

Contents

1. General and theoretical aspects M. Simonetta and P. Beltrame	1
2. Preparation of acyl halides M. F. Ansell	35
3. Detection, determination and characterization H. Weiler-Feilchenfeld	69
4. Acid-base behaviour and complex formation D. P. N. Satchell and R. S. Satchell	103
5. Directing and activating effects of COX groups P. H. Gore	137
6. Mechanisms of substitution at the COX group A. Kivinen	177
7. Reduction O. H. Wheeler	231
8. Rearrangements involving acyl halides D. V. Banthorpe and B. V. Smith	253
9. Photochemistry and radiation chemistry of carbonyl halides U. Schmidt and H. Egger	293
10. Biological reactions of carbonyl halides S. Cohen	313
11. Thiocarbonyl halides K. T. Potts and C. Sapino	349
12. Chloroformate esters and related compounds D. N. Kevill	381
13. The acyl hypohalites D. D. Tanner and N. J. Bunce	455
Author index	501
Subject index	539
