

CONTENTS

Preface	ix
1. Membrane Materials Science: An Overview	1
Douglas R. Lloyd	
MEMBRANE MATERIAL SELECTION AND EVALUATION	
2. Material Selection for Membrane-Based Gas Separations	25
R. T. Chern, W. J. Koros, H. B. Hopfenberg, and V. T. Stannett	
3. Selection and Evaluation of Membrane Materials for Liquid Separations	47
Douglas R. Lloyd and Timothy B. Meluch	
4. Aromatic Polyamide Membranes	81
H. H. Hoehn	
5. Membrane Materials for Therapeutic Applications in Medicine	99
Richard A. Ward, Pamela W. Feldhoff, and Elias Klein	
6. Selection of Supports for Immobilized Liquid Membranes	119
J. Douglas Way, Richard D. Noble, and Blaine R. Bateman	
MEMBRANE FORMATION, MODIFICATION, AND PRODUCTION	
7. Phase Inversion Membranes	131
R. E. Kesting	
8. Production of Microporous Media by Phase Inversion Processes	165
H. Strathmann	
9. Role of Microphase Separation Phenomena in the Formation of Porous Polymeric Membranes	197
Kenji Kamide and Sei-ichi Manabe	
10. Microporous Membranes via Upper Critical Temperature Phase Separation	229
W. C. Hiatt, G. H. Vitzthum, K. B. Wagener, K. Gerlach, and C. Josefiak	
11. Asymmetric Membranes for Gas Separations	245
Heinz Finken	
12. Evolution of Composite Reverse Osmosis Membranes	273
John E. Cadotte	
13. Dependence of Dynamic Membrane Performance on Formation Materials and Procedures	295
H. Garth Spencer	
14. Hollow Fiber Membrane Research: Morphology, Pervaporation, Gas Separation, and Durability Problems	305
Israel Cabasso	

MEMBRANE CHARACTERIZATION

15. New Characterization Methods for Asymmetric Ultrafiltration Membranes.....	327
C. A. Smolders and E. Vugteveen	
16. Pore Volume Distribution in Ultrafiltration Membranes.....	339
Leos Zeman and Gabriel Tkacik	
17. Partial Solubility Parameter Characterization of Interpenetrating Microphase Membranes.....	351
Sonja Krause	
18. Structure and Properties of Perfluorinated Ion-Exchange Membranes.....	365
Thein Kyu	

MEMBRANES FOR SPECIFIC APPLICATIONS

19. Ethanol-Water Separation by Countercurrent Reverse Osmosis.....	409
Eric K. L. Lee, W. C. Babcock, and P. A. Bresnahan	
20. Electrically Conductive Membranes Based on Polyacetylene Chemistry.....	429
Ken B. Wagener	
21. Biofunctional Synthetic Membranes.....	447
Masuo Aizawa	
Author Index.....	483
Subject Index.....	483
