Preface xv

Introduction: A Summary of *Silent Spring* xvii

In the Beginning

1. Rachel Carson: Her Vision and Her Legacy 3

by Shirley A. Briggs

Rachel Carson's Motives 4

Reaction to Silent Spring 6

The Comprehensive View 9

Regulatory Aspects

2. The Not So Silent Spring 15

by John A. Moore

Evolution of Government Regulation 16

Current Pesticide Registration Criteria 18

Alternatives to Pesticidal Chemicals 20

Conclusion 22

Glossary 24

3. The Science and Politics of Pesticides 25

by C. F. Wilkinson

The Changing Image of Pesticides 26

The Regulatory Decision-Making Process 28

Toxicology—A Science and an Art 31

Toxicological Evaluation 32

Assessment of Acute Toxicity 32

Carcinogenic Risk Assessment 34

Science or Politics? 37

Scientific Uncertainty and Regulatory Conservatism 39

Public Perception and Acceptance of Risk 42

Glossary 44

Specific Environmental Effects

4. Assessing the Toxicity of Pesticides to Aquatic Organisms 49
by D. R. Nimmo, D. L. Coppage, Q. H. Pickering, and D. J. Hansen
Hindsight: Silent Spring and Aquatic Resources 49
Heptachlor and a Host of Others: Still Found Where They Should Not Be 51
Have Environmental Residues Declined? 52
History: Coming of Age of the "Safe Concentration" Concept 52
Happenings: Fish Kills and Environmental Laws 54
How Little Is Too Much? 58
Henceforth 62
Glossary 65

5. Impact of Pesticides on Ground Water Contamination 71
by Robert F. Carsel and Charles N. Smith
Pesticide Leaching from Agricultural Fields 73
Description of the Problem 74
Specific Cases 76
Evaluation of Past and Present Pesticides 78
Future Issues 80
Glossary 82

6. Impact of Pesticides on Bird Populations 85
by Russell J. Hall
Early Studies 86
Research in the 1950s 87
Research Contemporary with Silent Spring 90
Major Research Findings After 1962 91
The Meaning of Pesticide Residues 91
Results of Toxicity Screening 94
Shell Thinning 95
Die-offs of Free-Living Birds 98
Long-term, Delayed, or Secondary Effects of Organophosphates and Carbamates 100
Appearance of Organochlorine Hot Spots 101
Wildlife Threats from Chemicals Other Than Pesticides 101
In Summary 102

<i>Work Left Undone</i>	102
<i>Significance of Die-offs Unknown</i>	102
<i>Interaction of Contaminants with Environmental Stresses</i>	104
<i>Population Effects of Pesticide Sprays</i>	104
<i>Effects in Other-Than-Prime Wildlife Habitats</i>	104
<i>Interactions of Chemicals</i>	105
<i>Environmental Effects</i>	105
<i>The Organochlorine Mentality</i>	105
<i>Glossary</i>	105

✓7. Human Health Effects of Pesticides 113

by J. E. Davies and R. Doon	
<i>Acute Pesticide Poisoning</i>	114
<i>Other Health Effects</i>	116
<i>Cancer Risks</i>	117
<i>Persistence</i>	118
<i>Residues in Food</i>	118
<i>Residues in Humans</i>	118
<i>Resistance</i>	120
<i>Disposal</i>	121
<i>The Years Ahead</i>	122

Overviews

8. Analytical Chemistry of Pesticides: Evolution and Impact 127

by Joseph D. Rosen and Fred M. Gretch	
<i>How Small Is Small?</i>	128
<i>The Analytical Chemist's Tasks</i>	128
<i>Evolution of Analytical Methodology</i>	128
<i>Colorimetric Determinations</i>	128
<i>Sample Cleanup</i>	129
<i>Bioassay Methods</i>	130
<i>Simultaneous Detection of Multiple Pesticides</i>	130
<i>Gas Chromatography (GC)</i>	131
<i>Gas Chromatography-Mass Spectrometry (GC-MS)</i>	136
<i>Analysis Versus Risk Assessment</i>	138
<i>Glossary</i>	141

✓ 9. Pesticides: Global Use and Concerns 145
by Virgil H. Freed
 Chemicals Used in Agriculture 146
 Pesticide Use 146
 Reasons for Use 146
 Kinds of Pesticides 147
 Level of Use 148
 Transport and Modeling of Pesticides 148
 Wind Transport 150
 Water Transport 150
 Biotic Transport 150
 Problems Encountered with Pesticides 151
 Human and Animal Poisoning 152
 Residues and Environmental Pollution 152
 Development of Resistance 153
 Disposal of Chemicals and Containers 153
 Concerns over Pesticide Use in the Third World 154
 Glossary 155

✓ 10. Agriculture, Pesticides, and the American Chemical Industry 159
by Gustave K. Kohn
 The Demographic Nature of American Agriculture 159
 A Conflict of Values 160
 Pesticides Produced by American Industry
 Before Silent Spring 162
 Pesticides Produced at the Time of Publication
 of Silent Spring 163
 The Newer Agrochemicals of the 1980s 165
 Technology and Farm Income 166
 Special Problems of the Third World and
 Use of Agrochemicals 168
 A Reassessment of Silent Spring 169
 Glossary 172

✓ 11. Is *Silent Spring* Behind Us? 175
by David Pimentel
 Fewer Pesticide Problems During the Past Two Decades 175

<i>Increased Pesticide Problems During the Past Two Decades</i>	178
<i>Human Poisonings</i>	178
<i>Domestic Animal Poisonings</i>	179
<i>Bee Poisonings</i>	179
<i>Crop Losses</i>	180
<i>Reduced Populations of Natural Enemies</i>	180
<i>Pesticide Resistance</i>	181
<i>Fishery Losses</i>	181
<i>Impacts on Wildlife and Microorganisms</i>	182
<i>Status of Integrated Pest Management</i>	182
<i>Why Are Losses Due to Pests Greater Today Than 40 Years Ago?</i>	183
<i>Conclusion</i>	184
<i>Glossary</i>	185

In Conclusion

12. Many Roads and Other Worlds	191
by Gino J. Marco, Robert M. Hollingworth, and William Durham	
<i>Chemicals To Control Pests</i>	192
<i>Risk Versus Benefit</i>	192
<i>Analysis of Pesticides</i>	193
<i>Evaluating Risk</i>	193
<i>Persistence of Pesticides</i>	194
<i>Effects of Pesticides</i>	195
<i>Response of Various Sectors</i>	196
<i>Different Sides of the Coin</i>	196
<i>Evaluation of Hazards</i>	197
<i>In Summation</i>	197

Appendix and Indexes

Appendix: Pesticide Names, Their Chemical Classes, and Their Principal Uses	203
Affiliation Index	205
Subject Index	205
