Metabolism	79
S. C. Huber and P. S. Kerr	

Chapter 17	
Polysaccharide Degradation in Higher Plants	85
C. M. Duffus	

Chapter 18	
Glycolysis and Gluconeogenesis Regulation by β -Fructose 2,6-Bisphosphate; Pyrophosphate Metabolism in Plants	89
C. C. Black and H. M. Vines	

Chapter 19	
The Oxidative Pentose Phosphate Pathway	95
T. ap Rees	

Chapter 20	
Transfer of Reducing Equivalents (Electrons) through the Glyoxysomal Membrane during β -Oxidation, Glyoxylate Cycle, and the Conversion of Triglyceride to Hexose	99
R. P. Donaldson	

Chapter 21	
Mitochondrial Electron Transport: Chemiosmosis	105
D. E. Koeppe	

Chapter 22	
The Cyanide-Resistant Respiratory Pathway	109
M. E. Musgrave and J. N. Siedow	

Chapter 23	
Molecular Architecture of Plant Mitochondrial Membranes	113
R. Douce, R. Bligny, and M. Neuburger	
Chapter 24	
Structure of Plastid Polar Lipids	117
J. Joyard, A. Dorne, and R. Douce	
Chapter 25	
Synthesis of Plastid Polar Lipids	121
J. Joyard, J. Coves, and R. Douce	
Chapter 26	
Protein and Polar Lipid Constituents of the Plastid Envelope Membranes	127
J. Joyard, M. A. Block, and R. Douce	
Chapter 27	
Intracellular Interactions in Phospholipid Biosynthesis	131
A. J. Kinney and T. S. Moore, Jr.	
Chapter 28	
Plant Isoprenoid Lipids and Prenyl Quinones	135
H. K. Lichtenthaler	
Index	143
