Preface	vi
Acknowledgements	viii

## Part 1 Basic considerations

1	Introduction	3
	Definitions • The importance of the plant cover • Plant classification Plant nomenclature • Discussion section • References	
2	Initial approaches to vegetation study	11
	Introduction • Sampling • Physiognomic methods • Dominant species Floristic methods • Discussion section • References	
3	Initial approaches to soil study	28
	Definitions • Pedogenic factors • The study of soil exposures Laboratory treatments • Soil acidity and base exchange • Soil water Soil gases and nutrient cycles • Discussion section • References Appendix 3.1: Pedogenic factors	
4	Plant dynamics and the nature of vegetation	50
	Introduction • Primary plant succession • Secondary plant succession Monoclimax and polyclimax theory • Gradient analysis and the continuum The nature of natural vegetation • Discussion section • References	
5	Ecosystems	72
	Introduction • The structure of ecosystems • Energy patterns Homeostatic mechanisms • Population controls in ecosystems The ecological niche • Ecological efficiency • Ecosystem productivity Man in the ecosystem • Discussion section • References	
6	Ecological factors and environmental variations	94
	Introduction • Tree-line studies • The ecology of fire Discussion section • References	
7	Disturbed ecosystems	129
	Introduction • Interrelationships in animal communities Forms of disturbance • Control methods • Rapid land-use changes Discussion section • References	

## Part 2 Selected examples from the British Isles

8	The Vegetation	156
	Introduction • The climax vegetation • Palynology • Woodlands Upland moors • Discussion section • References	
9	The soils	206
	Introduction • Main soil types • The regional pattern • Soil survey and mapping Late-glacial and Flandrian changes • Discussion section • References	
10	The impact of man	236
	Introduction • The legacy of human interference • Present and future impact Problems of multiple land use • Conservation problems Discussion section • References	
	General Index	261
	Species Index	269
