

CONTENTS

Introduction	11
PART ONE. MAIN PROPERTIES OF TEXTILE FIBRES	
Chapter 1. Chemical Composition of Textile Fibres	13
General Properties of High-Molecular Compounds	13
Cellulose and Its Properties	14
Chapter 2. The Structure and Composition of Cellulose Vegetable Fibres	20
Structure, Composition, and Properties of Cotton Fibre	21
Structure, Composition, and Properties of Flax Fibres	27
Chapter 3. The Action of Physical and Chemical Agents on Cellulose	30
Effect of Temperature	30
Behaviour of Cellulose in Water and Organic Solvents	30
Action of Acids	31
Action of Salt Solutions	32
Action of Alkalies	33
Action of Reducing and Oxidizing Agents	38
Effect of Light and Atmospheric Conditions	42
Effect of Microorganisms on Cellulose	43
Cellulose Ethers and Esters	43
Chapter 4. Natural Admixtures of Cotton Fibre	45
Nitrogen Constituents of Cotton	45
Waxy Substances	47
Pectins	49
Ash and Colouring Matter	52
Lignin	54
Chapter 5. Man-Made Cellulose Fibres	56
Chapter 6. General Notions on Protein Fibres	61
Structure of Proteins	61
Proteins as Ampholytes	72
Chapter 7. Wool	76
Morphology and Histology of Wool Fibres	76
Chemical Composition and Structure of Keratin	81
Wool Properties	87
Chapter 8. Silk	97
General Concepts	97
Fibroin	98
Sericin	106
Non-Protein Substances Contained in Silk	107
Silk of Wild Silkworms	108

<i>Chapter 9. Synthetic Fibres</i>	108
Heterochain Fibres	109
Carbochain Fibres	115

PART TWO. MAJOR OPERATIONS PRECEDING DYEING AND PRINTING

<i>Chapter 1. Bleaching of Cellulosic Fibrous Materials</i>	126
Purpose of Bleaching	126
Effect of Alkalies on the Admixtures of Cellulose	128
Elimination of Wax-Like Substances	130
Chemistry of Bleaching	134
Demands Placed Upon Water Used in Finishing	155
Washing of Textile Materials	157
<i>Chapter 2. Technology of Cotton Fabric Bleaching</i>	164
Classic Method of Bleaching Cotton Fabrics	166
Continuous Methods of Bleaching Cotton Fabrics	194
Raising of Fabrics	206
<i>Chapter 3. Mercerization</i>	209
The Purpose and Essence of Mercerization	209
Main Parameters of the Mercerization Process	213
Mercerization of Cotton Fabrics	215
Cleaning and Evaporation of Caustic Soda Liquids	219
<i>Chapter 4. Bleaching of Linen Goods</i>	221
The Mechanism of Flax Fibre Cleaning	222
Boiling Off and Bleaching Flax Yarn	224
Manufacturing Half-White Roving by the Oxidizing Boiling Process	234
Boiling and Bleaching Linen Fabrics	235
<i>Chapter 5. Preparation of Fabrics Made of Man-Made Cellulose Fibres</i>	244
Preparation of Fabrics Made of Viscose and Cuprammonium Fibres	244
Preparation of Fabrics Manufactured from Viscose Staple Fibre	249
Preparation of Fabrics Manufactured from Acetate Fibre	250
Wringing and Drying of Fabrics	252
<i>Chapter 6. Preparation of Woollen Fabrics For Dyeing</i>	254
Reception of Grey Cloth, Quality Control and Singeing	254
Washing	255
Fabric Felting	267
Crabbing	278
Carbonization of Fabrics	281
Teazeling	289
Bleaching and Stripping	292
<i>Chapter 7. Preparation of Natural Silk for Dyeing</i>	293
Degumming of Silk Fabrics	294
Silk Bleaching	305
Silk Weighing	306
<i>Chapter 8. Preparation for Dyeing of Fabrics Manufactured from Synthetic Fibres and Blends of Cellulose and Synthetic Fibres</i>	307

