

Contents

1. Introduction	3
2. Immunoglobulin Structure and Evolution	13
3. The Genetics of Immunoglobulin Molecules	46
4. Antibody Variability	102
5. Membrane Antigens, Their Genes, and the Immune Response	134
6. Immunogenetics of the Human Blood Groups	178
7. Genetically Determined Immune Deficiency States	236

Appendices

1. Glossary of Immunological Terms	267
2. Blood Group Terminology	283
3. Standard Abbreviations for Immunological Terms	287
4. Methods for Detecting Antibodies	290

Index	293
