Contributors	vii
Foreword	
Nina Strömberg Allen	ix
Preface	
Wendy F. Boss and D. James Morré	xi
1. Second Messengers: Their Existence and Relationship to Protein Kinases	
D.P. Blowers and A.J. Trewavas	1
2. Phosphoinositide Metabolism: Its Relation to Signal Transduction in Plants	
Wendy F. Boss	29
3. The Role of Calcium and Calmodulin in Signal Transduction	
Dieter Marmé	57
4. Stimulus-Response Coupling in Auxin Regulation of Plant Cell Elongation	
D. James Morré	81
5. Plasma Membrane Redox Reactions Involved in Signal Transduction	
Frederick L. Crane	115
6. pH as a Second Messenger in Plants	
Hubert Felle	145
7. Ether Phospholipid Platelet-Activating Factor (PAF) and a Proton-Transport-Activating Phospholipid (PAP): Potential New Signal Transduction Constituents for Plants	
Günther F.E. Scherer	167
8. Membrane-Derived Fatty Acids as Precursors to Second Messengers	
James Michael Anderson	181
9. The Vacuole: A Potential Store for Second Messengers in Plants	
Alain M. Boudet and Raoul Ranjeva	213
10. Primary Signals and Second Messengers in the Reaction of Plants to Pathogens	
Thomas Boller	227
11. Acetylcholine as a Signaling System in Plants	
E. Hartmann and R. Gupta	257

12. The Potential for Second Messengers in Light Signaling	
Benjamin A. Horwitz	289
13. Second Messengers and Gene Expression	
Tom J. Guilfoyle	315
Index	327
