

Contents

Preface.....	vii
Contents.....	xi
Introduction.....	1
Part I: Cytological background.....	3
Chapter 1: The sporophyte generation	
A. Mitosis - the dividing cell	
a. Preliminary.....	5
b. Interphase.....	7
c. Prophase.....	8
d. Metaphase.....	8
e. Anaphase.....	9
f. Telophase.....	10
B. Basic number and polyploidy.....	11
C. Aneuploidy and supernumeraries.....	18
D. Sex chromosomes.....	21
E. Karyotype - chromosome form and size.....	23
Chapter 2: The gametophyte generation	
A. Meiosis - the reduction division	
a. The male gametophyte.....	28
I. The first meiotic division	
1. Prophase I.....	28
2. Metaphase I.....	32
3. Anaphase I.....	32
4. Telophase I.....	33
5. Interphase.....	33
II. The second meiotic division	
1. Prophase II.....	34
2. Metaphase II.....	34
3. Anaphase II.....	34
4. Telophase II and interphase.....	35
III. Pollen mitosis and pollen grains.....	35
IV. Asynapsis, desynapsis and cytomixis.....	36
b. The female gametophyte.....	38
B. Meiosis in structural hybrids.....	39
C. Meiosis in polyploids and aneuploids.....	53

D. Meiosis in agmatoploids	61
E. Diaspore formation	
a. Fertilization and seed formation	62
b. Asexual reproduction	65
I. General	65
II. Asexual seed formation in angiosperms	66
III. Asexual spore formation in ferns	69
Part II: Material for cytological study	
Chapter 1: Introduction	73
Chapter 2: Mitotic material	
A. General	76
B. Recommended tissues	
a. Root-tips	76
b. Germinating seeds	77
c. Cork cambium of trees	78
C. Other tissues	
a. The shoot apex	78
b. The leaf tip	79
c. Corolla in flower-buds	79
d. Tillers of grasses	79
e. Maturing ovules	80
f. Staminal hairs	80
g. Other tissues	80
Chapter 3: Meiotic material	81
Part III: Basic equipment	83
Chapter 1: Microscope and accessories	85
Chapter 2: Record book	87
Chapter 3: Implements for fixing	89
Chapter 4: Tools for staining and mounting	90
Part IV: Techniques of observation	91
Chapter 1: Looking at chromosomes	93
Chapter 2: Studying the karyotype	95
Chapter 3: Size of pollen and stomata	98
Chapter 4: Pollen fertility	100
Part V: Cytotechnology	103
Chapter 1: General remarks	105
Chapter 2: Squashing techniques	
A. Tissues of the sporophyte	
a. Pretreatment	107

b. Fixation	108
c. Hydrolysis or maceration	109
d. Staining	109
e. Squashing	110
f. Rapid techniques	110
g. Double staining	111
h. A technique for chromosome morphology	112
B. Tissues of the gametophyte	
a. Pollen mother cells	112
b. Embryo-sac mother cells	114
c. Mature embryo-sacs	114
d. Endosperm	115
Chapter 3: Sectioning techniques	
A. Introduction	116
B. Fixation, dehydration and infiltration	116
C. Embedding	118
D. Sectioning	119
E. Removing the paraffin	120
F. Staining	
a. The crystal violet method	121
b. Heidenhain's haematoxylin	123
c. The Feulgen method	123
d. Double staining	124
Chapter 4: Sealing and mounting	
A. Introduction	126
B. Temporary sealing	126
C. Permanent mounting	127
Chapter 5: Miscellaneous procedures	
A. Restaining old slides	130
B. Dried-out fixations	130
C. Dry preservation	131
D. Storage of pollen	132
E. Recycling coverslips	132
F. Mixing alcohol	133
G. Etching slides	133
Part VI: Publishing the results	135
Appendix I: Some standard recipes	139
Chapter 1: Fixing solutions	
A. Alcoholic fixatives	
a. Farmer's fluid	141

b. Carnoy's fluid	141
c. Cutter's fluids	142
d. Newcomer's fluid	142
B. Formalin fixatives	
a. Navashin's fluid	143
b. The Svalöv modification.	143
c. Randolph's modification	144
d. Hill and Myer's modification.	144
e. Langlet's modification	145
f. Levitksky's fluids.	145
g. Bouin-Allen's fluid	146
h. Hagerup's fluid.	146
C. Osmic acid fixatives	
a. Flemming's fluids	147
b. La Cour's fluids.	148
D. Other fixatives	
a. Östergren and Heneen's fluid	148
b. Levan's fluid	149
Chapter 2: Some common stains	
A. Acetic stains	150
B. Other stains	
a. Crystal violet	151
b. Crystal violet with anilin.	151
c. Heidenhain's haematoxylin	151
d. Feulgen's leuco-basic fuchsin	151
e. Light green.	152
f. Fast green.	152
C. Other solutions	
a. 8-hydroxyquinoline.	153
b. Coumarin, α -monobromonaphthalene, and paradichloro- benzene	153
c. Colchicine	153
d. Gram's iodine	153
e. SO ₂ water.	154
Chapter 3: Sealing and mounting media	
A. Semipermanent sealing	
a. Paraffin-mastic	155
b. Aceto-gelatin.	155

c. Polyethylene-glycol	155
d. Gold size	155
B. Permanent mounting	
a. Canada balsam	156
b. Euparal	156
c. Permout	156
Chapter 4: Miscellaneous	
A. Mayer's albumen	157
B. Müntzing's aceto-carmin-glycerin	157
C. Immersion oil	157
Appendix II: Bibliography	159
A. Current chromosome atlases.	161
B. Some cytogenetics and evolution texts consulted.	161
C. Cytotechnological texts consulted.	163
D. Some other texts recommended	164
E. Other literature cited	165
Index	175
