

CONTENTS

LIST OF CONTRIBUTORS.....	vii
PREFACE.....	ix
DEDICATION.....	xiii

Recent Aspects of the Chemistry and Biosynthesis of the Gibberellins

J. MacMillan

Introduction.....	1
Chemical Structures.....	3
Structure Determination.....	5
Identification in Plants.....	8
Biosynthetic Metabolism.....	10
Catabolic Metabolism.....	16
Concluding Remarks.....	17
References.....	18

Chemistry of the Cytokinins

Nelson J. Leonard

Introduction.....	21
Chemistry of the Cytokinins: Elucidation of Cytokinin Structures.....	24
Synthesis and Biological Activity of Cytokinins.....	26
Changes in Structure.....	41
Antagonists of the Cytokinins.....	49
Summary.....	53
References.....	54

Chemistry and Biochemistry of Absciscic Acid

B. V. Milborrow

Introduction and Definition.....	57
Revision of the Absolute Configuration of Absciscic Acid.....	59
Synthesis.....	61
Chemistry.....	62

Biological Activity of Analogs.....	64
Pathway of Biosynthesis.....	67
Stereochemistry of Biosynthesis.....	72
Regulation of Biosynthesis.....	80
Compartmentalization.....	82
Metabolites of Absciscic Acid.....	83
Naturally Occurring Compounds Related to Absciscic Acid.....	84
Biochemical Role of Absciscic Acid.....	87
Conclusions.....	88
References.....	89

The Biochemistry of the Action of Indoleacetic Acid on Plant Growth

Peter M. Ray

Introduction.....	93
Primary Action.....	94
Mediation of Auxin Action.....	105
Action on the Cell Wall.....	113
Summary.....	118
References.....	118

Gibberellin Control of a Secretory Tissue

J. E. Varner

Text.....	123
References.....	130

The Biochemistry of Ethylene: Biogenesis and Metabolism

S. F. Yang

Introduction.....	131
Biochemistry of Ethylene Production in Higher Plants.....	134
Biochemistry of Ethylene Production in Fungi.....	152
Metabolism of Ethylene.....	158
References.....	161
 AUTHOR INDEX.....	 165
SUBJECT INDEX.....	173
