

Contents

Preface	VII
Acknowledgements	VIII
List of contributors	IX
Introduction	1
1. Sperm cell research: the current status and applications for plant breeding C.J. Keijzer, H.J. Wilms and H.L. Mogensen	3
Male gametogenesis	9
2. The plant sperm cell as a result of discriminating steps during gametogenesis M.T.M. Willemse	11
3. Generative cell polarization in <i>Plumbago zeylanica</i> S.D. Russell, G.W. Strout, R.A. Thompson, T.W. Mislán and L.M. Schoemann	17
4. The generative and sperm cells of <i>Euphorbia</i> pollen M. Cresti, M. Murgia, C. Milanesi, F. Ciampolini and A. Tiezzi	27
5. Confocal scanning laser microscopy of <i>Galanthus</i> generative cells H.J. Wilms, M. Murgia and E. A. van Spronsen	35
6. Intramembrane particle pattern in vegetative and generative plasma membranes of lily pollen grain and pollen tube A.M.C. Emons, M. Kroh, B. Knuiman and T. Platel	41
The male germ unit	49
7. The male germ unit: retrospect and prospects E. Matthys-Rochon and C. Dumas	51
8. The male germ unit of <i>Zea mays</i> in the mature pollen grain M.L. Rusche	61
9. Three-dimensional reconstruction of sperm cells and vegetative nucleus in pollen of <i>Gerbera jamesonii</i> E. Provoost, D. Southworth and R.B. Knox	69

10. Three-dimensional image and mitochondrial distribution in sperm cells of <i>Euphorbia dulcis</i> M. Murgia and H.J. Wilms	75
11. Immunolabeling of tubulin in mature pollen of spinach (<i>Spinacia oleracea</i>) C.H. Theunis and H.J. Wilms	81
Sperm cell isolation	85
12. Methods for isolation of sperm cells from pollen D. Southworth and R.B. Knox	87
13. Pollen quality in <i>Zea mays</i> as a prerequisite for sperm cell isolation and pollen transformation C. Kerhoas and C. Dumas	97
14. Isolation and viability of sperm cells from corn (<i>Zea mays</i>) and kale (<i>Brassica oleracea</i>) pollen grains P. Roeckel, I. Dupuis, S. Detchepare, E. Matthys-Rochon and C. Dumas	105
15. Isolation of sperm cells from the trinucleate pollen of sugar beet (<i>Beta vulgaris</i>) J.E. Nielsen and P. Olesen	111
Sperm cells and plant breeding	123
16. Selection and manipulation of pollen and sperm cells R.J. Bino and A.G. Stephenson	125
17. Perspectives of pollen and male gamete selection in cereals B. Barnabás and G. Kovács	137
18. Tracing sperm cells in styles, ovaries and ovules of <i>Lilium longiflorum</i> after pollination with DAPI-stained pollen C.J. Keijzer, M.C. Reinders, J. Janson and J.M. van Tuyl	149
Colour plates	153
