

CONTENTS

1. Compartmentation in Plant Cells: The Role of the Vacuole	1
George J. Wagner	
2. The Nature of the Cyanide-Resistant Pathway in Plant Mitochondria.	47
James N. Siedow	
3. Metabolism in Plant Peroxisomes.	85
Anthony H. C. Huang	
4. The Role of Microtubules in Plant Cell Wall Growth	125
Myron C. Ledbetter	
5. Photosynthetic Carbon Metabolism in Chloroplasts	151
Steven C. Huber	
6. Carbon Metabolism in Guard Cells	185
William H. Outlaw, Jr.	
7. Cellular Aspects of C ₄ Leaf Metabolism	223
William H. Campbell and Clayton C. Black	
8. The Synthesis, Storage and Degradation of Plant Natural Products: Cyanogenic Glycosides as an Example.	249
Adrian J. Cutler and Eric E. Conn	
Index	273
