

Contents

1. Background and Character of Natural Products Chemistry	2
2. Primary Metabolic Processes	20
3. Compounds Formed by Linear Combination of Two-Carbon Units	60
4. Compounds Formed by Cyclization of Polyketide Chains.	92
5. Compounds Derived from Shikimic Acid	136
6. Extension of the Phenylpropanoid Unit: $C_6-C_3-(C_2)_x$ Compounds	168
7. Flavonoid Compounds	182
8. Terpenoid Compounds	232
9. Sesquiterpenes	268
10. Diterpenoid Compounds	290
11. Higher Terpenoids	312
12. Metabolic Degradation of Triterpenes	336
13. Isoprenoid Compounds of Non-mevalonate Origin	360
14. Oxidative Coupling of Phenols	372
15. Miscellaneous Oxidative Processes	408
16. General Aspects of Alkaloid Biosynthesis. Alkaloids Derived from Ornithine, Lysine, and Nicotinic Acid	428
17. Simple Alkaloids Derived from the Aromatic Amino Acids Phenylalanine, Tyrosine, Tryptophan, and Anthranilic Acid	464
18. Oxidative Phenol Coupling in Alkaloid Biosynthesis	488
19. Alkaloids of Mixed Amino Acid-Mevalonate Origin. Terpenoid Alkaloids	530
