

## TABLE OF CONTENTS

Preface	iii
Introduction	1
Strain List	5
 SECTION I: EXPERIMENTS	
1. Isolation of Auxotrophic Tn <sub>10</sub> Insertions	13
2. Isolation of Tn <sub>10</sub> Insertions Near Particular Genes	21
3. Deletion Mutations Generated by Tn <sub>10</sub>	27
4. Local Mutagenesis	33
5. Isolation and Characterization of Point Mutants of Phage $\lambda$ Using Hydroxylamine	39
6. Isolation of Deletion Mutants of $\lambda$ amp	43
7. Deletion Mapping	45
8. Selection of $\lambda$ gt-his Clones by Complementation	49
9. Plaque Hybridization	55
10. Gel Hybridization	59
11. Electron Microscopy of DNA	61
12. Subcloning from $\lambda$ to a Plasmid Vector	63
13. Tn <sub>10</sub> -directed Insertion of F' <sub>ts</sub> lac <sup>+</sup>	65
 SECTION II: PROCEDURES	
1. Plaque Purification of Phage	70
I. Host Cells, 70	
II. Understreaking; Overstreaking, 70	
III. Picking Plaque, 71	
IV. Titering Phage, 71	

2. Preparation of Phage Stocks
  - I. Host Cells, 74
  - II. Plating Procedure, 74
  - III. Harvest, 74
3. Quick Method for the Preparation of P22 Transducing Phage
4. Purification of Phage
  - I. CsCl Block Density Gradients for Beckman SW 50.1 Rotor, 80
  - II. Equilibrium Gradient for SW 50.1 Rotor, 81
5. Tn10 Transposition
  - I. Production of Defective Transducing Phage from Strain NK337, 84
  - II. Adding Tails to P22 Heads, 85
  - III. Transposition Transduction, 87
6. Selection of Tet<sup>S</sup> Mutants from Strains Carrying Tn10
7. Red Plate Test for  $\lambda$  Phage with a Functional  $\beta$ -Lactamase Gene
8. Hydroxylamine Mutagenesis
  - I. Isolating Mutants in Phage or Cloned Gene, 94
  - II. Localized Mutagenesis by Cotransduction, 95
9. Selection of Deletion Mutants of  $\lambda$
10. Phage Recombination and Complementation Tests In Vivo
  - I. Standard Cross, 100
  - II. Complementation Test for Phage Growth, 101
  - III. Spot Test for Complementation of Phage ( $\lambda$  or P22) Mutants, 101
11. Extraction of DNA from Phage  $\lambda$ 
  - I. Formamide Method, 106
  - II. Rapid  $\lambda$  DNA Isolation, 109
  - III. Preparation of DNA from Temperature-inducible Sam7 Lysogens, 112

IV.	$\lambda$ DNA Strand Separation, 114	
12.	Isolation of Plasmid and Bacterial DNA	116
	I. Large-scale Isolation of <i>E. coli</i> Plasmid DNA, 116	
	II. A. Rapid Isolation of Plasmid and/or Bacterial DNA from Colonies or Broth, 120	
	B. Rapid Plasmid DNA Isolation for 10-ml Culture, 124	
13.	Removal of Ethidium Bromide from DNA in CsCl	126
14.	$\lambda$ gt Hybrid Formation	128
	I. DNA Cleavage, 128	
	II. Covalent Joining by T4 DNA Ligase, 128	
15.	Packaging $\lambda$ DNA into Viral Particles In Vitro	130
	I. Packaging Reaction, 130	
	II. Preparation of Induced Packaging Cells, 132	
16.	Transfection of $\lambda$ DNA	134
	I. Cell Growth, 134	
	II. Cell Preparation, 134	
	III. DNA Infection, 135	
	IV. Cell Storage, 135	
17.	Subcloning DNA Fragments into <i>E. coli</i> Plasmid Vectors	138
18.	Transformation with Plasmid DNA	140
19.	Hybrid Phage Complementation in <i>E. coli</i>	142
	I. Lytic Selection from Hybrid Pool, 142	
	II. Double-lysogen Selection from Hybrid Pool, 144	
20.	Agarose Gel Electrophoresis	148
	I. Agarose Gel, 148	
	II. Staining DNA in Agarose Gels for Nucleic Acid, 153	
	III. Photography of Gels Containing Nucleic Acids, 154	
	IV. Glyoxal Gels, 156	

