LIST OF CONTRIBUTORS v

PREFACE vii

Interactions between Bacteria and Plants in the Root Environment

J. M. LYNCH

1. Introduction	1
2. Anatomy of the Rhizosphere and Microbial Community	
Structure	2
3. Provision of Substrates for Microbial Growth in the	
Rhizosphere	7
4. Microbial Growth Kinetics and Mathematical Models of the	
Rhizosphere	8
5. The Chemostat as a Rhizosphere Model.	10
6. The Role of Bacteria in Ion Uptake by Roots	10
7. Competition between Bacteria and Roots for Oxygen	11
8. Provision by Bacteria of Growth Regulators and	
Phytotoxins to Roots	12
9. The Nutrient Film Technique	13
10. Are Non-symbiotic Bacteria-Root Interactions of	
Agronomic Significance?	14
11. Conclusion	19
12. Summary	19
13. References	20

Nitrogen Fixation by Free-living Bacteria Associated with Plants— Fact or Fiction?

MARGARET E. BROWN

1. Introduction	25
2. Bacterial Fertilizers	26
3. Biological Nitrogen Fixation in Temperate Zones.	26
4. Biological Nitrogen Fixation in Tropical or Subtropical	
Areas	29
5. The Acetylene Reduction Technique for Assessing	
Nitrogenase Activity	32
6. The Rhizosphere as a Site for Nitrogen Fixation	34

CONTENTS

7. Genetic Manipulation to Improve Nitrogen Fixation.	36
8. General Conclusions.	37
9. References	38

Symbiotic Nitrogen Fixation in Plants

J. E. BERINGER, N. BREWIN AND A. W. B. JOHNSTON

1. Introduction	43
2. Nitrogen Fixation.	44
3. The Range of Symbiotic Nitrogen-fixing Associations	45
4. References	49

Entry and Establishment of Pathogenic Bacteria in Plant Tissues

EVE BILLING

1. Introduction	51
2. Entry into Host Tissue	52
3. Survival and Growth of Bacteria in the Intercellular Environment	53
4. The Interacting Surfaces in Intercellular Spaces	55
5. Host-Bacterium Interactions	58
6. Roles of Bacterial Cell Components	60
7. Conclusions	66
8. References	66

The Progression of Bacterial Disease Within Plants

T. F. PREECE

1. Introduction	71
2. Symptoms of Bacterial Disease in Plants	73
3. Microscopy of Diseased Plant Tissues	76
4. Numbers of Bacteria Involved.	77
5. The Extent of Bacterial Infection within Plants	79
6. Bacteria in Plant Senescence and Decay	80
7. References	81

Interaction of Wall-free Prokaryotes with Plants

M. J. DANIELS, D. B. ARCHER AND W. P. C. STEMMER

1. Introduction	85
2. The Diversity of Plant Mycoplasma Habitats	86
3. Comparative Properties of Plant Mycoplasmas	88
4. Growth of Mycoplasmas in Plants	89
5. Spread of Mycoplasmas in Plants.	91
6. Parameters Affecting Spread and Growth	93

7. Biochemistry of Symptom Production in Diseased Plants	94
8. References	97

**The Biology of the Crown Gall—A Plant Tumour Induced
by *Agrobacterium tumefaciens***

A. G. HEPBURN

1. The Molecular Basis of Tumorigenicity	101
2. The Infection Process	106
3. Plant Regeneration and the Fate of the T-DNA	109
4. Genetic Engineering Prospects	111
5. References	111

Bacterial Diseases of Food Plants—An Overview

CONSTANCE M. E. GARRETT

1. Introduction	115
2. Isolation and Detection of Bacteria	117
3. Identification Methods	118
4. Economic Importance	120
5. Control Measures.	123
6. Conclusions	129
7. References	130

**The Effect of Bacteria on Post-harvest Quality of Vegetables
and Fruits, with Particular Reference to Spoilage**

BARBARA M. LUND

1. Introduction	133
2. Defects Caused by Bacteria.	134
3. The Mechanism of Maceration of Plant Tissue by Soft-rot Bacteria.	137
4. Factors Affecting Post-harvest Spoilage by Bacteria	140
5. Control of Bacterial Spoilage	145
6. Conclusions	147
7. References	148

**The Production of Foods and Beverages from Plant Materials by
Micro-organisms**

J. G. CARR

1. Introduction	155
2. Beverages and Condiments.	156
3. Brined and Acidified Products	163
4. Conclusions	166
5. References	166

Contamination of Food Plants and Plant Products with Bacteria of Public Health Significance

DIANE ROBERTS, G. N. WATSON AND R. J. GILBERT

1. Introduction	169
2. Implication of Foods of Plant Origin in Incidents of Botulism	171
3. Contamination of Foods of Plant Origin	172
4. Source of Organisms	186
5. Survival on Plant Foods	188
6. Discussion	190
7. References	191

Bacteria in Frozen Vegetables

M. J. M. MICHELS

1. Introduction	197
2. Composition of the Bacterial Flora	199
3. Organisms of Public Health Significance	201
4. Effects of Processing on Bacterial Counts of Blanched Vegetables	202
5. Effects of Processing on Bacterial Counts of Unblanched Vegetables	206
6. Effects of Processing on Bacterial Counts of Prepared Vegetables	210
7. Bacterial Counts of Blanched Vegetables	211
8. Bacterial Counts of Unblanched Vegetables	213
9. Significance of Bacterial Counts of Frozen Vegetables	213
10. References	217

Toxic Bacterial Dusts Associated with Plants

MIRJA S. SALKINOJA-SALONEN, ILKKA HELANDER AND

RAGNAR RYLANDER

1. Introduction	219
2. Bacteria in Vegetable Dusts	220
3. Biological and Chemical Methods of Measuring the Amounts of Bacteria and Endotoxins in Vegetable Dusts	220
4. Inhalation Effects of Gram Negative Bacteria and Endotoxins	223
5. Summary	231
6. References	231

**Light Microscope Techniques for the Microbiological Examination of
Plant Materials****A. M. PATON**

1. Introduction	235
2. The Examination of Plant Surfaces	236
3. References	243
Selected Abstracts of Papers Presented at the Summer Conference . . .	245
SUBJECT INDEX	255
