

CONTENTS

1.	The Interface between the Chemistry of Aqueous Polymer Solutions and Their Application Technology . . .	1
	P.Molyneux	
✓ 2.	The Rheological Characterization of Concentrated Solutions and Gels of Water Soluble Polymers . .	21
	B.Warburton	
3.	Methods of Polymerization for Preparation of Water Soluble Polymers	31
	R.A.M.Thomson	
4.	Water Sensitive Chemically Cross-linked Gels	71
	J.Kálal	
✓ 5.	Chemical Modification and some Cross-linking Reactions of Water Soluble Polymers	81
	C.A.Finch	
6.	Thermoreversible Gelation	113
	W.Borchard	
✓ 7.	Solution Thermodynamics of Non-ionic Water Soluble Polymers	125
	W.Burchard	
✓ 8.	Fractionation and Characterization of Water Soluble Polymers	143
	R.Dietz	
9.	Water Solubility and Sensitivity-Hydration Effects . .	157
	Felix Franks	
✓ 10.	Aqueous Solutions of Polyelectrolytes	179
	M.Mandel	
✓ 11.	Polymer-Small Molecule Interactions	193
	I.D.Robb	
12.	Excluded-Volume Interactions of Neutral Polymers in Solution	203
	A.G.Ogston	

✓ 13.	Polymer Adsorption B.Vincent	215
✓ 14.	The Role of Polymers in the Stabilization of Disperse Systems D.H.Napper	233
✓ 15.	Water Soluble Polymers in the Stabilization of Dispersions, including Polymerizing Systems W.P.J.Baily	249
✓ 16.	Medical and Pharmaceutical Applications of Water Soluble Polymers F.G.Hutchinson	267
✓ 17.	Some Properties of Polyvinyl Alcohol and their Possible Applications C.A.Finch	287
18.	Polymeric Flocculants J.Gregory	307
19.	Polymers in Oil Recovery and Production D.E.Graham	321
	Index	341
