Preface vii

List of contributors ix

I The Control of Metabolism 1

1 Fundamentals of gene structure and control 3
D. D. Lefebvre

2 Regulation of gene expression during development 16
R. Casey

3 Biochemical regulation 28
W. Plaxton

4 Regulation by compartmentation 45
D. T. Dennis and M. J. Emes

II Cytosolic Carbon Metabolism 57

5 Carbohydrate synthesis and degradation 59
N. J. Kruger

6 Glycolysis, the oxidative pentose phosphate pathway and anaerobic respiration 77
J. A. Miernyk

III Mitochondrial Metabolism 101

7 Mitochondrial structure 103
W. Newcomb

8 Carbon metabolism in mitochondria 106
T. ap Rees

9 Oxidation of mitochondrial NADH and the synthesis of ATP 124
H. Lambers

IV Mitochondrion-Cytosol Interaction 145

10 The mitochondrial genome and its expression 147
M. Gray

11 Protein import into the mitochondrion 160
K. Freeman, S. Reichling and A. Balogh

12 Metabolite exchange between the mitochondrion and the cytosol 173
R. Douce and M. Neuburger

V Photosynthesis 191

13 Plastid structure and development 193
W. Newcomb

14 Molecular biology of photosynthesis in higher plants 198
J. Mullet

15 The formation of ATP and reducing power in the light 212
N. Nelson and B. Prezelin

16 Ribulose 1,5-bisphosphate carboxylase/oxygenase: mechanisms, activation and regulation 224
R. G. Jensen

17 The reductive pentose phosphate pathway and its regulation 249
F. D. Macdonald and B. B. Buchanan

18 Photorespiration and CO₂-concentrating mechanisms 263
D. T. Canvin

19 The flux of metabolites in C₄ and CAM plants 284
R. C. Leegood and C. B. Osmond

VI Chloroplast-Cytosol Interactions 309

- 20 Transport of proteins into chloroplasts 311
K. Keegstra
- 21 The flux of carbon between the chloroplast and the cytosol 319
M. Stitt

VII The Formation and Breakdown of Lipids 339

- 22 The structure and formation of microbodies 341
C. Halpin and M. Lord
- 23 Fatty acid and lipid biosynthesis and degradation 351
J. E. Andrews and J. Ohlrogge
- 24 Terpene biosynthesis and metabolism 363
C. A. West

VIII Nitrogen Metabolism 381

- 25 The molecular biology of N metabolism 383
C. P. Vance and S. M. Griffith

- 26 N_2 fixation, NO_3^- reduction and NH_4^+ assimilation 399
D. B. Layzell

- 27 Amino acid and ureide biosynthesis 417
R. Ireland

- 28 Interactions between nitrogen assimilation, photosynthesis and respiration 430
D. H. Turpin and H. G. Weger

- 29 Long-distance transport of carbon and nitrogen from sources to sinks in higher plants 442
M. Peoples and R. Gifford

- 30 Protein turnover 456
P. M. Hatfield and R. D. Vierstra

- 31 Protein storage and utilization in seeds 464
J. D. Bewley and J. S. Greenwood

IX Prospects for Plant Improvement 479

- 32 Fundamentals of gene transfer in plants 481
B. Miki and V. N. Iyer
- 33 The biochemical basis for plant improvement 498
C. R. Somerville

Index 511
