	Page
Preface	ix
Acknowledgements	xi
<i>Plenary lecture</i>	
The genetic manipulation of antibiotic production in <i>Streptomyces</i>	1
M. J. Bibb	
Part I: Genetic and Biochemical Variation in Culture	
Variation in the secondary metabolism of cultured plant cells	15
P. R. Holden, M. A. Holden & M. M. Yeoman	
DNA methylation as a control phenomenon in plant cell culture	31
A. Stafford, R. C. Cresswell, A. Blakemore, P. Harrison, C. Wells & N. Jeyaraj	
Aspects of sesquiterpene phytoalexin formation in elicited cell suspension cultures of <i>Nicotiana tabacum</i> : accumulation, metabolism and enzymology	41
D. R. Threlfall & I. M. Whitehead	
The use of metal ions to induce the formation of secondary products in plant tissue culture	51
D. R. Threlfall & I. M. Whitehead	
Elicitation of cell cultures	57
M. A. Holden, P. R. Holden & M. M. Yeoman	
The effects of fungal elicitation on secondary metabolism in cell cultures of <i>Capsicum frutescens</i>	67
P. R. Holden, M. A. Holden & M. M. Yeoman	

Perturbation of alkaloid biosynthesis in transformed root cultures of solanaceous plants by metabolic precursors and their analogues

N. J. Walton, R. J. Robins, N. J. Belshaw, A. J. Parr, J. D. Hamill & M. J. C. Rhodes

Rapid assay of tryptophan decarboxylase from plant cell cultures

E. J. M. Pennings, R. van der Bosch, R. van der Heijden, T. van der Leer & R. Verpoorte

Part II: Improvement by Screening and Selection

Strain improvement by screening and selection techniques
M. J. C. Rhodes, J. D. Hamill, A. J. Parr, R. J. Robins & N. J. Walton

Screening of calli and compact globular structures of *Cinchona ledgeriana* for production of quinoline alkaloids
S. S. Hoekstra, P. A. A. Harkes, R. Verpoorte & K. R. Libbenga

Exploiting variation in tropane alkaloid production by solanaceous plants

A. J. Parr, J. D. Hamill, J. Payne, M. J. C. Rhodes, R. J. Robins & N. J. Walton

Changes in growth and nutritional requirements of cultured *Nicotiana tabacum* cv. Wisconsin-38 cells with increasing dependency upon photosynthesis for the provision of organic constituents

M. C. Hobbs & M. M. Yeoman

Part III: Improvement by Genetic Manipulation

Plant genetic transformation methods
J. D. Hamill

Prospects for the genetic manipulation of complex metabolic pathways

K. Lindsey

Chromosome stability in transformed hairy root cultures and the properties of variant lines of *Nicotiana rustica* hairy roots

E. L. H. Aird, J. D. Hamill, R. J. Robins & M. J. C. Rhodes

Foreign gene insertion into transformed roots with binary vectors and <i>Agrobacterium rhizogenes</i> – potential for genetic manipulation of secondary metabolism	145
J. D. Hamill, D. M. Evans, R. J. Robins & M. J. C. Rhodes	
Part IV: Biotechnology for Food Flavours and Colours	
The value of plant biotechnology to the flavour industry	155
S. E. M. Pearce	
Fatty acid synthesis in <i>Theobroma cacao</i> beans and suspension cultures	169
C. Foster, R. Leathers, M. End, A. H. Scragg, G. Pettipher & P. Hadley	
Propenylcysteine sulfoxide biosynthesis in callus cultures of <i>Allium cepa</i> (L)	177
D. Musker, H. A. Collin, G. Britton & G. Ollerhead	
Essential oil accumulation in shoot proliferation cultures of <i>Pelargonium</i> spp.	187
B. V. Charlwood & C. Moustou	
The accumulation of flavour compounds by cultures of <i>Zingiber officinale</i>	195
K. A. Charlwood, S. Brown & B. V. Charlwood	
Part V: Biotechnology for Producing Fine Chemicals	
Medicinal products through plant biotechnology	201
M. F. Roberts	
Effects of elicitors on the production of secondary metabolites in plant cell cultures of <i>Cinchona</i> , <i>Rubia</i> , <i>Morinda</i> and <i>Tabernaemontana</i>	217
R. van der Heijden, R. Verpoorte & P. A. A. Harkes	
Selection of thiophene-producing calli of <i>Tagetes patula</i> in relation to the production of thiophenes in liquid cultures	225
D. H. Ketel	
Thiophene production from “hairy roots” of <i>Tagetes</i>	233
R. J. Westcott	
Transformed root cultures – fermentation aspects	239
M. G. Hilton, P. D. G. Wilson, R. J. Robins & M. J. C. Rhodes	

Part VI: Techniques

Flow cytometry and cell sorting as tools for culture improvement

A. Lister

Red beet batch culture. Demonstration of a bubble-free Taylor-Couette bioreactor

D. A. Janes, N. H. Thomas & J. A. Callow

Co-immobilization of urease and microbial cells

M. D. Trevan, I. Simpkins & A. L. Mak

The axenic isolation of plant protoplasts using Percoll

P. J. Whitney & H. F. Beuschel

Assay of gene expression by immunodetection

A. S. Kang, S. J. Abbott & N. Harris

Electropermeabilization and ultrasonic techniques for harvesting secondary metabolites from plant cells *in vitro*

C. S. Hunter & N. J. Kilby

Rapid identification of secondary products in plant cell cultures by thermospray liquid chromatography/mass spectrometry

F. A. Mellon

Species Index
