Contributors vii Preface ix Acknowledgements xi

Part I Role of genetic resource collections in research and breeding

- 1 Germplasm collections and the public plant breeder
K. S. Gill 3
- 2 Germplasm collections and the private plant breeder
J. S. C. Smith & D. N. Duvick 17
- 3 Germplasm collections and the experimental biologist
R. G. Palmer 32

Part II Use of collections

- 4 International use of a sorghum germplasm collection
K. E. Prasada Rao, M. H. Mengesha & V. G. Reddy 49
- 5 Current use of potato collections
J. G. Th. Hermesen 68
- 6 Use of collections in cereal improvement in semi-arid areas
J. P. Srivastava & A. B. Damania 88
- 7 Limitations to the use of germplasm collections
D. R. Marshall 105

Part III Size and structure of collections

- 8 The case for large collections
T. T. Chang 123
- 9 The case for core collections
A. H. D. Brown 136
- 10 The role of networks of dispersed collections
P. M. Perret 157

Part IV Evaluation

- 11 Characterisation and evaluation of okra
S. Hamon & D. H. van Sloten 173
- 12 Evaluation of cereals in Europe
G. Fischbeck 197

13	Evaluating the germplasm of groundnut (<i>Arachis hypogaea</i>) and wild <i>Arachis</i> species at ICRISAT <i>J.P. Moss, V. Ramanatha Rao & R.W. Gibbons</i>	212
14	Practical considerations relevant to effective evaluation <i>J.T. Williams</i>	23
15	Principles and strategies of evaluation <i>O.H. Frankel</i>	24
Part V Wild relatives of crops		
16	Collection strategies for the wild relatives of field crops <i>C.G.D. Chapman</i>	26
17	Wild relatives as sources of disease resistance <i>J.J. Burdon & A.M. Jarosz</i>	28
18	Ecological and genetic considerations in collecting and using wild relatives <i>G. Ladizinsky</i>	29
Part VI Technological or scientific innovations that affect the use of genetic resources		
19	<i>In vitro</i> conservation and germplasm utilisation <i>L.A. Withers</i>	30
20	Screening for resistance to diseases <i>P.H. Williams</i>	33
21	Restriction fragments as molecular markers for germplasm evaluation and utilisation <i>R. Bernatsky & S.D. Tanksley</i>	3
22	Molecular biology and genetic resources <i>W.J. Peacock</i>	3
