

Table of Contents

PREFACE TO THE FIRST EDITION	v
PREFACE TO THE SECOND EDITION	vi
1 INTRODUCTION	1
2 GERMINATION	5
Seed structure, chemical composition and metabolism	
Hydration phase of germination	
Phase of activated metabolism and growth	
Interrelationship between the growing seedling and the storage tissues	
3 ENERGY ECONOMY	30
Introduction	
Energy flow in the plant	
Energy conversion in photosynthesis—quantum efficiency	
Photosynthesis of a crop—crop efficiency	
4 WATER RELATIONS	42
Water relations of plant cells	
Water relations of whole plants	
5 MINERAL NUTRITION	73
Introduction	
Mineral nutrients in the soil	
Salt uptake and transport within the root	
Mineral element deficiencies	
Tolerance to heavy metals	
6 TRANSPORT OF METABOLITES	88
The transporting system	

	The composition of xylem and phloem sap	
	The mechanism of phloem translocation	
	The transport of stimuli and hormones	
7	RESISTANCE TO DESICCATION AND FROST	111
	Resistance to desiccation (drought hardiness)	
	Resistance to cold (frost hardiness)	
8	GROWTH: PROGRESS AND PATTERN	129
	The definition and measurement of growth	
	Localization of growth in space and time	
	Conditions necessary for growth	
	Growth rates	
	Morphogenesis	
9	CELL GROWTH AND DIFFERENTIATION	155
	Cell division	
	Cell expansion	
	Cell differentiation	
	Patterns of differentiation	
10	GROWTH MOVEMENTS	189
	Tropisms	
	Geotropism	
	Phototropism	
	Nastic movements	
11	VEGETATIVE DEVELOPMENT	214
	Morphogenesis	
	Initiation of lateral roots and buds	
	Leaf initiation and growth	
	Apical dominance	
	Bud dormancy	
	Leaf senescence and leaf abscission	
	Photomorphogenesis	
12	REPRODUCTIVE DEVELOPMENT	233
	Introduction	
	Flowering	
	Fertilization	
	Fruit development	
	Embryo development	
	Seed dormancy	
	UNITS OF MEASUREMENT—CONVERSION TABLE	268
	INDEX	269
