

Contents

Contributors	xi
Preface	
Joe L. Key and Tsune Kosuge	xvii
 THE RESPONSES OF PLANTS TO ENVIRONMENTAL STRESSES	
Aberrant Ratio Revisited	
Oliver E. Nelson	1
The Impact of Plant Stresses on Crop Yields	
Yoash Vaadia	13
Loss in Chloroplast Activity at Low Leaf Water Potentials in Sunflower: The Significance of Photoinhibition	
Robert E. Sharp and John S. Boyer	41
Molecular Mechanisms of Compensation to Light Stress in Chloroplast Membranes	
David J. Kyle, Itzhak Ohad, and Charles J. Arntzen	51
Betaine Accumulation: Metabolic Pathways and Genetics	
Andrew D. Hanson and Rebecca Grumet	71
Polyamine Metabolism and Plant Stress	
Hector E. Flores, Nevin D. Young, and Arthur W. Galston	93
Regulation of the Osmotically Stimulated Transport of Proline and Glycinebetaine in <i>Salmonella typhimurium</i>	
Virginia Joan Dunlap and Laszlo N. Csonka	115
Effect of Salinity on Growth and Maintenance Costs of Plant Cells	
Suzan J. Stavarek and D. William Rains	129
The Molecular Response of Cadmium Resistant <i>Datura innoxia</i> Cells to Heavy Metal Stress	
Paul J. Jackson, Cleo M. Naranjo, Peter R. McClure, and E. Jill Roth	145
The Heat Shock Response in Soybean	
Joe L. Key, Janice A. Kimpel, Chu Yung Lin, Ronald T. Nagao, Elizabeth Vierling, Eva Czarnecka, William B. Gurley, James K. Roberts, Michael A. Mansfield, and Leonard Edelman	161
Structure and Expression of Maize HSP 70 Gene	
Dilip M. Shah, Dean E. Rochester, Gwen G. Krivi, Cathy M. Hironaka, Thomas J. Mozer, Robert T. Fraley, and David C. Tiemeier	181
Potato Cold Hardiness and Freezing Stress	
Paul H. Li	201
<i>Adh1</i> and <i>Adh2</i>: Two Genes Involved in the Maize Anaerobic Response	
M.M. Sachs, E.S. Dennis, J. Ellis, E.J. Finnegan, W.L. Gerlach, D. Llewellyn, and W.J. Peacock	217

Energy Metabolism and Synthesis of Nucleic Acids and Proteins Under Anoxic Stress	
Alain Pradet, Bernard Mocquot, Philippe Raymond, Christiane Morisset, Lorette Aspart, and Michel Delseny	227
RESPONSES OF PLANTS TO BIOLOGICAL STRESSES	
Induction of Hydrolases as a Defense Reaction Against Pathogens	
Thomas Boller	247
Induction of Ethylene Biosynthesis by Cell Wall Digesting Enzymes	
James D. Anderson, Edo Chalutz, and A.K. Mattoo	263
Induction of Glyceollin Biosynthesis in Soybeans	
Hans Grisebach, Helga Börner, Marie-Luise Hagmann, Michael G. Hahn, Joachim Leube, and Peter Moesta	275
The Induction of Disease Resistance by Heat Shock	
Bruce A. Stermer and Raymond Hammerschmidt	291
Expression of Latent Genetic Information for Disease Resistance in Plants	
Joseph Kuć	303
Pectic Fragments Regulate the Expression of Proteinase Inhibitor Genes in Plants	
Clarence A. Ryan, Paul D. Bishop, Mary Walker-Simmons, Willis E. Brown, and John S. Graham	319
The Role of Pectic Fragments of the Plant Cell Wall in the Response to Biological Stresses	
Charles A. West, Peter Moesta, Donald F. Jin, Augusto F. Lois, and Karen A. Wickham	335
Chemical Conjugation and Compartmentalization: Plant Adaptations to Toxic Natural Products	
Eric E. Conn	351
Genetic Control of Pathotoxin-Induced Stress in Plants	
David Gilchrist, Beverly McFarland, Deborah Siler, Steven Clouse, and Ann Martensen	367
Effects of Stress on the Defensive Barriers of Plants	
P.E. Kolattukudy and C.L. Soliday	381
Possible Molecular Basis of Immunity of Cowpeas to Cowpea Mosaic Virus	
Janet L. Sanderson, George Bruening, and Mary L. Russell	401
Plant Defense Responses to Viral Infections	
G. Loebenstein and Adina Stein	413
TMV Coat Protein Encapsidates Specific Species of Host RNA Both In Vivo and In Vitro	
D'Ann Rochon and Albert Siegel	435
Immunochemical Identification of Antigens Involved in Plant/Pathogen Interactions	
Jody J. Goodell, Paul L. DeAngelis, and Arthur R. Ayers	447
Induction by Elicitors and Ethylene of Proteins Associated to the Defense of Plants	
M.T. Esquerré-Tugayé, D. Mazau, B. Péliissier, D. Roby, D. Rumeau, and A. Toppan	459
Index	475
