INTRODUCTION	1
---------------------	----------

CHLOROPHYLLS	3
---------------------	----------

Structure, 3

Physical Properties, 4

Chemical Properties, 4

Derivatives, 5

- Chlorophyllides, 5 ▪ Pheophytins *a* and *b*, 7 ▪
- Pheophorbides *a* and *b*, 7 ▪ Allomerized Chlorophylls, 7 ▪
- Pyrochlorophylls, 7

Analytical Methods, 8

- Extraction, 8 ▪ Chlorophyll Determination, 8 ▪ Separation of Plant Pigments, 13

The Chloroplast, 17

- Chemical Composition, 18 ▪ Development, 18 ▪
- Function, 19 ▪ The Photosynthetic Unit, 20 ▪
- Spectroscopic Properties of Chlorophyll *in vivo*, 21

Biosynthesis, 21

- Step 1. Formation of δ -Aminolevulinic Acid, 23 ▪ Step 2. Pyrrole (Porphobilinogen) Formation, 25 ▪ Step 3. Cyclic Tetrapyrrole Formation (Uroporphyrinogen III), 25 ▪ Step 4. Porphyrin Side-Chain Modifications, 26 ▪ Step 5. Oxidation of Protoporphyrinogen IX to Protoporphyrin IX, 26 ▪
- Step 6. Magnesium Chelation of Protoporphyrin IX to Mg Protoporphyrin IX, 27 ▪ Step 7. Esterification of Mg to Protoporphyrin IX, 27 ▪ Step 8. Isocyclic Ring Formation (Protochlorophyllide), 28 ▪ Step 9. Protochlorophyllide Reduction to Chlorophyllide, 28 ▪ Step 10. Esterification of Chlorophyllide *a*, 29 ▪ Step 11. Biosynthesis of Chlorophyll *b*, 30 ▪ An Alternative Chlorophyll Biosynthetic Pathway, 31

Distribution in Vegetables, 32

Asparagus, 33 ▪ Beans, 39 ▪ Broccoli, 42 ▪ Peas, 43 ▪
Potato, 44 ▪ Cucurbitaceae, 45

Degradation, 47

Leaf Senescence, 48 ▪ Enzymes Involved in Chlorophyll
Biodegradation, 50 ▪ Chlorophyll Bleaching—Lipoxygenase,
Peroxidases, and Oxidases, 51 ▪ Chlorophyll Turnover, 53 ▪
Influence of Stress Conditions on Chlorophyll
Degradation, 53 ▪ Degradation During Fruit Ripening, 56 ▪
Degradation During Processing and Storage of Green
Vegetables, 58 ▪ Stabilization of Chlorophylls in Processed
Green Vegetables, 66 ▪ Storage in Controlled
Atmosphere, 68 ▪ Food Coloring, 70

**Effect of Phytohormones on Chlorophyll Metabolism
in Vegetables, 71**

Cytokinins, 71 ▪ Gibberelin, 72 ▪ Ethylene, 73

CAROTENOIDS

75

Definitions and Nomenclature, 76

Structure and Classification, 77

Physical Properties, 79

Spectroscopic Properties, 79

Stereochemistry, 86

Geometrical Isomerism, 86 ▪ Absolute Configuration, 88

Chemical Properties, 90

Chemical Tests, 90

Oxidation, 92

Chemical Oxidation, 92 ▪ Autoxidation, 93 ▪
Photooxidation (Light Effect), 95 ▪ Enzymatic Oxidation, 96

Analytical Methods, 99

Extraction, 99 ▪ Saponification, 100 ▪ Quantitative
Determination, 100 ▪ Removal of Sterols, 101 ▪
Carotenoid Separation, 101

Identification, 112

Biosynthesis, 112

Formation of Mevalonic Acid, 113 ▪ Formation of
Geranylgeranyl Pyrophosphate, 114 ▪ Formation of
Phytoene, 116 ▪ Desaturation of Phytoene, 117 ▪
Formation of Cyclic Carotenes, 117 ▪ Formation of
Xanthophylls, 120

Functions, 121

- Photofunctions, 121 ▪ The Violaxanthin Cycle, 122 ▪
- Antioxidants, 123 ▪ Biological Function: Role of
- Carotenoids in Human Nutrition, 124

Uses, 128

- Colorants, 128 ▪ Medicinal Applications, 128

Localization, 130

- Chloroplasts, 130 ▪ Chromoplasts, 132

Carotenoids in Vegetables, 136

- Changes During Storage, Cooking, and Processing, 137 ▪
- Unique Carotenoids, 138

Carotenoid Distribution in Vegetables, 148

- Asparagus, 148 ▪ Balsam Pear, 150 ▪ Green Beans, 152 ▪
- Lima Beans, 153 ▪ Mung Beans, 153 ▪ Soybeans, 154 ▪
- Broccoli, 156 ▪ Cabbage, 163 ▪ Carrots, 164 ▪
- Cassava, 180 ▪ Cauliflower, 181 ▪ Cucumber, 182 ▪
- Lettuce, 182 ▪ Lupin, 185 ▪ Maize, 185 ▪ Pea, 193 ▪
- Chick-peas, 195 ▪ Pepper, 198 ▪ Potato, 208 ▪
- Sweetpotato, 216 ▪ Pumpkins and Squashes, 225 ▪
- Spinach, 237 ▪ Tomato, 242 ▪ Turnip and Swedish Turnip
- or Rutabaga, 248 ▪ Yam, 248

Factors Affecting Carotenoid Biosynthesis, 249

- Phytohormones, 249 ▪ Light, 250 ▪ Temperature, 250 ▪
- Fertilizers, 252 ▪ Pesticides, 253 ▪ Miscellaneous, 254

Appendix, 254