PART THREE. DYEING OF FIBROUS MATERIALS

<i>Chapter 1. Theoretical Grounds of the Dyeing Process Mechanism (Brief Outline)</i>	314
<i>Chapter 2. Modern Concepts of the Theory of Dyeing</i>	318
Dyes	321
Kinetics of the Dyeing Process	324
The Nature of Bonds Between the Dye and the Fibre	337
<i>Chapter 3. Surface-Active Substances</i>	339
General Properties	339
<i>Chapter 4. Review of Dyeing Methods</i>	342
General	342
Machines for Dyeing Loose Stock, Combed Top and Yarn	342
Continuous-Action Dyeing Equipment	348
Calculation of the Supply of Continuous-Action Dye Baths	352
Requirements Set Towards Colour Fastness	353
<i>Chapter 5. Dyeing with Direct Dyes</i>	354
Chemistry and Properties of Direct Dyes	354
Theory of the Dyeing Process	355
Dye Uptake as a Function of Technological Process Conditions	364
Dyeing of Cellulosic Materials	368
Dyeing of Protein Fibres and Capron	375
Dyeing of Capron	378
Improving Colour Fastness	379
<i>Chapter 6. Acid Dyes and Their Use</i>	383
Theoretical Substantiation of Acid Dyeing	384
Dye Fixation by Fibrous Materials	386
Dyeing Routine	393
<i>Chapter 7. Dyeing with Acid-Mordant (Chrome) Dyes</i>	398
Theoretical Backgrounds	398
Methods of Dyeing and Operational Routine	404
<i>Chapter 8. Reactive Dyes and Their Use</i>	409
Structure of Reactive Dyes	410
The Effect of Various Factors on Dyeability	418
Dyeing Methods	420
<i>Chapter 9. Dyeing with Vat Dyes</i>	426
Main Principles of Dyeing	428
Reduction	429
Dyeing Mechanism	433
Effect of Light and Atmospheric Conditions on Dyed Fabrics	445
<i>Chapter 10. Dyeing with Sulphur Dyes</i>	447
Chemical Properties of Sulphur Dyes	447
Properties of Sulphur Dyes and Dyeing Conditions	448
Methods and Conditions of Dyeing	451
<i>Chapter 11. Formation of Aniline Black on the Fibre</i>	459
Structure of Aniline Black	460
The Role Played by a Catalyzer in the Reaction of Aniline Black Formation	464

Methods of Aniline Black Formation on Fibrous Material	466
Effect of Light and Weather Conditions	472
Drawbacks of Aniline Black Dyeing	472
Chapter 12. Formation of Insoluble Azoic Dyes on a Fibre	473
Azoic Coupling Components, Their Structure and Assortment	473
Properties of Azoic Coupling Components and Preparation of their Solutions	477
Preparation of Diazo Solutions	481
Azoic Coupling	484
Dyeing of Acetate and Synthetic Fibres	488
Chapter 13. Dyeing of Polyacrylonitrile Fibres with Basic (Cationic) Dyes	490
Chapter 14. Dyeing with Disperse Dyes	492
General	492
Dyeing Methods	497

PART FOUR. TEXTILE PRINTING

Chapter 1. Printing Techniques	501
Hand-Block Printing	501
Spray Printing	501
Screen Printing	503
Screen Printing Machines	509
Roller Printing Machines	515
Chapter 2. Patterns and Methods of Engraving Printing Rollers	519
Manual Engraving Method	520
Molette Method of Engraving	520
Pantograph Engraving Method	522
Photoengraving of Printing Rollers	524
Chroming of Copper and Copper-Plated Steel Printing Rollers	527
Chapter 3. Equipment for Preparation of Fabrics for Printing and for Their Treatment After Printing	528
Preparation of Fabrics for Printing	528
Treatment of Fabrics After Printing	532
Chapter 4. Printing Pastes and Equipment of the Colour Room	542
General Properties of Printing Pastes	542
Thickeners and Their Main Properties	543
Preparation of Thickeners	548
Preparation of Printing Pastes	553
Printing Styles	559
The Trichromatic Technique of Printing on Textiles	559
Chapter 5. Formation of Insoluble Azoic Dyes on the Fabric in Printing	560
Printing on Naphtholated Fabric	561
Printing with Thickened Azo Component	564
Printing with Stable Diazo Compounds	564
Chapter 6. Printing with Vat Dyes	572
Indigo Printing by the Reduction Method	572
Printing with Polycyclic Dyes	575
Printing with Pasted Vat Dyestuffs	577
Printing with Vat Dyes in Repeat with Insoluble Azoic Dyes	578

Two-Phase Printing with Vat Dyes	579
Printing with Kubosols	581
Printing with Vat Dyes on Fabrics from Protein Fibres	582
Chapter 7. Aniline Black Formation and Application of Pigments in Printing	583
Formation of Aniline Black on the Fibre by Printing	583
Pigment Printing	586
Printing with Alcyan Dyes	588
Chapter 8. Printing with Reactive Dyes	589
Chapter 9. Printing with Disperse Dyes	591
Chapter 10. Printing on Fabrics Produced from Fibre Blends	593
Chapter 11. Obtaining White and Colour Patterns on Dyed Fabrics (Discharges and Resists)	596
Pattern Colouring of Fabrics Dyed with Vat Dyes	596
Discharge Printing	611
Printing on Aniline Black Ground	613

PART FIVE. FABRIC FINISHING

Chapter 1. General	617
Chapter 2. Application of Resins for Finishing	619
Epoxy Resins	624
Divinyl Sulphones	625
Properties Imparted to Cellulose by Various Finishes	626
Chapter 3. Different Processes of Fabric Finishing	627
Cotton Fabric Finishing	627
Finishing of Linen Fabrics	632
Equipment for Finishing Fabrics of Cellulosic Fibres	634
Single-Bath Dyeing and Finishing	639
Finishing to Obtain Permanent Pleats and Shape	640
Finishing of Fabrics Made from Hydrated Cellulose, Synthetic Fibres and from Blends	641
Finishing of Natural Silk Fabrics	645
Finishing of Woollen Fabrics	646
Special Finishing Operations	651
Bibliography	661
Index	663
