

CONTENTS

Preface	V
Introduction	VII
Contributors	IX
FERMENTATION	
Antibody Production with Airlift Fermentors	1
<i>J.R. Birch, K. Lambert, P. W. Thompson, A. C. Kenney and L.A. Wood</i>	
Monoclonal Antibody Production in Stirred Reactors	21
<i>J. D. Macmillan, D. Velez, L. Miller and S. Reuveny</i>	
Microcarrier Cell Culture	59
<i>R. Fleischaker</i>	
ENCAPSULATION	
Cellular Microencapsulation for Large-Scale Production of Monoclonal Antibodies	81
<i>R. Rupp, K. Gilbride and M. Oka</i>	
Entrapment of Cultured Cells in Agarose Beads	95
<i>K. Nilsson</i>	
BIO-REACTORS	
An Automated Hollow Fiber System for the Large Scale Manufacture of Mammalian Cell Secreted Product	113
<i>M. D. Hirschel and M. L. Gruenberg</i>	
Continuous Cell Culture with Fluidized Sponge Beads	145
<i>R. C. Dean, Jr., S. B. Karkare, P. G. Phillips, N. G. Ray and P. W. Runstadler, Jr.</i>	
Perfusion Cell Culture System Based on Ceramic Matrices	169
<i>B. K. Lydersen</i>	
PLANT CELL CULTURE	
Large Scale Plant Cell Culture	193
<i>G. F. Payne, M. L. Shuler and P. Brodelius</i>	
REGULATORY CONSIDERATIONS	
Safety Considerations for Cell Culture-Derived Biologicals	231
<i>A. S. Lubiniecki</i>	
Index	249