21. Transfer of DNA to Nitrocellulose or Diazotized Paper
  - I. Transfer from Agarose Gels, 159
  - II. Transfer from Phage  $\lambda$  Plaques, 162
  - III. Transfer from Bacterial Colonies, 166
22.  $\alpha$ - $^{32}\text{P}$ -labeling of DNA by Nick Translation
  - I. Reaction, 168
  - II. Deoxynucleoside Triphosphates (dNTP), 169
  - III. DNase, 169
  - IV. Test for  $^{32}\text{P}$  Incorporation into DNA, 170
  - V. Recovery of Labeled DNA, 170
  - VI. General Remarks, 172
23. Hybridization to DNA or RNA on Solid Support
24. Autoradiography of  $^{32}\text{P}$  on Solid Support
25. Recovery of DNA from Agarose Gels
  - I. Glass Fiber Filter, 178
  - II. KI Equilibrium Density Gradient, 181
  - III. Electroelution of DNA into Hydroxylapatite, 182
26. Rapid Estimation of DNA Concentration Using Ethidium Bromide
  - I. Agarose Plate Method, 184
  - II. Plastic Wrap and Ring Method, 185
27. Electron Microscopy of DNA
  - I. Aqueous Procedure, 186
  - II. Formamide Procedure, 188
28. General Procedure for Heteroduplex Formation
  - I. Heteroduplex, 190
  - II. Electron Microscopy of Heteroduplex, 190
29. Preparation of Enzyme Fractions from  $\lambda$ cI857 Sam7 Lysogens
  - I. General Procedure, 192
  - II. Purification of DNA Polymerase I  
from E. coli 594 Lysate, 194
  - III. T4 DNA Ligase from E. coli E1150 Lysate, 196

### SECTION III: APPENDIXES

1. Media, Drug Concentrations, and Nutritional Supplements	201
I. Media, 201	
II. Drug Concentrations, 206	
III. Nutritional Supplements, 207	
2. Diagnosis of Auxotrophs (Auxanography)	209
3. Storage of Bacteria, Phage, and DNA	211
I. Storage of Phage and Bacteria, 211	
II. Storage Procedures, 211	
III. Storage of DNA, 213	
4. Buffers and Solution Concentrations	215
I. Buffers, 215	
II. Solution Concentrations, 217	
5. Preparation of Dialysis Tubing	219
6. Weights and Measures	221
I. Microliter Volume Measurement, 221	
II. Melting Temperature of DNA, 222	
III. Clearing Time, 224	
IV. Units, 225	
7. Restriction Endonuclease Cleavage	227
I. Method, 227	
II. Properties of Restriction Endonucleases, 228	
8. $\lambda$ Vector Capacity	231
9. Restriction Maps	233
I. $\lambda$ Maps and $\lambda$ Vectors, 233	
Figure 1 $\lambda$ Map, 235	
Figures 2-3 Cleavage Sites for Restriction	
Endonucleases in $\lambda$ DNA, 236	
Figure 4 $\lambda$ gt1- $\lambda$ B <u>EcoRI</u> , 238	
Figure 5 $\lambda$ gt4 <u>EcoRI</u> , 239	

Figure 6  $\lambda$ gt5-lac5 EcoRI, 240  
 Figure 7  $\lambda$ gt7-ara6 EcoRI, 241  
 Figure 8  $\lambda$ 607 EcoRI, 242  
 Figure 9  $\lambda$ sep6-lac5 EcoRI, 243  
 Figure 10 Charon 4 EcoRI, 244  
 Figure 11  $\lambda$ 590 HindIII, 245  
 Figure 12  $\lambda$ 760 HindIII, 246  
 Figure 13  $\lambda$ gt30-Ec6 Sall, XhoI, 247  
 Figure 14  $\lambda$ gt40 SstI, 248

## II. Map of pBR322, 249

Figure 15 Map of pBR322, 250

## 10. Histidine Deletion Map

## 11. Patch Pattern
